### Safe Harbor Statement

The Company's consolidated operating results are affected by a wide variety of factors that could materially and adversely affect revenues and profitability, including the risk factors described in Item 1A of our 2019 Annual Report on Form 10-K. As a result of these and other factors, the Company may experience material fluctuations in future operating results on a quarterly or annual basis, which could materially and adversely affect its business, consolidated financial condition, operating results, and common stock prices. Furthermore, this document and other documents filed by the Company with the Securities and Exchange Commission ("SEC") contain certain forward-looking statements under the Private Securities Litigation Reform Act of 1995 ("Forward-Looking Statements") with respect to the business of the Company. Forward-Looking Statements are necessarily subject to risks and uncertainties, many of which are outside our control, that could cause actual results to differ materially from these statements. Forward-Looking Statements can be identified by

such words as "anticipates," "believes," "plan," "assumes," "could," "should," "estimates," "expects," "intends," "potential," "seek," "predict," "may," "will" and similar references to future periods. All statements other than statements of historical facts included in this report regarding our strategies, prospects, financial conditions, operations, costs, plans and objectives are Forward-Looking Statements. These Forward-Looking Statements are subject to certain risks and uncertainties, including those detailed in Item 1A of our 2019 Annual Report on Form 10-K, which could cause actual results to differ materially from these Forward-Looking Statements. The Company undertakes no obligation to publicly release the results of any revisions to these Forward-Looking Statements which may be necessary to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Any Forward-Looking Statement made by the Company is based only on information currently available to us and speaks only as of the date on which it is made.

### **About Bel**

### Annual Sales of \$465M \*

\* Trailing twelve months ended 6/30/20

Bel (NASDAQ: BELFA/BELFB) designs, manufactures and markets a broad array of products that power, protect and connect electronic circuits.

These products are primarily used in the network, cloud infrastructure, military, aerospace, medical, industrial and telecom industries.

Power Solutions & Protection

\$158M in sales (34%)

**Cinch Connectivity Solutions** 

\$163M in sales (35%)

Magnetic Solutions

\$144M in sales (31%)

### Bel at a Glance

70 years

serving diversified industries with a broad array of products

10 acquisitions

completed in the past 8 yrs

Gross margin expansion

22.5%

in 2019 in H1-20

Free cash flow expansion

\$14.5M

in full year 2019

\$16.8M

in H1-20

Global restructuring

\$8.8 million

of cost savings implemented in 2019 and H1-20, \$1.9M of which is incremental to H2-20

Backlog of

\$180 million

at June 30, 2020, an increase of 12% from year-end

Long history of consistent dividend payments on both classes of stock

25.3%

### **Growth Drivers**

Military & Aerospace

- Positions on key programs, including JSF, AEGIS, Patriot, B2B, FA-18
- Mfocs (mobile field system)
- Next generation rectangular connectors (C-ENX, C-DMX)

Networking & High-Performance Computing

- Edge Computing & Fringe Data
   Centers driven by demands from
   Artificial Intelligence and 5G
   cellular bandwidths
- Open Compute Network infrastructure requiring more 100W PoE, 10GBT and 25GBT
- High power conduction-cooled solutions

**E-Mobility** 

- Full range of DC/DC converter,
   DC/AC inverter and onboard chargers
- Over 200 customers in the last 4 years
- Customer base consist of big OEM automotive, mining, marine and construction companies

### **Distribution**

- Bel is a top 15 supplier overall at Digi-Key
- Bel is #1 power supplier at Digi-Key
- NPI strategy driving product depth & customer growth
- Value-Add Distributors serving Mil/Aero markets

# 2020 Highlights

100% of manufacturing factories operational despite Covid

Global cost review program

**Strong end Markets:**Defense, Medical, Networking

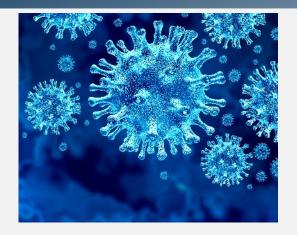

**Gross margin expansion** 

**CUI acquisition-** A successful start

## 2020 Outlook

**Coronavirus Outbreak** 

China – Hong Kong

**Tariffs** 

**Commercial Aerospace** 

**Brexit** 

**Presidential Election** 

POWER | PROTECT | CONNECT

### **Current Focus**

### Short-Term:

- Ensure workplace safety and cleanliness to mitigate impact of COVID to our operations
- Continue cash preservation activities
- Continue to limit Capex and other discretionary spending
- Continue to scale manufacturing resources to support current order demand
- Continue focus on new product introductions (NPI)

### Medium-Term: Improve profit margins

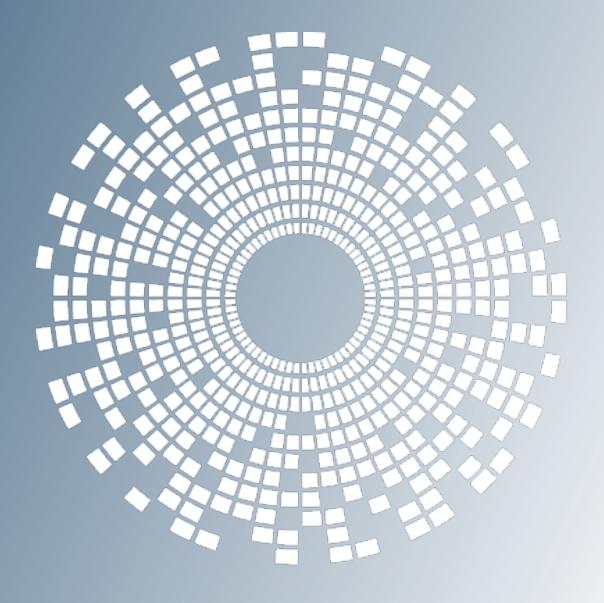

- Exit customers and products that have low margins
- Reduce overhead structure permanently to streamline organization, wherever possible
- Continue cost savings initiatives as ERP system implementation is completed over next year
- Expand products in distribution channels

### Long-Term: Acquisitions

- Non-PRC manufacturing
- Mil/Aero

| 2019 | \$492,412    | 22.5%4          | -0.4%              | 16,471  | 9,891               | 14,559                         |

<sup>&</sup>lt;sup>1</sup> EBITDA as calculated by the Company represents earnings before interest, taxes, depreciation and amortization. EBITDA margin as presented above is calculated by dividing EBITDA by net sales.

<sup>&</sup>lt;sup>4</sup> Effective with the fourth quarter 2019 reporting, R&D expense is now reflected outside of COGS and is therefore no longer a factor in arriving at gross margin. Prior year gross margin % has not been recast on this slide. The comparable 2019 GM% would have been 17.0%

<sup>&</sup>lt;sup>2</sup> Free cash flow as presented above represents net cash provided by operating activities less cash paid for capital expenditures.

<sup>&</sup>lt;sup>3</sup> Excludes the effect of a \$106M impairment charge on goodwill and other intangible assets recorded in 2016 and \$8.9M in TTM 9/30/19. Without adjusting for this factor, EBITDA margin for 2016 is (10.8)% and EBITDA margin for TTM 9/30/19 is 5.3%.

# Reconciliation of Net Earnings to EBITDA

# Financial Drivers Q1-20

### **Favorable**

- FX was favorable in COGS vs. Q1-19, as USD appreciated against:
  - EUR by 2%
  - MXN by 2%
  - RMB by 2%
- Variable costs within COGS largely flat (53.4% of sales in Q1-20 vs 53.6% of sales in Q1-19)
- Fixed costs within COGS down \$3.5M (\$24.4M in Q1-20 vs. \$27.9M in Q1-19), largely due to \$2.5M reduction in overhead and \$900k lower support labor and fringe (receipt of \$2M in funds from Chinese government related to COVID-19 relief program)
- R&D expenses were lower by \$1.1M vs Q1-19 due to cost savings from recent restructuring efforts and favorable FX environment in Q1-20
- FX gain of \$45k in Q1-20 vs. FX loss of \$573k in Q1-19
- Addition of CUI sales of \$8.2M in Q1-20 at a 13.5% EBITDA margin

### **Unfavorable**

- COVID-19:
  - Temporary closures of manufacturing facilities in the PRC
  - Delays throughout supply chain
  - \$14-17M of sales scheduled for Q1 shipment delayed to Q2
- Sales down \$21.4M (17%) from Q1-19
  - Connectivity sales ↓ by \$5.3M (\$3.4M decline in commercial aerospace, \$1.3M reduction in industrial applications, and \$1.8M decline in passive, offset by gains of \$1.7M in military applications)
  - Magnetic sales 
     ↓ by \$9.5M (large networking OEM customer)
  - Power sales ↓ by \$6.7M (cloud customer down \$4.9M, distribution down \$3.5M, Modules down \$1.3M; DC/DC down \$1.1M, offset by CUI sales of \$8.2M)
- Fluctuation in gain/loss on cash surrender value of COLI policies:
  - \$1.9M loss in Q1-20 vs \$1.0M gain in Q1-19
  - Unfavorable y/y fluctuation of \$2.9M

### **Financial Drivers Q2-20**

### **Favorable**

- Addition of CUI sales of \$10.6M in Q2-20 at a 23.6% EBITDA margin
- Variable costs within COGS down (54.0% of sales in Q2-20 vs 56.4% of sales in Q2-19), primarily due to shift in product mix (declines in power products with high material content; increase in high-margin CUI product and connectivity products going into military applications)
- Fixed costs within COGS down \$4.8M (\$24.3M in Q2-20 vs. \$29.1M in Q2-19), largely due to \$2.4M reduction in support labor and fringe and \$2.3M of lower overhead costs (receipt of \$1M in funds from Chinese government related to COVID-19 relief program)
- FX was favorable in COGS vs. Q2-19, as USD appreciated against:
  - MXN by 19%; RMB by 4%; EUR by 2%
  - Overall, resulted in lower labor and overhead costs of \$1.2M
- R&D expenses were lower by \$684k vs Q2-19 due to cost savings from recent restructuring efforts and favorable FX environment in Q2-20
- T&E expenses of \$162k in Q2-20 vs \$844k in Q2-19 (a decrease of \$682k)
- Fluctuation in gain/loss on cash surrender value of COLI policies:
  - \$1.5M gain in Q2-20 vs \$243k gain in Q2-19
  - Favorable y/y fluctuation of \$1.3M

### **Unfavorable**

- Sales down \$6.2M (5%) from Q2-19
  - Connectivity sales ↓ by \$3.6M (\$5.6M decline in commercial aerospace, \$1.7M reduction in industrial applications, offset by gains of \$3.8M in military applications)
  - Magnetic sales 
     ↓ by \$3.6M (ICM's down \$1.5M/large networking OEM customer & Signal down \$1.8M/pause in ordering of non-essential medical equip)
  - Excluding CUI, Power sales ↓ by \$10.5M, Fuse sales up by \$537k and a \$336k increase in module sales. \$3.8M in Power reduction relates to lowmargin business.
- FX loss of \$103k in Q2-20 vs. FX gain of \$450k in Q2-19 (unfavorable swing in Other Income/Expense of \$553k)
- Continued COVID-19 operational inefficiencies

# Why Bel?

70 years in the Electronic Components Industry

Diversified Product
Offering

Strong Engineering &
Manufacturing Capabilities –
Around the World

# Lean Management Structure

- Greater flexibility/agility
- Responsiveness-short chain of command
- Quick to adapt to changing environments/technologies

### **Cisco 9400**

The Catalyst 9400 Series is the next generation of the industry's most widely deployed enterprise switching platform... These modular access switches are built for security, IoT, and cloud. They deliver state-of-the-art high availability, support up to 9 Tbps, provide the latest in 90-watt UPOE+, and form one of the building blocks for SD-Access, Cisco's leading enterprise architecture.

- Cisco website

# Internal Board level components:

- Fuses
- DC/DC isolated board mount converters
- DC/DC point-of-load converters
- Passive jack communications ports

### **Multiport ICMs**

- 1G to 10G port speeds
- 15-90W PoE capability

### Case Study

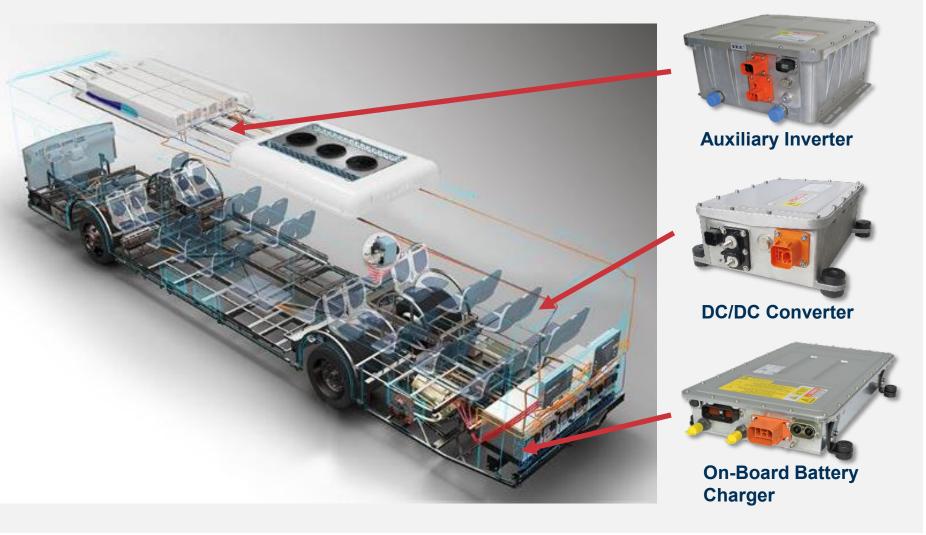

# **eMobility**

# **BCL Series**25 kW AC/DC Charger

On-board bidirectional charger with single/three-phase input (250 – 800 Vdc)

- Liquid cooling
- CAN bus SAE J1939
- Galvanic isolated
- ECE R10.6 / IEC61851-21-1 / UL2202
- IP65 / IP67 compliant
- SAE J1772 type 2 compliant
