CAUTIONARY NOTICE REGARDING FORWARD-LOOKING INFORMATION

The terms the "Company," "Bel," "we," "us," and "our" as used in this report refer to Bel Fuse Inc. and its consolidated subsidiaries unless otherwise specified.

The Company's consolidated operating results are affected by a wide variety of factors that could materially and adversely affect revenues and profitability, including the risk factors described in Item 1A of our 2019 Annual Report on Form 10-K and the risk factors described in this quarterly report. As a result of these and other factors, the Company may experience material fluctuations in future operating results on a quarterly or annual basis, which could materially and adversely affect its business, consolidated financial condition, operating results, and common stock prices. Furthermore, this document and other documents filed by the Company with the Securities and Exchange Commission ("SEC") contain certain forward-looking statements under the Private Securities Litigation Reform Act of 1995 ("Forward-Looking Statements") with respect to the business of the Company. Forward-Looking Statements are necessarily subject to risks and uncertainties, many of which are outside our control, that could cause actual results to differ materially from these statements. Forward-Looking Statements can be identified by such words as "anticipates," "believes," "plan," "assumes," "could," "should," "estimates," "expects," "intends," "potential," "seek," "predict," "may," "will" and similar references to future periods. All statements other than statements of historical facts included in this report regarding our strategies, prospects, financial condition, operations, costs, plans and objectives and regarding the anticipated impact of COVID-19 are Forward-Looking Statements. These Forward-Looking Statements are subject to certain risks and uncertainties, including those detailed in Item 1A of our 2019 Annual Report on Form 10-K and in the risk factors described in this quarterly report, which could cause actual results to differ materially from these Forward-Looking Statements.

BEL FUSE INC. AND SUBSIDIARIES NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

The condensed consolidated balance sheets and statements of operations, comprehensive income, stockholders' equity and cash flows for the periods presented herein have been prepared by the Company and are unaudited. In the opinion of management, all adjustments (consisting solely of normal recurring adjustments) necessary to present fairly the consolidated financial position, results of operations and cash flows for all periods presented have been made. The results for the three and six months ended June 30, 2020 are not necessarily indicative of the results to be expected for the full year. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and footnotes thereto included in the Bel Fuse Annual Report on Form 10-K for the year ended December 31, 2019.

Certain information and footnote disclosures required under accounting principles generally accepted in the United States of America ("U.S. GAAP") have been condensed or omitted from these condensed consolidated financial statements pursuant to the rules and regulations, including the interim reporting requirements, of the U.S. Securities and Exchange Commission ("SEC"). The preparation of condensed consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts and the disclosure of contingent amounts in our condensed consolidated financial statements and accompanying notes. Actual results could differ from these estimates.

The Company's significant accounting policies are summarized in Note 1 of the Company's Annual Report on Form 10-K for the year ended December 31, 2019. There were no significant changes to these accounting policies during the six months ended June 30, 2020, except as discussed in "Recently Adopted Accounting Standards" below.

Reclassifications - During the fourth quarter of 2019, the Company changed its financial statement presentation of research and development costs. These costs were previously included within cost of sales and were a factor in arriving at gross profit. Research and development costs in the amount of \$6.9 million and \$14.0 million have been reclassified from cost of sales to a separate line item below gross profit in the accompanying condensed consolidated statement of operations for the three and six months ended June 30, 2019, respectively. Also during the fourth quarter of 2019, the Company changed its financial statement presentation related to gain/loss on foreign currency exchange. These gains/losses were previously included within selling, general and administrative expense. Gains (losses) on foreign currency exchange in the amount of \$0.5 million and (\$0.1) million have been reclassified from selling, general and administrative expense and are now included within other (expense) income, net on the accompanying condensed consolidated statement of operations for the three and six months ended June 30, 2019, respectively. These changes in presentation are consistent with that of our peers. The Company also implemented a change to its reportable segments during the fourth quarter of 2019. In the past, the Company's reportable operating segments were geographic in nature: North America, Europe and Asia. In connection with the Company's migration to its new ERP system and with the acquisition of CUI, management is now assessing the business on a product group basis, and making decisions based on the profitability of three product segments, Cinch Connectivity Solutions, Power Solutions and Protection and Magnetic Solutions, in addition to a Corporate segment. The segment disclosures in Note 14 for the three and six months ended June 30, 2019 have been recast to reflect the new reportable operating segments.

All amounts included in the tables to these notes to condensed consolidated financial statements, except per share amounts, are in thousands.

Recently Adopted Accounting Standards

In August 2018, the FASB issued ASU 2018-13, *Fair Value Measurement (Topic 820): Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement.* The updated guidance improves the disclosure requirements on fair value measurements. The updated guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. The Company adopted the updated provisions effective January 1, 2020. The adoption did not have a material impact on the Company's consolidated financial position or consolidated results of operations.

In August 2018, the FASB issued ASU 2018-15, *Intangibles – Goodwill and Other-Internal-Use Software (Subtopic 350-40): Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That is a Service Cost.* This guidance aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. This guidance is effective for interim and annual reporting periods beginning after December 15, 2019. The Company adopted this guidance effective January 1, 2020 and it did not have a material impact on its consolidated financial position or consolidated results of operations.

Accounting Standards Issued But Not Yet Adopted

In June 2016, the FASB issued ASU No. 2016-13, *Financial Instruments — Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments ("ASU 2016-13")*, as amended. The new guidance will broaden the information that an entity must consider in developing its expected credit loss estimates related to its financial instruments and adds to U.S. GAAP an impairment model that is based on expected losses rather than incurred losses. The amendment is effective for the Company for annual reporting periods beginning after December 15, 2022, with early adoption permitted. Management is currently assessing the impact of ASU 2016-13, but it is not expected to have a material impact on the Company's consolidated financial statements.

In August 2018, the FASB issued ASU 2018-14, *Compensation-Retirement Benefits-Defined Benefit Plans-General (Subtopic 715-20): Disclosure Framework – Changes to the Disclosure Requirements for Defined Benefit Plans ("ASU 2018-14")*. This guidance removes certain disclosures that are not considered cost beneficial, clarifies certain required disclosures and adds additional disclosures. The standard is effective for fiscal years ending after December 15, 2020. The amendments in ASU 2018-14 would need to be applied on a retrospective basis. The Company is currently assessing the impact the new guidance will have on the Company's disclosures.

In December 2019, the FASB issued ASU 2019-12, *Simplifying the Accounting for Income Taxes* ("ASU 2019-12"), which modifies ASC 740 to reduce complexity while maintaining or improving the usefulness of the information provided to users of financial statements. ASU 2019-12 is effective for the Company for interim and annual reporting periods beginning after December 15, 2020. The Company is currently assessing the impact of ASU 2019-12, but it is not expected to have a material impact on the Company's consolidated financial statements.

2. ACQUISITION

On December 3, 2019, the Company completed the acquisition of the majority of the power supply products business of CUI Inc. ("CUI") through an asset purchase agreement with CUI Global Inc. for \$29.2 million (after a working capital adjustment), plus the assumption of certain liabilities. The CUI power business designs and markets a broad portfolio of AC/DC and DC/DC power supplies and board level components. The CUI power business is headquartered in Tualatin, Oregon and had sales of \$32.0 million for the year ended December 31, 2019. The acquisition of the CUI power business enhances Bel's existing offering of power products, allowing the Company to better address all of its customer power needs. It also introduces an alternative business model to Bel's, one which carries a higher gross margin profile and lower manufacturing risk. The acquisition of CUI has also created the opportunity for expense reduction and the elimination of redundancies. The combination of these factors has given rise to \$10.9 million of goodwill.

During the three and six months ended June 30, 2020, the Company expensed \$0.2 million of acquisition-related costs. These costs are included in selling, general and administrative expenses in the accompanying condensed consolidated statements of operations.

While the purchase price allocation related to CUI is substantially complete, the allocations are currently under review and are subject to change. The Company expects to finalize the purchase price allocation as soon as practicable, but no later than one year from the acquisition date.

CUI's results of operations have been included in the Company's condensed consolidated financial statements for the period subsequent to the acquisition date. CUI contributed revenues of \$10.6 million and estimated net earnings of \$2.3 million to the Company for the three months ended June 30, 2020 and revenues of \$18.9 million and estimated net earnings of \$3.1 million to the Company for the six months ended June 30, 2020. The following unaudited pro forma information presents the combined operating results of the Company and CUI. The following unaudited pro forma consolidated results of operations assume that the acquisition of CUI was completed as of January 1, 2019:

	Three Months Ended	Six Months Ended
	June 30, 2019	June 30, 2019
Revenue	\$ 135,847	\$ 270,504
Net earnings	3,383	5,069
Earnings per Class A common share - basic and diluted	0.26	0.39
Earnings per Class B common share - basic and diluted	0.28	0.42

3. REVENUE

The following table provides information about disaggregated revenue by geographic region and sales channel, and includes a reconciliation of the disaggregated revenue to our reportable segments:

The balances of the Company's contract assets and contract liabilities at June 30, 2020 and December 31, 2019 are as follows:

	 June 30, 2020	 December 31, 2019
Contract assets - current (unbilled receivable)	\$ 15,334	\$ 16,318
Contract liabilities - current (deferred revenue)	\$ 1,148	\$ 653

The change in balance of our unbilled receivables from December 31, 2019 to June 30, 2020 primarily relates to a timing difference between the Company's performance (i.e. when our product is shipped to a customer-controlled hub) and the point at which the Company can invoice the customer per the terms of the customer contract (i.e. when the customer pulls our product from the customer-controlled hub).

The aggregate amount of transaction price allocated to remaining performance obligations that have not been satisfied as of June 30, 2020 related to contracts that exceed one year in duration amounted to \$15.2 million, with expected contract expiration dates that range from 2021 - 2025. It is expected that 27% of this aggregate amount will be recognized in 2021, 70% will be recognized in 2022 and the remainder will be recognized in years beyond 2022.

4. EARNINGS PER SHARE

The following table sets forth the calculation of basic and diluted net earnings per common share under the two-class method for the three and six months ended June 30, 2020 and 2019:

	 Three Mor			Six Mont June	_	nded	
	 2020		2019	2020			2019
Numerator:							
Net earnings	\$ 5,573	\$	2,967	\$	1,769	\$	4,098
Less dividends declared:							
Class A	129		131		259		261

Class B - basic and diluted	\$ 0.46	\$	0.24	\$	0.15	\$	0.34

5. FAIR VALUE MEASUREMENTS

Fair value is defined as an exit price, representing the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants based upon the best use of the asset or liability at the measurement date. Entities are required to use a fair value hierarchy which maximizes the use of observable inputs and minimizes the use of unobservable inputs when measuring fair value. There are three levels of inputs that may be used to measure fair value:

- **Level 1** Observable inputs such as quoted market prices in active markets;
- Level 2 Inputs other than quoted prices in active markets that are either directly or indirectly observable; and
- Level 3 U nobservable inputs about which little or no market data exists, therefore requiring an entity to develop its own assumptions.

As of June 30, 2020 and December 31, 2019, our available-for-sale securities primarily consisted of investments held in a rabbi trust which are intended to fund the Company's Supplemental Executive Retirement Plan ("SERP") obligations. These securities are measured at fair value using quoted prices in active markets for identical assets (Level 1 inputs) and amounted to \$0.9 million at June 30, 2020 and \$1.1 million at December 31, 2019. During the second quarter of 2020, the Company entered into foreign exchange forward contracts, the fair value of which was less than \$0.1 million at June 30, 2020. The Company does not have any financial assets measured at fair value on a recurring basis categorized as Level 3, and there were no transfers in or out of Level 3 during the six months ended June 30, 2020 or June 30, 2019. There were no changes to the Company's valuation techniques used to measure asset fair values on a recurring or nonrecurring basis during the six months ended June 30, 2020 or June 30, 2020 or June 30, 2019.

There were no financial assets accounted for at fair value on a nonrecurring basis as of June 30, 2020 or December 31, 2019.

The Company has other financial instruments, such as cash and cash equivalents, accounts receivable, restricted cash, accounts payable and accrued expenses, which are not measured at fair value on a recurring basis but are recorded at amounts that approximate fair value due to their liquid or short-term nature. The fair value of the Company's long-term debt is estimated using a discounted cash flow method based on interest rates that are currently available for debt issuances with similar terms and maturities. At June 30, 2020 and December 31, 2019, the estimated fair value of total debt was \$141.7 million and \$146.4 million, respectively, compared to a carrying amount of \$135.2 million and \$143.7 million, respectively. The Company did not have any other financial liabilities within the scope of the fair value disclosure requirements as of June 30, 2020.

Nonfinancial assets and liabilities, such as goodwill, indefinite-lived intangible assets and long-lived assets, are accounted for at fair value on a nonrecurring basis. These items are tested for impairment upon the occurrence of a triggering event or in the case of goodwill, on at least an annual basis. The Company considered the impacts of COVID-19 on Bel's business and on general economic conditions when making its assessment on whether a triggering event had occurred during the six months ended June 30, 2020. Based on the Company's assessment, it was concluded that no triggering events occurred during the six months ended June 30, 2020 that would warrant interim impairment testing.

6. INVENTORIES

The components of inventories are as follows:

	June 30, 2020	December 31, 2019		
Raw materials	\$ 47,707	\$	47,936	
Work in progress	29,139		27,065	
Finished goods	27,880		32,275	
Inventories	\$ 104,726	\$	107,276	

7. PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment consist of the following:

	June 30, 2020	December 31, 2019
Land	\$ 1,428	\$ 1,431
Buildings and improvements	22,647	29,722
Machinery and equipment	124,192	132,134
Construction in progress	2,662	5,090
	 150,929	168,377
Accumulated depreciation	(113,595)	(126,434)
Property, plant and equipment, net	\$ 37,334	\$ 41,943

Depreciation expense for the three months ended June 30, 2020 and 2019 was \$2.3 million and \$2.5 million, respectively. Depreciation expense for the six months ended June 30, 2020 and 2019 was \$4.7 million and \$5.0 million, respectively. Depreciation expense related to our manufacturing facilities and equipment is included in cost of sales and depreciation expense associated with administrative facilities and office equipment is included in selling, general and administrative expense within the accompanying condensed consolidated statements of operations.

11

8. ACCRUED EXPENSES

Accrued expenses consist of the following:

	 June 30, 2020	December 31, 2019
Sales commissions	\$ 2,685	\$ 2,542
Subcontracting labor	1,115	990
Salaries, bonuses and related benefits	15,301	14,715
Warranty accrual	1,368	1,576

Other	7,933	7,095
	\$ 28,402	\$ 26,918

The change in warranty accrual during the six months ended June 30, 2020 primarily related to repair costs incurred and adjustments to pre-existing warranties. There were no new material warranty charges incurred during the six months ended June 30, 2020.

Restructuring Activities

Included within other accrued expenses in the table above are costs accrued related to the Company's restructuring activities. Activity and liability balances related to restructuring costs for the six months ended June 30, 2020 are as follows:

				Six Montl June 30				
					(Cash		
	Lia	ability at			Pay	ments	Liability at	
	Dε	ecember						
		31, New			and	Other	June 30,	
		2019		Charges	Settlements		2020	
Severance costs	\$	_	\$	216	\$	(216)	\$ -	
Other restructuring costs		44		(44)		-	-	
Total	\$	44	\$	172	\$	(216)	\$ -	

9. DEBT

The Company has a Credit and Security Agreement with KeyBank National Association (as amended, the "credit agreement" or the "CSA"). The CSA consists of (i) a term loan, with outstanding borrowings of \$104.8 million and \$113.0 million at June 30, 2020 and December 31, 2019, respectively, and (ii) a \$75 million revolving credit facility ("Revolver"), with \$32.0 million in outstanding borrowings at each of June 30, 2020 and December 31, 2019. The CSA has a maturity date of December 11, 2022. At June 30, 2020 and December 31, 2019, the carrying value of the debt on the condensed consolidated balance sheet is reflected net of \$1.6 million and \$1.3 million, respectively, of deferred financing costs.

On February 18, 2020, the Company further amended its credit agreement whereby the Company voluntarily prepaid a portion of its term loan under the credit agreement in the amount of \$8.2 million. The amendment also served to modify the interest rate and fees applicable to the loans under the credit agreement and change certain covenants related to matters including acquisitions, share repurchases and financial ratios.

The weighted-average interest rate in effect was 3.44% at June 30, 2020 and 3.31% at December 31, 2019 and consisted of LIBOR plus the Company's credit spread, as determined per the terms of the CSA. The Company incurred \$1.3 million and \$1.4 million of interest expense during the three months ended June 30, 2020 and June 30, 2019, respectively. The Company incurred \$2.6 million and \$2.8 million of interest expense during the six months ended June 30, 2020 and June 30, 2019, respectively.

The CSA contains customary representations and warranties, covenants and events of default and financial covenants that measure (i) the ratio of the Company's total funded indebtedness, on a consolidated basis, to the amount of the Company's consolidated EBITDA, as defined, ("Leverage Ratio") and (ii) the ratio of the amount of the Company's consolidated EBITDA to the Company's consolidated fixed charges ("Fixed Charge Coverage Ratio"). If an event of default occurs, the lenders under the CSA would be entitled to take various actions, including the acceleration of amounts due thereunder and all actions permitted to be taken by a secured creditor. At June 30, 2020, the Company was in compliance with its debt covenants, including its most restrictive covenant, the Fixed Charge Coverage Ratio.

12

10. INCOME TAXES

On March 27, 2020, the Coronavirus Aid, Relief and Economic Security ("CARES") Act was enacted and signed into law. Certain provisions of the CARES Act impact the 2019 income tax provision computations of the Company and were reflected in the three months ended March 31, 2020, or the period of enactment. The CARES Act contains modifications on the limitation of business interest for tax years beginning in 2019 and 2020. The modifications to Section 163(j) increase the allowable business interest deduction from 30% of adjusted taxable income to 50% of adjusted taxable income. This modification would increase the allowable interest expense deduction of the Company and result in a net operating loss ("NOL") for the year ended December 31, 2019. The Company intends to carry back the NOL to the tax year ended December 31, 2015 and has reflected this impact in the tax provision for the three months ended March 31, 2020. Due to the foregoing, and as a result of the difference in corporate tax rates in the NOL carryback period, the Company recognized a benefit associated with the enactment of the CARES Act in the three months ended March 31, 2020.

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction and various states and foreign jurisdictions. The Company is no longer subject to U.S. federal examinations by tax authorities for years before 2016 and for state examinations before 2013. Regarding foreign subsidiaries, the Company is no longer subject to examination by tax authorities for years before 2009 in Asia and generally 2011 in Europe. The Company is currently under examination by the taxing authorities in Slovakia for the tax year 2014 and has accrued tax based on preliminary findings.

As a result of the expiration of the statutes of limitations for specific jurisdictions, it is reasonably possible that the related unrecognized benefits for tax positions taken regarding previously filed tax returns may change materially from those recorded as liabilities for uncertain tax positions in the Company's consolidated financial statements at June 30, 2020. The Company's liabilities for uncertain tax positions totaled \$28.4 million and \$29.1 million at June 30, 2020 and December 31, 2019, respectively, of which \$1.3 million and \$2.2 million is included in other current liabilities at June 30, 2020 and December 31,

2019, respectively and are expected to be resolved during 2020 by way of expiration of the related statute of limitations. These amounts, if recognized, would reduce the Company's effective tax rate.

The Company's policy is to recognize interest and penalties related to uncertain tax positions as a component of the current provision for income taxes. During the six months ended June 30, 2020 and 2019, the Company recognized \$0.4 million in interest and penalties in the condensed consolidated statements of operations during each period. During the six months ended June 30, 2020, the Company recognized a benefit of \$0.3 million for the reversal of such interest and penalties, relating to the settlement of the liability for uncertain tax positions. The Company has approximately \$4.9 million accrued for the payment of interest and penalties at each of June 30, 2020 and December 31, 2019, which is included in both income taxes payable and liability for uncertain tax positions in the condensed consolidated balance sheets.

11. RETIREMENT FUND AND PROFIT SHARING PLAN

The Company maintains the Bel Fuse Inc. Employees' Savings Plan, a defined contribution plan that is intended to meet the applicable requirements for tax-qualification under sections 401(a) and (k) of the Internal Revenue Code of 1986, as amended (the "Code"). The expense for the three months ended June 30, 2020 and 2019 amounted to \$0.3 million in both periods. The expense for the six months ended June 30, 2020 and 2019 amounted to \$0.6 million in both periods. The Company's matching contribution is made in the form of Bel Fuse Inc. Class A common stock. As of June 30, 2020, the plan owned 223,406 and 111,761 shares of Bel Fuse Inc. Class A and Class B common stock, respectively.

The Company's subsidiaries in Asia have a retirement fund covering substantially all of their Hong Kong based full-time employees. The expense for the three months ended June 30, 2020 and 2019 amounted to \$0.1 million in both periods. The expense for the six months ended June 30, 2020 and 2019 amounted to \$0.2 million in both periods. As of June 30, 2020, the plan owned 3,323 and 17,342 shares of Bel Fuse Inc. Class A and Class B common stock, respectively.

The Company maintains a SERP, which is designed to provide a limited group of key management and other key employees of the Company with supplemental retirement and death benefits. As discussed in Note 5 above, the Company has investments in a rabbi trust which are intended to fund the obligations of the SERP.

The components of SERP expense are as follows:

	Three Months Ended June 30,					Six Months Ended June 30,				
	 2020		2019		2020		2019	_		
Service cost	\$ 150	\$	144	\$	300	\$	28	8		
Interest cost	159		185		318		37	0		
Net amortization	86		48		172		9	6		
Net periodic benefit cost	\$ 395	\$	377	\$	790	\$	75	4		

The service cost component of net benefit cost is presented within cost of sales or selling, general and administrative expense on the accompanying condensed consolidated statements of operations, in accordance with where compensation cost for the related associate is reported. All other components of net benefit cost, including interest cost and net amortization noted above, are presented within other (expense) income, net in the accompanying condensed consolidated statements of operations.

The following amounts are recognized net of tax in accumulated other comprehensive loss:

	June 30, 2020	De	ecember 31, 2019
Prior service cost	\$ 662	\$	738
Net loss	1,870		1,965
	\$ 2,532	\$	2,703

12. ACCUMULATED OTHER COMPREHENSIVE LOSS

The components of accumulated other comprehensive loss at June 30, 2020 and December 31, 2019 are summarized below:

	June 30, 2020	 December 31, 2019
Foreign currency translation adjustment, net of taxes of (\$711) at June 30, 2020 and (\$742)		
at December 31, 2019	\$ (21,600)	\$ (20,032)
Unrealized holding gains on available-for-sale securities, net of taxes of \$0 at June 30, 2020		
and \$0 at December 31, 2019	11	12
Unfunded SERP liability, net of taxes of (\$599) at June 30, 2020 and (\$639) at December		
31, 2019	 (3,913)	 (4,045)
Accumulated other comprehensive loss	\$ (25,502)	\$ (24,065)

Changes in accumulated other comprehensive loss by component during the six months ended June 30, 2020 are as follows. All amounts are net of tax.

				Unrealized Holding				
		Foreign		8				
		Currency		Gains on				
	-	Translation		Available-for-		Unfunded		
		Adjustment	_:	Sale Securities	S	ERP Liability	_	Total
Balance at December 31, 2019	\$	(20,032)	\$	5 12	\$	(4,045)		\$ (24,065)
Other comprehensive loss before								
reclassifications		(1,568)		(1)		(37)		(1,606)
Amount reclassified from accumulated other								
comprehensive loss		-		-		169 (a)	169
Net current period other comprehensive								
income (loss)		(1,568)		(1)		132		(1,437)
Balance at June 30, 2020	\$	(21,600)	\$	5 11	\$	(3,913)	5	\$ (25,502)

⁽a) This reclassification relates to the amortization of prior service costs and gains/losses associated with the Company's SERP Plan. This expense is allocated between cost of sales and selling, general and administrative expense based upon the employment classification of the plan participants.

14

13. COMMITMENTS AND CONTINGENCIES

Legal Proceedings

In connection with the acquisition of Power Solutions, there is an ongoing claim by the Arezzo Revenue Agency in Italy concerning certain tax matters related to what was then Power-One Asia Pacific Electronics Shenzhen Co. Ltd. (now Bel Power Solutions Asia Pacific Electronics Shenzhen Co. Ltd., or "BPS China") for the years 2004 to 2006. In September 2012, the Tax Court of Arezzo ruled in favor of BPS China and cancelled the claim. In February 2013, the Arezzo Revenue Agency filed an appeal of the Tax Court's ruling. The hearing of the appeal was held on October 2, 2014. On October 13, 2014, BPS China was informed of the Regional Tax Commission of Florence ruling which was in favor of the Arezzo Revenue Agency and against BPS China.

An appeal was filed on July 18, 2015 before the Regional Tax Commission of Florence and rejected. On December 5, 2016, the Arezzo Revenue Agency filed an appeal with the Supreme Court and BPS China filed a counter-appeal on January 4, 2017. The Supreme Court has yet to render its judgment. The estimated liability related to this matter is approximately \$12.0 million and has been included as a liability for uncertain tax positions on the accompanying condensed consolidated balance sheets. As Bel is fully indemnified in this matter per the terms of the stock purchase agreement with ABB, a corresponding other asset for indemnification is also included in other assets on the accompanying condensed consolidated balance sheets at June 30, 2020 and December 31, 2019.

The Company is not a party to any other legal proceeding, the adverse outcome of which is likely to have a material adverse effect on the Company's consolidated financial condition or results of operations.

14. SEGMENTS

The Company operates in one industry with three reportable operating segments, which represent the Company's three product groups and a corporate segment. The segments consist of Cinch Connectivity Solutions, Power Solutions and Protection, Magnetic Solutions and a Corporate segment. The primary criteria by which financial performance is evaluated and resources are allocated are revenue and gross profit. The following is a summary of key financial data:

		Three Months Ended June 30, 2020									
	(Cinch									
	Con	Connectivity Power Solution				Magnetic		Corporate			
	So	lutions	and l	Protection	Solutions		Segment		Total

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information in this Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") should be read in conjunction with the Company's condensed consolidated financial statements and the related notes set forth in Item 1 of Part I of this Quarterly Report on Form 10-Q, our MD&A set forth in Item 7 of Part II of our 2019 Annual Report on Form 10-K and our consolidated financial statements and related notes set forth in Item 8 of Part II of our 2019 Annual Report on Form 10-K. See Part II, Item 1A, "Risk Factors," below and "Cautionary Notice Regarding Forward-Looking Information," above, and the information referenced therein, for a description of risks that we face and important factors that we believe could cause actual results to differ materially from those in our forward-looking statements. All statements herein regarding the likely impact of COVID-19 constitute forward-looking statements. All amounts and percentages are approximate due to rounding and all dollars in the text are in millions, except per share amounts or where otherwise noted. When we cross-reference to a "Note," we are referring to our "Notes to Condensed Consolidated Financial Statements," unless the context indicates otherwise. All amounts noted within the tables are in thousands and amounts and percentages are approximate due to rounding.

Overview

Our Company

Bel designs, manufactures and markets a broad array of products that power, protect and connect electronic circuits. These products are primarily used in the military, aerospace, networking, telecommunications, computing, transportation and broadcasting industries. Bel's portfolio of products also finds application in the automotive, medical and consumer electronics markets.

The Company operates through three product group segments, in addition to a Corporate segment. In the six months ended June 30, 2020, 36% of the Company's revenues were derived from Power Solutions and Protection, 35% from Cinch Connectivity Solutions and 29% from its Magnetic Solutions operating segment.

Our operating expenses are driven principally by the cost of labor where the factories that Bel uses are located, the cost of the materials that we use and our ability to effectively and efficiently manage overhead costs. As labor and material costs vary by product line and region, any significant shift in product mix can have an associated impact on our costs of sales. Costs are recorded as incurred for all products manufactured. Such amounts are determined based upon the estimated stage of production and include labor cost and fringes and related allocations of factory overhead. Our products are manufactured at various facilities in the U.S., Mexico, Dominican Republic, England, Czech Republic, Slovakia and the People's Republic of China (PRC).

We have little visibility into the ordering habits of our customers and we can be subjected to large and unpredictable variations in demand for our products. Accordingly, we must continually recruit and train new workers to replace those lost to attrition and be able to address peaks in demand that may occur from time to time. These recruiting and training efforts and related inefficiencies, and overtime required in order to meet any increase in demand, can add volatility to the labor costs incurred by us.

The Effects of COVID-19 on Bel's Business

During the first half of 2020, the Company has focused heavily on the continued safety and well-being of its associates around the world in light of COVID-19. The majority of the products manufactured by Bel are utilized in military, medical and networking applications, and are therefore deemed essential by the various jurisdictions in which we operate. Our management team has been able to respond quickly in implementing our business continuity plans around the world. Significant protective measures were put in place throughout our facilities, including employee screenings, physical partitions, social distancing, use of face coverings, travel and visitor restrictions and work from home policies as we continue to service our customers. The majority of our office staff continues to work remotely to avoid a large number of associates being present in an office setting at any one time. With the significant increase in the number of staff working remotely, Bel's IT department took a variety of precautionary measures to protect the computer equipment that associates are utilizing in the remote environment. The combination of protective measures at our factories coupled with remote work arrangements have enabled us to maintain operations, including financial reporting systems, internal controls over financial reporting and disclosure controls and procedures.

Our financial results for the first six months of 2020 reflected the temporary facility closures at certain of our manufacturing locations, particularly in China, Mexico and the Dominican Republic, due to the outbreak of COVID-19 and the related disruption to our supply chain. This led to an estimated \$14-\$17 million of shipments scheduled for the first quarter which were ultimately shipped in the second quarter. The Company also incurred additional indirect COVID-19 related costs, including operational inefficiencies and employee retention programs at its manufacturing facilities in China in the first quarter, which were partially offset by \$2.2 million of COVID-19 relief funding received from the Chinese government also during the first quarter.

16

All of our manufacturing sites are operating as of the filing date of this Quarterly Report. Although the majority of our factories in North America, Europe and Asia are currently at 90+% of their normal workforce levels, we are experiencing lower productivity and efficiency rates at certain sites in North America and Europe (estimated at 60-85%, depending on the impacted site) due to a reduced workforce at those sites. In addition, in order to comply with social distancing requirements, certain of our factory floors have been reconfigured to provide additional spacing in production lines, which has resulted in some inefficiencies related to product flow. Bel has also experienced higher freight costs for products typically shipped by air due to lower cargo capacity with the reduction in commercial air travel. While there are some delays within the supply chain in the movement of products related to border closures, to date such delays have not materially impacted our ability to operate our business or achieve our business goals. To date, we have not seen a significant reduction in demand for our products due to COVID-19, as many of our products support military, medical and networking applications, which generally have not been negatively impacted by COVID-19. However, approximately 5% of our revenue relates to products utilized in end markets that have been impacted by COVID-19, such as commercial aerospace.

Given the general uncertainty regarding the impact of COVID-19 on our manufacturing capability and on our customers, we are unable to quantify the ultimate impact of COVID-19 on our future results at this time.

Based on our analysis of ASC 350 and ASC 360 during the six months ended June 30, 2020, we are currently not aware of any material impairments of our goodwill, indefinite-lived intangible assets or finite-lived assets. The Company will continue to assess the relevant criteria on a quarterly basis based on updated cash flow and market assumptions. Unfavorable changes in cash flow or market assumptions could result in impairment of these assets in future periods.

As our operations have continued, albeit at slightly reduced production and efficiency rates, we have not experienced a negative impact on our liquidity to date. Our balance of cash on hand continues to be strong at \$75.3 million at June 30, 2020 as compared to \$72.3 million at December 31, 2019, despite a voluntary debt payment of \$8.2 million made during the first quarter. Our cash balance on hand as of July 31, 2020 was \$78.5 million. The Company also has availability under its current revolving credit facility; as of June 30, 2020, the Company could borrow an additional \$44.8 million while still being in compliance with its debt covenants. However, any further negative impact to our financial results related to COVID-19 would have a related negative impact on our financial covenants outlined in our credit agreement, which would impact the amount available to borrow under our revolving credit facility. In order to assist with maintaining our liquidity position, the Company implemented several measures during the first quarter, including the deferral of employer social security taxes under the federal CARES Act, restrictions on new hires, suspension of salary reviews, the elimination of all business travel and restrictions on spending related to capital expenditures. During the three and six months ended June 30, 2020, travel expenses incurred by the Company were \$0.7 million and \$0.9 million lower, respectively, than the comparable periods of 2019. Management has developed Phase 2 and Phase 3 of

the Company's cash conservation/cost savings plan which would be implemented in the event our liquidity position or financial results become materially impacted by COVID-19.

Our statements regarding the future impact of COVID-19 represent Forward-Looking Statements. See "Cautionary Notice Regarding Forward-Looking Information."

Other Key Factors Affecting our Business

The Company believes that, in addition to COVID-19, the key factors affecting Bel's results for the six months ended June 30, 2020 and/or future results include the following:

- <u>Revenues</u> The Company's revenues decreased by \$27.7 million (or 10.9%) in the first six months of 2020 as compared to the same period of 2019. The decline was seen across all of our major product groups and was largely due to lower product demand from our commercial aerospace and cloud customers, in addition to temporary closures and lower efficiency levels at certain of our factories during the first half of 2020 due to COVID-19.
- <u>Backlog</u> Our backlog of orders amounted to \$179.6 million at June 30, 2020, an increase of \$19.3 million, or 12%, from December 31, 2019. Since year-end, we saw a 63% increase in the backlog for our Magnetic Solutions products, primarily driven by additional orders from a large networking customer. The backlog of orders for our Power Solutions and Protection products increased by 15% due to increased demand across the majority of our power product lines. Backlog for our Connectivity Solutions products was down 14% from the 2019 year-end levels, primarily due to lower demand from our direct and after-market commercial aerospace customers.

17

- <u>Product Mix</u> Material and labor costs vary by product line and any significant shift in product mix between higher- and lower-margin product lines will have a corresponding impact on the Company's gross margin percentage. In general, our connectivity products have the highest contribution margins of our three product groups. Our power products have a higher bill of materials and are impacted to a greater extent by changes in material costs. As our magnetic solutions products are more labor intensive, margins on these products are impacted to a greater extent by minimum wage increases in the PRC and fluctuations in foreign exchange rates between the U.S. Dollar and the Chinese Renminbi. Fluctuations in revenue volume among our product groups will have a corresponding impact on Bel's profit margins. As compared to the first half of 2019, Connectivity Solutions revenues were down 10.2% in the first half of 2020, Power Solutions and Protection revenues were down 6.5% and Magnetic Solutions revenues were down 16.6%.
- <u>Pricing and Availability of Materials</u> The inventory of resistors and capacitors acquired by Bel and its supply chain in 2018 at higher prices have been worked through and new prices for these materials are significantly less than the 2018 costs. Lead times continue to be extended for certain mosfets and costs for those components remain elevated. As a result, the Company's material costs as a percentage of revenue decreased slightly to 43.5% during the first six months of 2020 from 43.8% during the same period of 2019.
- <u>Labor Costs</u> Labor costs decreased from 11.0% of revenue during the first six months of 2019 to 9.7% of revenue during the same period of 2020, as a more favorable exchange rate environment in 2020 related to the Mexican Peso and Chinese Renminbi outweighed the impact of minimum wage increases which went into effect at two of our factories in the PRC effective March 1, 2020 and May 1, 2020.
- Restructuring The Company continues to implement restructuring programs to increase operational efficiencies and incurred \$0.2 million in restructuring costs during the first six months of 2020. Actions implemented in 2019 related to our Power Solutions and Protections and Magnetic Solutions segments are expected to yield incremental annualized cost savings of \$5.7 million. Of this amount, \$1.7 million was realized in 2019, and \$1.4 million and \$2.9 million were realized during the three and six months ended June 30, 2020, respectively, with \$1.1 million to be realized in the second half of 2020. Additionally, during the second quarter of 2020, Bel initiated the closure of its Power R&D facility in Uster, Switzerland. This closure is anticipated to result in annualized cost savings of \$3.0 million, with expected savings to be realized beginning in the fourth quarter of 2020. The Company also implemented temporary cost reduction measures within its Cinch Connectivity Solutions segment during the first half of 2020 in order to align its cost structure with its current level of revenue. These scalable manufacturing costs, which resulted in estimated cost savings of \$1.7 million and \$3.0 million during the three and six months ended June 30, 2020, respectively, will increase as demand from our commercial aerospace customers recovers. The Company continues to implement its corporate-wide cost savings program to look at all areas for improvements. The preceding sentences represent Forward-Looking Statements. See "Cautionary Notice Regarding Forward-Looking Information."
- Impact of Foreign Currency During the first six months of 2020, labor and overhead costs were \$1.6 million lower than the same period of 2019 due to a favorable foreign exchange environment. The Company also realized foreign exchange transactional losses of less than \$0.1 million during the six months ended June 30, 2020. Since we are a U.S. domiciled company, we translate our foreign currency-denominated financial results into U.S. dollars. Due to the changes in the value of foreign currencies relative to the U.S. dollar, translating our financial results and the revaluation of certain intercompany as well as third-party transactions to and from foreign currencies to U.S. dollars may result in a favorable or unfavorable impact to our consolidated statements of operations and cash flows. The Company was favorably impacted by transactional foreign exchange gains in the first six months of 2020 due to the depreciation of the Peso, Euro, Pound, and Renminbi against the U.S. dollar as compared to exchange rates in effect during 2019. The Company has significant manufacturing operations located in Mexico and in the PRC where labor and overhead costs are paid in local currency. As a result, the U.S. Dollar equivalent costs of these operations were \$1.6 million lower in the first six months of 2020 as compared to the same period of 2019. During the second quarter of 2020, the Company entered into forward contracts to secure a favorable exchange rate related to the Peso through December 31, 2020 for a portion of Bel's expected Peso obligations for the remainder of the year. The Company monitors changes in foreign currencies and may implement further pricing actions to help mitigate the impact that changes in foreign currencies may have on its consolidated operating results.
- <u>Effective Tax Rate</u> The Company's effective tax rate will fluctuate based on the geographic jurisdiction in which our pretax profits are earned. Of the geographic jurisdictions in which we operate, the U.S.'s and Europe's tax rates are generally equivalent; and Asia has the lowest tax rates of the Company's three geographical jurisdictions. See Note 10, "Income Taxes".

Summary by Operating Segment

Revenue

The Company's revenue by operating segment for the three and six months ended June 30, 2020 and 2019 were as follows:

	Three Months Ended					Six Months Ended							
	June 30,						June 30,						
	 Rev	enue	2	Gross M	argin		Rev	enue	<u>.</u>		Gross Ma	argin	
	2020		2019	2020	2019		2020		2019		2020	2019	
Connectivity solutions	\$ 38,908	\$	42,536	29.6%	23.8%	\$	78,007	\$	86,897		29.1%	25.8%	
Magnetic solutions	37,152		40,852	25.4%	20.0%		65,853		79,108		23.4%	21.1%	
Power solutions and													
protection	 45,112		44,028	23.5%	20.2%		81,289		86,800		24.0%	21.7%	
	\$ 121,172	\$	127,416	26.2%	21.0%	\$	225,149	\$	252,805		25.3%	22.7%	

Connectivity Solutions:

Sales of our Connectivity Solutions products declined \$3.6 million and \$8.9 million during the three and six months ended June 30, 2020, respectively, as compared to the same periods of 2019. These declines were primarily due to lower demand from direct and after-market commercial aerospace customers, partially offset by higher demand for our military products in the first half of 2020 as compared to the first half of 2019. This shift in product mix along with the operational cost reductions detailed in the "Restructuring" section above have resulted in improved gross margins for the three and six month periods of 2020 as compared to the same periods of 2019.

Magnetic Solutions:

Sales of our Magnetic Solutions products were down \$3.7 million and \$13.3 million during the three and six months ended June 30, 2020, respectively, as compared to the same periods of 2019. As the majority of our manufacturing of Magnetic Solutions products is in the PRC, our ability to manufacture product was temporarily impacted during the first quarter of 2020 due to the factory closures associated with COVID-19, which contributed to the decline in sales for the first half of 2020 as compared to the same period of 2019. There were improvements in both the levels of productivity and customer demand for our ICM products in the second quarter of 2020 as compared to the first quarter of 2020, while demand remained below that of the second quarter 2019 levels. The gross margin improvement in the 2020 periods presented above versus the comparable 2019 periods was largely the result of restructuring measures implemented in late 2019 and a shift in product mix within the Magnetic Solutions segment.

Power Solutions and Protection:

Sales of our Power Solutions and Protection products were \$1.1 million higher in the second quarter of 2020 compared to the same quarter of 2019, while sales were \$5.5 million lower for the first half of 2020 as compared to the same period of 2019. The CUI business, which was acquired in December 2019, contributed sales of \$10.6 million and \$18.9 million during the three and six months ended June 30, 2020, respectively, at a gross margin of 39.3% and 38.2%, respectively. Sales of our Bel Power Solutions products decreased by \$9.0 million and \$20.9 million during the three and six months ended June 30, 2020, respectively, as compared to the same periods of 2019. These declines were due in part to factory closures in China following the Lunar New Year holiday in connection with COVID-19, in addition to lower demand from a Cloud customer due to tariffs imposed on our product. Our DC/DC power products were also \$1.4 million and \$2.6 million lower during the three and six months ended June 30, 2020, respectively, as compared to the same periods last year. The gross margin expansion noted for the 2020 periods above as compared to the 2019 periods is largely due to the inclusion of higher-margin CUI sales in addition to cost savings that resulted from restructuring efforts implemented in the latter half of 2019.

Cost of Sales

Cost of sales as a percentage of revenue for the three and six months ended June 30, 2020 and 2019 consisted of the following:

	Three Months June 30		Six Months June 3		
	2020	2019	2020	2019	
Material costs	43.4%	45.7%	43.5%	43.8%	
Labor costs	10.5%	10.6%	9.7%	11.0%	
Other expenses	19.9%	22.7%	21.5%	22.4%	
Total cost of sales	73.8%	79.0%	74.7%	77.2%	

The fluctuations in material costs and labor costs as a percentage of sales during the three and six months ended June 30, 2020 compared to the same periods in 2019 were primarily due to a shift in classification of certain outsourced manufacturing from labor costs to material costs in connection with the transition of our TRP business onto the new ERP system effective January 1, 2020. As such, material costs and labor costs should be viewed on a combined basis when comparing to the prior year period. In the aggregate, these variable costs decreased from 56.3% of revenue in the second quarter of

2019 to 53.9% of revenue in the second quarter of 2020 and from 54.8% in the first half of 2019 to 53.2% in the first half of 2020. These reductions were primarily due to a reduction in material costs and a more favorable exchange rate environment related to the Chinese Renminbi and Mexican Peso, which resulted in lower labor costs. This was partially offset by PRC government-mandated minimum wage increases in two of the regions where Bel's factories are located effective March 1, 2020 and May 1, 2020.

The other expenses noted in the table above include fixed cost items such as support labor and fringe, depreciation and amortization, and facility costs (rent, utilities, insurance). In total, these other expenses decreased during the three and six months ended June 30, 2020 by \$4.8 million and \$8.4 million, respectively, as compared to the same periods of 2019. These declines primarily related cost savings from restructuring measures and other operational cost reductions noted in the "Restructuring" section above. The costs during the first half of 2020 were also reduced by \$2.2 million related to subsidies received during the first quarter from the Chinese government to offset costs and inefficiencies incurred due to the temporary closures of our factories in China in connection with COVID-19.

19

Research and Development ("R&D") Expense:

R&D expense amounted to \$6.1 million and \$6.9 million for the three months ended June 30, 2020 and 2019, respectively, and \$12.2 million and \$14.0 million for the six months ended June 30, 2020 and 2019, respectively. The lower R&D expenses in 2020 as compared to the same periods 2019 is largely reflective of cost savings related to the realignment of our Power Solutions R&D implemented in 2019 and a more favorable foreign exchange rate environment in the 2020 periods as compared to the rates in effect during 2019.

Selling, General and Administrative Expense ("SG&A")

SG&A expenses were \$18.1 million, down \$1.2 million from the second quarter of 2019. Lower travel expenses of \$0.7 million, a reduction in ERP costs of \$0.4 million and savings from other cost containment efforts outweighed the \$1.9 million of incremental SG&A expenses associated with the recently-acquired CUI business. SG&A expense also included a gain on the cash surrender value of COLI policies of \$1.0 million in the second quarter of 2020 compared to a gain on these policies of \$0.2 million in the second quarter of 2019.

SG&A expenses were \$40.1 million, up \$1.7 million from the first half of 2019. A reduction in ERP costs of \$1.4 million, lower travel expenses of \$0.9 million and savings from other cost containment efforts partially offset the \$4.1 million of incremental SG&A expenses associated with the recently-acquired CUI business. SG&A expense also included a loss on the cash surrender value of COLI policies of \$0.4 million in the first half of 2020 compared to a gain on these policies of \$0.8 million in the first half of 2019.

Provision for Income Taxes

The Company's effective tax rate will fluctuate based on the geographic jurisdiction in which the pretax profits are earned. Of the geographic jurisdictions in which the Company operates, the U.S.'s and Europe's tax rates are generally equivalent; and Asia has the lowest tax rates of the Company's three geographical jurisdictions. See Note 10, "Income Taxes".

The provision for income taxes for the three months ended June 30, 2020 and 2019 was \$0.4 million. The Company's earnings before income taxes for the three months ended June 30, 2020, were approximately \$2.6 million higher than the same period in 2019, primarily attributable to an increase in the income from the Asia segment. The Company's effective tax rate was 7.1% and 12.4% for the three months ended June 30, 2020 and 2019, respectively. The change in the effective tax rate during the three months ended June 30, 2020 as compared to the same period in 2019, is primarily attributable to the impact of permanent differences on U.S. tax exempt activities. See Note 10, "Income Taxes."

The (benefit) provision for income taxes for the six months ended June 30, 2020 and 2019 was (\$0.3) million and \$0.5 million, respectively. The Company's earnings before income taxes for the six months ended June 30, 2020, were approximately \$3.1 million lower than the same period in 2019, primarily attributable to a decrease in the income from the North America and Europe segments. The Company's effective tax rate was (24.6%) and 10.1% for the six months ended June 30, 2020 and 2019, respectively. The change in the effective tax rate during the six months ended June 30, 2020 as compared to the same period in 2019, is primarily attributable to tax benefits relating to the reversal of valuation allowances and the federal tax law changes for the CARES Act, offset by the impact of permanent differences on U.S. tax exempt activities. See Note 10, "Income Taxes."

Liquidity and Capital Resources

Our primary sources of cash are the collection of trade receivables generated from the sales of our products and services to our customers and amounts available under our existing lines of credit, including our credit facility. Our primary uses of cash are payments for operating expenses, investments in working capital, capital expenditures, interest, taxes, dividends, debt obligations and other long-term liabilities. We believe that our current liquidity position and future cash flows from operations will enable us to fund our operations, including all of the items mentioned above in the next twelve months.

At June 30, 2020 and December 31, 2019, \$37.5 million and \$29.1 million, respectively (or 50% and 40%, respectively), of cash and cash equivalents was held by foreign subsidiaries of the Company. During the first six months of 2020, the Company repatriated \$5.0 million of funds from outside of the U.S., with minimal incremental tax liability. We continue to analyze our global working capital and cash requirements and the potential tax liabilities attributable to further repatriation, and we have yet to make any further determination regarding repatriation of funds from outside the U.S. to fund the Company's U.S. operations in the future. In the event these funds were needed for Bel's U.S. operations, the Company would be required to accrue and pay U.S. state taxes and any applicable foreign withholding taxes to repatriate these funds.

Cash and cash equivalents, marketable securities and accounts receivable comprised approximately 33.3% of the Company's total assets at June 30, 2020 and 31.6% of total assets at December 31, 2019. The Company's current ratio (i.e., the ratio of current assets to current liabilities) was 3.2 to 1 at June 30, 2020 and 3.1 to 1 at December 31, 2019.

In June 2014, the Company entered into a senior Credit and Security Agreement, which was subsequently amended in December 2014, March 2016, and further amended and refinanced in December 2017. The Credit and Security Agreement contains customary representations and warranties, covenants and events of default and financial covenants that measure (i) the ratio of the Company's total funded indebtedness, on a consolidated basis, to the amount of the Company's consolidated EBITDA, as defined ("Leverage Ratio"), and (ii) the ratio of the amount of the Company's consolidated EBITDA to the

Company's consolidated fixed charges ("Fixed Charge Coverage Ratio"). If an event of default occurs, the lenders under the Credit and Security Agreement would be entitled to take various actions, including the acceleration of amounts due thereunder and all actions permitted to be taken by a secured creditor. On February 18, 2020, the Company further amended its credit agreement whereby the Company voluntarily prepaid a portion of its term loan under the credit agreement in the amount of \$8.2 million. The amendment also served to modify the interest rate and fees applicable to the loans under the credit agreement and changes certain covenants related to matters including acquisitions, share repurchases and financial ratios.

20

The Company was in compliance with its debt covenants as of June 30, 2020, including its most restrictive covenant, the Fixed Charge Coverage Ratio. The unused credit available under the credit facility at June 30, 2020 was \$43.0 million, of which we had the ability to borrow \$44.8 million without violating our Leverage Ratio covenant based on the Company's existing consolidated EBITDA.

We are currently engaged in a multi-year process of conforming the majority of our operations onto one global Enterprise Resource Planning system ("ERP"). The ERP is designed to improve the efficiency of our supply chain and financial transaction processes, accurately maintain our books and records, and provide information important to the operation of the business to our management team. The implementation of the ERP is being conducted by business unit on a three-phase approach through early 2021. Since inception of the project, we have incurred costs in a cumulative amount of \$7.0 million in connection with this implementation, of which \$0.4 million and \$1.4 million was incurred in the second quarter and first half of 2019, respectively, with no additional costs incurred in the second quarter or first half of 2020. These costs are included in SG&A on the consolidated financial statements. The first phase of the ERP implementation project was completed in the first quarter of 2019 with the Power Solutions business going live on the new system effective January 1, 2019. The second phase of the project was completed in the first quarter of 2020 with the TRP business going live on the new system effective January 1, 2020. To date, we've achieved annual cost savings on ERP licensing fees of approximately \$2 million within SG&A expense which were largely realized starting in 2019. We anticipate completing this project with in-house resources by early 2021, with no further outside consulting costs. The preceding sentence represents a Forward-Looking Statement. See "Cautionary Notice Regarding Forward-Looking Information."

Cash Flows

Six Months Ended June 30, 2020

During the six months ended June 30, 2020, the Company's cash and cash equivalents increased by \$3.0 million. This increase was primarily due to the following:

- net cash provided by operating activities of \$16.8 million; partially offset by
- purchases of property, plant and equipment of \$3.0 million;
- dividend payments of \$1.6 million; and
- repayments of long-term debt of \$8.2 million.

During the six months ended June 30, 2020, accounts receivable increased by \$2.5 million primarily due to higher sales during the second quarter of 2020 as compared to the fourth quarter of 2019. Days sales outstanding (DSO) improved slightly to 59 days at June 30, 2020 as compared to 60 days at December 31, 2019. Inventory decreased by \$1.9 million at June 30, 2020 compared to December 31, 2019. Inventory turns were 3.6 at each June 30, 2020 and December 31, 2019.

Six Months Ended June 30, 2019

During the six months ended June 30, 2019, the Company's cash and cash equivalents increased by \$4.5 million. This increase was primarily due to the following:

- net cash provided by operating activities of \$7.8 million; and
- proceeds from the sale of property, plant and equipment of \$5.8 million; partially offset by
- purchases of property, plant and equipment of \$5.3 million;
- dividend payments of \$1.6 million; and
- repayments of long-term debt of \$1.5 million.

During the six months ended June 30, 2019, accounts receivable decreased by \$7.7 million primarily due to lower sales during the second quarter of 2019 as compared to the fourth quarter of 2018. Days sales outstanding (DSO) increased slightly to 60 days at June 30, 2019 from 59 days at December 31, 2018. Inventory decreased by \$1.8 million at June 30, 2019 compared to December 31, 2018. Inventory turns were 3.6 at June 30, 2019 as compared to 3.7 at December 31, 2018.

Critical Accounting Policies

Management's discussion and analysis of Bel's financial condition and results of operations are based upon the Company's condensed consolidated financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of these financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, the Company evaluates its estimates, including those related to product returns, bad debts, inventories, goodwill, intangible assets, investments, warranties, SERP expense, income taxes and contingencies and litigation. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Recent Accounting Pronouncements

The discussion of new financial accounting standards applicable to the Company is incorporated herein by reference to Note 1 to the Company's Financial Statements, "Basis of Presentation and Accounting Policies," included in Part I, Item 1 of this Quarterly Report on Form 10-Q.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company is exposed to market risk primarily from changes in foreign currency exchange rates and changes in interest rates associated with its long-term debt. During the first six months of 2020, the U.S. Dollar was stronger against most other currencies in which the Company pays its expenses. In comparing average exchange rates during the first six months of 2020 versus those during the same period of 2019, the Euro depreciated by 2%, the Pound depreciated by 2%, the Peso depreciated by 11% and the Renminbi depreciated by 3% against the U.S. Dollar. The Company estimates that the depreciation in these foreign currencies led to lower operating costs of \$1.6 million during the first half of 2020 as compared to the same period of 2019, as the majority of the Company's expenses in the PRC, Europe and Mexico are paid in local currency. Foreign exchange losses were also recognized in the first six months of 2020 of less than \$0.1 million on translation of local currency balance sheet accounts to the U.S. Dollar in consolidation, resulting from foreign currency fluctuations since December 31, 2019. During the second quarter of 2020, the Company entered into forward contracts to secure a favorable exchange rate related to the Peso through December 31, 2020 for a portion of Bel's expected Peso obligations for the remainder of the year. The Company monitors changes in foreign currencies and may implement further pricing actions to help mitigate the impact that changes in foreign currencies may have on its consolidated operating results. Refer to Item 7A, "Management's Discussion and Analysis of Financial Condition and Results of Operations," in the Company's Annual Report on Form 10-K for the year ended December 31, 2019 for further discussion of market risks.

Item 4. Controls and Procedures

<u>Disclosure controls and procedures</u>: As of the end of the period covered by this report, the Company carried out an evaluation, with the participation of the Company's management, including the Company's Chief Executive Officer and Vice President of Finance, of the effectiveness of the Company's disclosure controls and procedures pursuant to Securities Exchange Act Rule 13a-15. Based on that evaluation, the Company's Chief Executive Officer and Vice President of Finance concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report.

<u>Changes in internal controls over financial reporting</u>: There were no significant changes in the Company's internal controls over financial reporting that occurred during the Company's last fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. Other Information

Item 1. Legal Proceedings

The information called for by this Item is incorporated herein by reference to Note 13, "Commitments and Contingencies" of the Company's Condensed Consolidated Financial Statements, under "Legal Proceedings", as set forth in Part I, Item 1 of this Quarterly Report on Form 10-Q. We are also involved in various other legal actions incidental to our business. We believe, after consulting with counsel, that the disposition of these other legal proceedings and matters will not have a material effect on our condensed consolidated financial condition or results of operations.

Item 1A. Risk Factors

The risks described below, in addition to those described in Part I, Item 1A, "Risk Factors," of our Annual Report on Form 10-K for the fiscal year ended December 31, 2019, should be carefully considered before making an investment decision. These are the risk factors that we consider to be the most significant risk factors, but they are not the only risk factors that should be considered in making an investment decision. This Form 10-Q also contains Forward-Looking Statements that involve risks and uncertainties. See the "Cautionary Notice Regarding Forward-Looking Information," above. Our business, consolidated financial condition and consolidated results of operations could be materially adversely affected by any of the risk factors described, under "Cautionary Notice Regarding Forward-Looking Information" or with respect to specific Forward-Looking Statements presented herein. The trading price of our securities could decline due to any of these risks, and investors in our securities may lose all or part of their investment. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may also materially adversely affect our business in the future. Except as required by the federal securities law, we undertake no obligation to update or revise any risk factor, whether as a result of new information, future events or otherwise.

22

Our global operations and demand for our products face risks related to health epidemics such as the coronavirus.

Any outbreaks of contagious diseases and other adverse public health developments in countries where we operate could have a material and adverse effect on our business, consolidated financial condition and consolidated results of operations. In January 2020, the outbreak of COVID-19 was first identified and had an unfavorable impact on our four largest manufacturing facilities, which are located in China, throughout the first quarter of 2020. Travel restrictions imposed by the local governmental authorities to control the spread of the virus resulted in an extended closure of our facilities in China over the Lunar New Year holiday, with the return of workers delayed after the holiday break. By March 9, 2020, our overall worker return rate at our China facilities was approximately 85%. Our suppliers, customers and our customers' contract manufacturers have been similarly impacted, and many are also currently operating at less than full capacity. Throughout the second quarter of 2020, many of the jurisdictions in which we operate within North America and Europe had mandated shelter-in-place orders, with the exception of essential businesses. As of the filing date of this Quarterly Report, all of the Company's manufacturing sites were open, with certain locations at reduced workforce levels due to local government mandates. As the status of the COVID-19 outbreak continues to be uncertain particularly in the U.S. and Europe, additional Bel facilities could become negatively impacted. In addition, COVID-19 has adversely affect the economies and financial markets of many countries, resulting in an economic downturn that has affected demand for certain of our end customers' products. The extent to which COVID-19 will impact our business and our consolidated financial results will depend on future developments which are highly uncertain and cannot be predicted at the time of the filing of this Quarterly Report on Form 10-Q.

Our high level of indebtedness could negatively impact our access to the capital markets and our ability to satisfy financial covenants under our existing credit agreement.

We incurred substantial amounts of indebtedness to fund the acquisitions of Power Solutions and Connectivity Solutions in 2014, and CUI in December 2019, and we may need to incur additional indebtedness to finance operations or for other general corporate purposes in the future. Our consolidated principal amount of outstanding indebtedness was \$136.8 million at June 30, 2020, resulting in a leverage ratio of 3.45x adjusted EBITDA, as calculated in accordance with our credit agreement (as compared to the maximum leverage ratio of 5.00x as noted in our amended credit agreement). As of June 30, 2020, our fixed charge coverage ratio was 1.50x, as calculated in accordance with our credit agreement (as compared to the minimum fixed charge coverage ratio of 1.05x). Pursuant to the terms of our amended credit agreement, the leverage ratio will step down to 4.75x effective September 30, 2020, to 4.00x effective December 31, 2020 and to 3.00x effective June 30, 2021 and thereafter. The fixed charge coverage ratio will step up to 1.10x effective September 30, 2020, to 1.15x effective December 31, 2020 and to 1.25x effective March 31, 2021 and thereafter. Our U.S. debt service requirements are significant in relation to our U.S. revenue and cash flow. This leverage exposes us to risk in the event of downturns in our business, in our industry or in the economy generally, and may impair our operating flexibility and our ability to compete effectively. Our current credit agreement requires us to maintain certain covenant ratios, and as noted, the ratios become more restrictive at specific dates during the term. If we do not continue to satisfy these required ratios or receive waivers from our lenders, we will be in default under the credit agreement, which could result in an accelerated maturity of our debt obligations. We cannot assure investors that we will be able to access private or public debt or equity on satisfactory terms, or at all. Any equity financing that could be arranged may dilute existing shareholders and any

CERTIFICATION

- I, Daniel Bernstein, certify that:
- 1. I have reviewed this quarterly report on Form 10-Q of Bel Fuse Inc.;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
