

Bel Reports Second Quarter Net Earnings of \$4.7 Million Versus a Loss of \$1.3 Million as Net Sales Increased 73%

JERSEY CITY, N.J., Jul 30, 2010 (BUSINESS WIRE) -- **Bel Fuse Inc. (NASDAQ:BELFA)(NASDAQ:BELFB)** today announced preliminary unaudited financial results for the second quarter of 2010, highlighted by a 73% increase in net sales and an increase in net earnings to \$4.7 million compared to a net loss of \$1.3 million for the second quarter of 2009.

Daniel Bernstein, Bel's President and CEO, said, "We experienced solid growth in all of our product groups driven by strong demand from high-end telecom, computing and network applications. Robust business conditions currently appear likely to continue for the balance of the year. Substantial gains in gross margins are primarily the result of the improved productivity of our new associates in China. So far this year we have added approximately 2,483 new workers at our China facilities, which has allowed us to shorten our leadtimes.

"Cinch's well-established lines of connectors and cable products represented 45% of the increase in sales and are a natural addition to Bel's traditional product menu. And its extensive customer base has opened key aerospace and military markets to Bel for the first time, while creating new opportunities for long-term growth."

(1) The non-GAAP measures presented above are not measures of performance under accounting principles generally accepted in the United States of America ("GAAP"). These measures should not be considered a substitute for, and the reader should also consider, income from operations, net earnings, earnings per share and other measures of performance as defined by GAAP as indicators of our performance or profitability. Our non-GAAP measures may not be comparable to other similarly-titled captions of other companies due to differences in the method of calculation.

Based upon discussions with investors and analysts, we believe that the reader's understanding of Bel's performance and profitability is enhanced by reference to these non-GAAP measures. Removal of gains and losses on investments and sales of real estate and charges for severance, plant closure, restructuring, and unauthorized stock issuance costs, inventory-related purchase accounting adjustments and acquisition-related costs facilitates comparisons of our results among reporting periods. We believe that such amounts are not reflective of the underlying business in the period in which the gain or charge is recorded for accounting purposes.

(2) Net of income tax at effective rate in the applicable tax jurisdiction.

(3) Individual amounts of earnings (loss) per share may not agree to the total due to rounding.
