POWER | PROTECT | CONNECT

2020 ANNUAL REPORT

COMPANY PROFILE

Founded in 1949, Bel designs, manufactures and markets a broad array of products that power, protect and connect electronic circuits. These products are primarily used in the military, aerospace, networking, telecommunications, computing, transportation and broadcasting industries. Bel's portfolio of products also finds applications in the automotive, medical and consumer electronics markets.

With over 70 years in operation, Bel's legacy of innovation continues to drive success in a diversity of markets.

Bel has consistently proven itself a valuable supplier to world-class companies by developing new products with cost-effective solutions.

FINANCIAL HIGHLIGHTS

2019	2020

- Increased automation at factories
- Margin expansion driven by improved product line efficiencies

TO OUR SHAREHOLDERS:

Daniel Bernstein
President and
Chief Executive Officer

2020—A YEAR OF PERSEVERANCE

Our focus during much of the year has been on the continued safety and well-being of our associates around the world in light of COVID-19. The majority of the products manufactured by Bel are utilized in military, medical and networking applications, and are therefore deemed essential by the various jurisdictions in which we operate. We quickly implemented significant protective measures throughout our facilities as we continued to service our customers. While this remains a fluid situation that evolves daily, we are starting to see a light at the end of the tunnel with the introductions of vaccines. With the constant diligence to safety from our global associate base, we've been able to maintain the continuity of our operations and servicing our customers during this challenging time. This year's cover is a tribute to all of Bel's associates around the world who work day-to-day under difficult conditions. It is with sincere appreciation that we thank each of our associates for their courage and dedication to our Company and our customers throughout 2020.

CINCH CONNECTIVITY SOLUTIONS

The Cinch Connectivity Solutions team was heavily focused on profitability improvement in 2020. With sales volume impacted by lower demand from our commercial aerospace customers, the factories quickly pivoted to addressing our growing backlog for military orders, resulting in a 38% increase in military sales in 2020. At the same time, our overhead costs were reassessed and realigned in light of the shift in production needs. The CCS Business Development team also pursued opportunities in markets in which we historically have not participated, including space applications, hypersonic missiles, robotics, quantum computing, and commercial and defense unmanned aerial vehicles.

The Cinch Connectivity Solutions group anticipates continued strength in military shipments in 2021, coupled with further gains in sales through our distribution channels. As global travel gradually resumes throughout 2021, we are looking forward to the related rebound in sales into our commercial aerospace end market.

POWER SOLUTIONS & PROTECTION

Bel's Power Solutions & Protection group spent much of the year analyzing the health of its products from a profitability perspective. Many difficult decisions were made ranging from the elimination of low-margin products, consolidation of production lines and in some cases, facility closures. This led to improved profitability for the group on lower sales in 2020. This group also benefited from a full year of results related to CUI, which was acquired in December 2019. CUI had a record sales year as their products support work-from-home applications, which increased substantially in the COVID environment.

We also achieved large percentage revenue increases in circuit protection and e-Mobility as new products and customers were added throughout the year. We have over 200 NDA's signed with e-Mobility customers, and 2020 marked the third consecutive year of annual growth rates in excess of 20%. We believe e-Mobility has the potential for significant growth in future years as some of the prototype applications move into mass production.

MAGNETIC SOLUTIONS

Recent product introductions from our Magnetic Solutions group addressed the increasing demands for higher speed capabilities and a smaller product footprint, especially within the 5G cellular equipment market. In addition to new product developments, the Magnetic Solutions team focused on improving process efficiencies through automation and streamlining overhead costs during 2020. Uncertainty within the industry around COVID-related impacts led to a slower year for this group as compared to historical levels. The Magnetics Solution team utilized the downtime to improve upon production efficiencies through automation of its toroid winding process, which was previously a labor-intensive process. Further efforts were made on streamlining overhead costs, which should bode well for the profitability of this group as demand recovers.

2021 OUTLOOK

In January 2021, Bel announced two acquisitions that are strategic to our future growth plans. The acquisition of rms Connectors enabled us to increase our market share within the commercial aerospace end market. The acquisition of EOS Power, expected to close late in the first quarter, will broaden Bel's power product portfolio with industrial and medical products. Importantly, this acquisition will extend our manufacturing footprint outside of China with a turnkey operation and will provide access to the fast-growing India market for all of Bel's products. These two acquisitions fit squarely into Bel's growth strategy by increasing market share while diversifying our product portfolios and geographic footprint.

While we are cautiously optimistic on the revenue front for 2021, we do see some challenges on the cost side. Minimum wage increases in Mexico, the PRC and Slovakia and supply constraints related to certain of our purchased components are anticipated to drive costs higher this year. Our management team will continue to review our product portfolio to ensure our resources are focused on areas that can drive profitability and other actions to help mitigate these types of cost increases.

As we close out a volatile year, we would again like to recognize the hard work and dedication of our associates around the world. This year, I would like to specifically acknowledge Craig Brosious, our Vice President of Finance, who will be retiring in September 2021. Craig joined Bel 18 years ago when he came onboard through our acquisition of Stewart Connector. Over the years, he has brought a vast amount of operational finance experience to the management team and has been an instrumental part in managing our global finances and integrating the 12 completed acquisitions since he joined Bel. We truly appreciate the dedication, professionalism and work ethic that he displayed each day, and he will be missed.

Craig Brosious

Sincerely,

Daniel Bernstein

*President and
Chief Executive Officer*

CAUTIONARY NOTICE REGARDING FORWARD-LOOKING INFORMATION

The terms the "Company," "Bel," "we," "us," and "our" as used in this Annual Report on Form 10-K ("Form 10-K") refer to Bel Fuse Inc. and its consolidated subsidiaries unless otherwise specified.

The Company's consolidated operating results are affected by a wide variety of factors that could materially and adversely affect revenues and profitability, including the risk factors described in Item 1A of this Form 10-K. As a result of these and other factors, the Company may experience material fluctuations in future operating results on a quarterly or annual basis, which could materially and adversely affect its business, consolidated financial condition, operating results, and common stock prices. Furthermore, this document and other documents filed by the Company with the Securities and Exchange Commission ("SEC") contain certain forward-looking statements under the Private Securities Litigation Reform Act of 1995 ("Forward-Looking Statements") with respect to the business of the Company. Forward-Looking Statements are necessarily subject to risks and uncertainties, many of which are outside our control, that could cause actual results to differ materially from these statements. Forward-Looking Statements can be identified by such words as "anticipates," "believes," "plan," "assumes," "could," "should," "estimates," "expects," "intends," "potential," "seek," "predict," "may," "will" and similar references to future periods. All statements other than statements of historical facts included in this report regarding our strategies, prospects, financial condition, operations, costs, plans and objectives and regarding the anticipated impact of COVID-19 are Forward-Looking Statements. These Forward-Looking Statements are subject to certain risks and uncertainties, including those detailed in Item 1A. of this Form 10-K, which could cause actual results to differ materially from these Forward-Looking Statements. The Company undertakes no obligation to publicly release the results of any revisions to these Forward-Looking Statements which may be necessary to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Any Forward-Looking Statement made by the Company is based only on information currently available to us and speaks only as of the date on which it is made.

PART I

Item 1. *Business*

Bel Fuse Inc. designs, manufactures and markets a broad array of products that power, protect and connect electronic circuits. These products are primarily used in the networking, telecommunications, computing, military, aerospace, transportation and broadcasting industries. Bel's portfolio of products also finds application in the automotive, medical and consumer electronics markets.

With more than 70 years in operation, Bel has reliably demonstrated the ability to succeed in a variety of product areas across a global platform. The Company has a strong track record of technical innovation working with the engineering teams of market leaders. Bel has consistently proven itself a valuable supplier to world-class companies by developing new products with cost effective solutions.

The Company is organized under New Jersey law. Bel's principal executive offices are located at 206 Van Vorst Street, Jersey City, New Jersey 07302, and Bel's telephone number is (201) 432-0463. The Company operates facilities in North America, Europe and Asia and trades on the NASDAQ Global Select Market (ticker symbols BELFA and BELFB). For information regarding Bel's operating segments, see Note 12, "Segments", of the notes to our consolidated financial statements. Hereinafter, all references to "Note" will refer to the notes to our consolidated financial statements included in Part II, Item 8. "Financial Statements and Supplementary Data" of this Annual Report on Form 10-K.

Acquisitions have played a critical role in the growth of Bel and the expansion of both our product portfolio and our customer base and continue to be a key element in our growth strategy. The Company may, from time to time, purchase equity positions in companies that are potential merger candidates. We frequently evaluate possible merger candidates that would provide such potential benefits as an expanded product and technology base that would allow us to expand the breadth of our product offerings to our strategic customers and/or provide an opportunity to reduce overall operating expense as a percentage of revenue. Other factors such as whether such possible merger candidates are positioned to take advantage of our lower cost offshore manufacturing facilities, and whether a cultural fit would allow the acquired company to be integrated smoothly and efficiently are also considered.

On December 3, 2019, we completed the acquisition of the majority of the power supply products business of CUI Inc. (the "CUI power business") through an asset purchase agreement with CUI Global Inc. for \$29.2 million (after a working capital adjustment), plus the assumption of certain liabilities. The CUI power business designs and markets a broad portfolio of AC/DC and DC/DC power supplies and board level components. The CUI power business is headquartered in Tualatin, Oregon and contributed sales of \$43.1 million for 2020 and \$2.2 million for 2019. The acquisition of the CUI power business enhanced Bel's existing offering of power products, allowing us to better address more of our customers' power needs. It also introduced an alternative business model to Bel's, one which carries a higher gross margin profile and lower manufacturing risk.

Products

The Company primarily generates revenue through the sale of its products. Bel offers a broad array of product offerings, which are grouped as follows: Power Solutions & Protection (39% of net sales in 2020), Cinch Connectivity Solutions (32% of net sales in 2020) and Magnetic Solutions (29% of net sales in 2020). While there are key customers and end markets within each of the three product groups, only one direct customer accounted for more than 10% of our consolidated net sales in 2020 (this customer represented 11.9% of our consolidated net sales in 2020). Our diverse product mix and customer base minimizes our dependence on any one customer or end market.

Power Solutions and Protection

Bel's power conversion products include internal and external AC/DC power supplies, DC/DC converters and DC/AC inverters. These products provide power conversion solutions for a number of Industrial, Networking and Consumer applications. Bel circuit protection products include board level fuses (miniature, micro and surface mount), and Polymeric PTC (Positive Temperature Coefficient) devices, designed for the global electronic and telecommunication markets.

	Product Line	Function	Applications	Brands Sold Under
Power Solutions and Protection	Front-End Power Supplies	Provides the primary point of isolation between AC main line (input) and the low-voltage DC output that is used to power all electronics downstream	Servers, telecommunication, network and data storage equipment	Bel Power Solutions
	Board-Mount Power Products	These are designed to be mounted on a circuit board. These converters take input voltage and provide localized on-board power to low-voltage electronics.	Telecommunication, networking and a broad range of industrial applications	Bel Power Solutions, MelcherTM, CUI
	Industrial Power Products	Converts between AC main line inputs and a wide variety of DC output voltages.	Rail, transportation, automation, test and measurement, medical, military and aerospace applications.	Bel Power Solutions, MelcherTM, CUI
	External Power Products	Standard and customizable desktop and wall plug adapters that convert AC main input voltages to a variety of DC output voltages.	Consumer and industrial devices and equipment	CUI
	Module Products	Condition, filter, and isolate the electronic signal to ensure accurate data/voice/video transmission within a highly integrated, reduced footprint.	Broadband telecommunications, IoT, Smart Grid and Smart Lighting communication and power solutions for industrial and commercial applications.	Bel
	Circuit Protection	Protects devices by preventing current in an electrical circuit from exceeding acceptable levels.	Power supplies, cell phone chargers, consumer electronics, and battery protection.	Bel

Connectivity Solutions

Bel offers a comprehensive line of high speed and harsh environment copper and optical fiber connectors and integrated assemblies, which provide connectivity for a wide range of applications across multiple industries including commercial aerospace, military communications, network infrastructure, structured building cabling and several industrial applications.

	Product Line	Function	Applications	Brands Sold Under
Connectivity Solutions	Expanded Beam Fiber Optic Connectors, Cable Assemblies and Active Optical Devices (transceivers and media converters)	Harsh-environment, high-reliability, flight-grade optical connectivity for high-speed communications.	Military/aerospace, oil and gas well monitoring and exploration, broadcast, communications, RADAR	Stratos®, Fibreco®
	Copper-based Connectors / Cable Assemblies-FQIS	Harsh-environment, high-reliability connectivity and fuel quantity monitoring (FQIS).	Avionics, smart munitions, communications, radar and various industrial equipment	Cinch®
	RF Connectors, Cable Assemblies, Microwave Devices and Low Loss Cable	Connectors and cable assemblies designed to provide connectivity within radio frequency (RF) applications.	Military/aerospace, test and measurement, high-frequency and wireless communications	Johnson, Trompeter, Midwest Microwave™, Semflex®
	RJ and USB Connectors and Cable Assemblies	RJ45, RJ11 and USB connectivity for data/voice/video transmission.	Largely Ethernet applications including network routers, hubs, switches, and patch panels; and emerging internet-of-things (IoT) applications	Stewart Connector

Magnetic Solutions

Bel's Magnetics offers industry leading products. The Company's ICM products integrate RJ45 connectors with discrete magnetic components to provide a more robust part that allows customers to substantially reduce board space and inventory requirements. Power Transformers include standard and custom designs for use in industrial instrumentation, alarm and security systems, motion control, elevators, and medical products.

	Product Line	Function	Applications	Brands Sold Under
Magnetic Solutions	Integrated Connector Modules (ICMs)	Condition, filter, and isolate the electronic signal to ensure accurate data/voice/video transmission and provide RJ45 and USB connectivity.	Network switches, routers, hubs, and PCs used in multi-speed Gigabit Ethernet, Power over Ethernet (PoE), PoE Plus and home networking applications.	Bel, TRP Connector®, MagJack®
	Power Transformers	Safety isolation and distribution.	Power supplies, alarm, fire detection, and security systems, HVAC, lighting and medical equipment. Class 2, three phase, chassis mount, and PC mount designs available.	Signal
	SMD Power Inductors & SMPS Transformers	A passive component that stores energy in a magnetic field. Widely used in analog electronic circuitry.	Switchmode power supplies, DC/DC converters, LED lighting, automotive and consumer electronics.	Signal
	Discrete Components-Telecom	Condition, filter, and isolate the electronic signal to ensure accurate data/voice/video transmission.	Network switches, routers, hubs, and PCs used in multi-speed Gigabit Ethernet and Power over Ethernet (PoE).	Bel

Sales and Marketing

We sell our products to customers throughout North America, Europe and Asia. Sales are made through one of three channels: direct strategic account managers, regional sales managers working with independent sales representative organizations or authorized distributors. Bel's strategic account managers are assigned to handle major accounts requiring global coordination.

Independent sales representatives and authorized distributors are overseen by the Company's sales management personnel located throughout the world. As of December 31, 2020, we had a sales and support staff of 196 persons that supported a network of sales representative organizations and non-exclusive distributors. We have written agreements with all of our sales representative organizations and most of our major distributors. These written agreements, terminable on short notice by either party, are standard in the industry.

Sales support functions have also been established and located in our international facilities to provide timely, efficient support for customers. This supplemental level of service, in addition to first-line sales support, enables us to be more responsive to customers' needs on a global level. Our marketing capabilities include product management which drives new product development, application engineering for technical support and marketing communications.

Market Factors

Competition

We operate in a variety of markets, all of which are highly competitive. There are numerous independent companies and divisions of major companies that manufacture products that are competitive with one or more of our products.

Our ability to compete is dependent upon several factors including product performance, quality, reliability, depth of product line, customer service, technological innovation, design, delivery time and price. Overall financial stability and global presence also give us a favorable position in relation to many of our competitors. Management intends to maintain a strong competitive posture in the markets we serve by continued expansion of our product lines and ongoing investment in research, development and manufacturing resources. The preceding sentence represents a Forward-Looking Statement. See "Cautionary Notice Regarding Forward-Looking Information."

Trends in Market Demand

Product orders, or bookings, received during 2020 amounted to \$448.8 million, a 3% reduction from 2019. By product group, orders received for our Power Solutions and Protection products amounted to \$183.0 million in 2020, a 30% increase from 2019. A large portion of this increase was due to incremental bookings from the recently-acquired CUI business of \$43.4 million. The CUI business had historically strong sales in 2020 as demand for adaptors for use in home offices increased significantly due to the COVID-19 pandemic. We have also seen an increase in demand for our circuit protection products in 2020, and within the e-mobility and industrial markets for our power products. Bookings for our Connectivity Solutions products declined by 29% from 2019 to \$126.9 million in 2020, largely due to a reduction in demand from our direct and aftermarket commercial aerospace customers due to low levels of new aircraft production rates and the continued pause in global travel during the ongoing COVID-19 pandemic. Orders received for our Magnetic Solutions products were \$138.9 million in 2020, 3% lower than in 2019.

Backlog of Orders

We typically manufacture products against firm orders and projected usage by customers. Cancellation and return arrangements are either negotiated by us on a transactional basis or contractually determined. We estimate the value of the backlog of orders as of February 28, 2021 to be approximately \$179.6 million as compared with a backlog of \$186.3 million as of February 29, 2020. Management estimates that approximately 85%-90% of the Company's backlog as of February 28, 2021 will be shipped by December 31, 2021. Factors that could cause the Company to fail to ship all such orders by year-end include unanticipated supply difficulties, changes in customer demand and new customer designs. Due to these factors, backlog may not be a reliable indicator of the timing of future sales.

Research and Development ("R&D")

Our engineering groups are strategically located around the world to facilitate communication with and access to customers' engineering personnel. This collaborative approach enables partnerships with customers for technical development efforts. The global capabilities and collaborative approach allows Bel to develop leading edge technological products that support highly complex and evolving markets such as e-mobility, cloud computing, military, aerospace, and others. On occasion, we execute non-disclosure agreements with customers to help develop proprietary, next generation products destined for rapid deployment. We also sponsor membership in technical organizations that allow our engineers to participate in developing standards for emerging technologies. It is management's opinion that this participation is critical in establishing credibility and a reputable level of expertise in the marketplace, as well as positioning the Company as an industry leader in new product development.

R&D costs are expensed as incurred. Generally, R&D is performed internally for the benefit of the Company. R&D costs include salaries, building maintenance and utilities, rents, materials, administrative costs and miscellaneous other items.

Resources

Raw Materials and Sourcing

We have multiple suppliers for most of the raw materials that we purchase. Where possible, we have contractual agreements with suppliers to assure a continuing supply of critical components.

With respect to those items which are purchased from single sources, we believe that comparable items would be available in the event that there were a termination of our existing business relationships with any such supplier. While such a termination could produce a disruption in production, we believe that the termination of business with any one of our suppliers would not have a material adverse effect on our long-term operations. Actual experience could differ materially from this belief as a result of a number of factors, including the time required to locate an alternative supplier, and the nature of the demand for our products. In the past, we have experienced shortages in certain raw materials, such as capacitors, ferrites and integrated circuits ("IC's"), when these materials were in great demand. Even though we may have more than one supplier for certain materials, it is possible that these materials may not be available to us in sufficient quantities or at the times desired by us. In the event that the current economic conditions have a negative impact on the financial condition of our suppliers, this may impact the availability and cost of our raw materials.

Intellectual Property

We have acquired or been granted a number of patents in the U.S., Europe and Asia and have additional patent applications pending relating to our products. While we believe that the issued patents are defendable and that the pending patent applications relate to patentable inventions, there can be no assurance that a patent will be obtained from the applications or that our existing patents can be successfully defended. It is management's opinion that the successful continuation and operation of our business does not depend upon the ownership of patents or the granting of pending patent applications, but upon the innovative skills, technical competence and marketing and managerial abilities of our personnel. Our U.S. design patents have a life of 14 years and our U.S. utility patents have a life of 17 years from the date of issue or 20 years from filing of patent applications. Our existing patents expire on various dates from March 2021 to January 2039.

We utilize registered trademarks in the U.S., Europe and Asia to identify various products that we manufacture. The trademarks survive as long as they are in use and the registrations of these trademarks are renewed.

Government Contracts

We must comply with and are affected by laws and regulations relating to the award, administration, and performance of U.S. Government contracts. Government contract laws and regulations affect how we do business with our customers and, in some instances, impose added costs on our business. A violation of specific laws and regulations could result in the imposition of fines and penalties or the termination of our contracts or debarment from bidding on contracts. These fines and penalties could be imposed for failing to follow procurement integrity and bidding rules, employing improper billing practices or otherwise failing to follow cost accounting standards, receiving or paying kickbacks, or filing false claims. We have been, and expect to continue to be, subjected to audits and investigations by government agencies. The failure to comply with the terms of our government contracts could harm our business reputation. It could also result in our progress payments being withheld.

In some instances, these laws and regulations impose terms or rights that are more favorable to the government than those typically available to commercial parties in negotiated transactions. For example, the U.S. Government may terminate any of our government contracts and, in general, subcontracts, at its convenience as well as for default based on performance. Upon termination for convenience of a fixed-price type contract, we normally are entitled to receive the purchase price for delivered items, reimbursement for allowable costs for work-in-process, and an allowance for profit on work actually completed on the contract or adjustment for loss if completion of performance would have resulted in a loss. Upon termination for convenience of a Federal Government cost reimbursement contract, we normally are entitled to reimbursement of allowable costs plus a portion of the fee. Such allowable costs would normally include our cost to terminate agreements with our suppliers and subcontractors. The amount of the fee recovered, if any, is related to the portion of the work accomplished prior to termination and is determined by negotiation.

Seasonality

In the People's Republic of China ("PRC"), the availability of labor is cyclical and is significantly affected by the migration of workers in relation to the annual Lunar New Year holiday. Each year following the Lunar New Year holiday, we must assess the worker return rate and whether it is adequate to meet the needs of current demand from our customers. Accordingly, we must continually recruit and train new workers to replace those lost to attrition each year and to address peaks in demand that may occur from time to time. This temporary setback in production has historically resulted in our first quarter sales being the lowest sales quarter of the year. Further, recruiting and training efforts and related inefficiencies, as well as overtime required in order to meet demand, can add volatility to the costs incurred by the Company for labor in the PRC, primarily during the first quarter of the year.

Government Regulations

The Company is subject to various government regulations in the United States as well as various jurisdictions where it operates. These regulations cover several diverse areas including trade compliance, anti-bribery, anti-corruption, money laundering, and data and privacy protection. Regulatory or government authorities where the Company operates may have enforcement powers that can subject the company to legal penalties or other measures and can impose changes or conditions in the way it conducts business.

Human Capital Resources, Strategy and Management

At Bel, our values guide everything we do. We are committed to the highest standards of ethical and legal conduct and have created an environment where open and honest communication is the expectation, not the exception. Failing to do so puts Bel's name, reputation for integrity and business at risk. We hold our associates to this standard and offer the same in return. Our Code of Ethics was created to ensure that our associates, officers, directors, partners, contractors, and suppliers follow our commitment to customer satisfaction in accordance with ethical and legal standards, guided by the basic, unchanging principle of integrity.

Our Human Capital Strategy is built around four areas:

Extraordinary Performance

Our associates are a critical driver of Bel's global business results. On December 31, 2020, Bel employed approximately 6,400 associates across 14 countries, with 23 percent located within North America. Outside of the United States, our largest employee populations were located within Mexico, Slovakia and the PRC. We regularly monitor various key performance indicators around the key human capital priorities of attracting, retaining, and engaging our global talent. In addition, we enable the execution of our strategic priorities by providing all associates with access to training and development opportunities to improve critical skill sets.

Great Associates

Bel is committed to fostering an environment that respects and encourages individual differences, diversity of thought, and talent. We strive to create a workplace where associates feel that their contributions are welcomed and valued, allowing them to fully engage their talents and training in their work, while generating personal satisfaction in their role within Bel. Bel has been engaged in a strategy dedicated to evolving our inclusive culture while addressing underrepresentation across our Company.

Across the organization, there are a variety of ways we invest in our people to learn - on the job, in the classroom, through self-directed learning, or through leadership programs. We have expanded our learning management system to make new content and training available to our associates. The Company has also expanded leadership development programs and continues to expand internship programs to continue to develop new talent. These programs are key to our future as we identify associates for succession planning for leadership opportunities, acquisitions, and other large-scale projects.

Health and Safety

Bel offers a variety of programs globally to protect the health and safety of our associates. While we maintain targets for year-over-year reduction of the total recordable incident rate and serious injuries, our goal is always zero.

In 2020, we focused on the immediate demands within the context of COVID-19 challenges. Where possible, associates were moved to a remote work environment. In addition, we implemented additional safeguards in our plants consistent with the guidelines provided by the Centers for Disease Control and Prevention (CDC) and other health organizations around the world. In addition, the Company also invested in various programs globally to support associates' mental and physical health during the pandemic. We will continue to evolve these programs to protect the health and safety of our associates through awareness training and wellness programs.

Culture

In an increasingly competitive global marketplace, Bel succeeds when we attract and retain the best talent and when our associates reflect the diversity of our consumers.

We are committed to increasing the diversity of our workforce by participating in networking and community events and to actively recruit and hire veterans, women, minorities, and individuals with disabilities.

As a global leader in delivering reliable solutions, Bel has signed a Statement of Support Program declaration to show support for National Guard and Reserve member associates coordinated by the Department of Defense's Employer Support of the Guard and Reserve (ESGR) program. The intent of the program is to increase employer support by encouraging employers to act as advocates for associate participation in the military.

The employee lifecycle is the foundation for the mission of the Human Resources function within the Company. The Mission of Human Resources is to "Recruit, Train and Retain the best people. Create an environment where associates make a difference. Provide challenging work, a positive work environment and career opportunities." The global Human Resources team members are strategically placed, primarily in manufacturing facilities, to provide support to all our associates. The team has adapted their communications strategy and are utilizing the electronic tools available to meet with associates in a safe environment, but also is available for appropriately distanced in-person sessions as required.

We take pride in recognizing our associates around the world and the job well done over the last year.

Available Information

We maintain a website at www.belfuse.com where we make available the proxy statements, press releases, registration statements and reports on Forms 3, 4, 8-K, 10-K and 10-Q that we (and in the case of Section 16 reports, our insiders) file with the SEC. These forms are made available as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC. Press releases are also issued via electronic transmission to provide access to our financial and product news, and we provide notification of and access to voice and internet broadcasts of our quarterly and annual results. Our website also includes investor presentations and corporate governance materials.

Item 1A. Risk Factors

The risks described below should be carefully considered before making an investment decision. These are the risk factors that we consider to be material, but they are not the only risk factors that should be considered in making an investment decision. This Form 10-K also contains Forward-Looking Statements that involve risks and uncertainties. See the "Cautionary Notice Regarding Forward-Looking Information," above. Our business, consolidated financial condition and consolidated results of operations could be materially adversely affected by any of the risk factors described below, under "Cautionary Notice Regarding Forward-Looking Information" or with respect to specific Forward-Looking Statements presented herein. The trading price of our securities could decline due to any of these risks, and investors in our securities may lose all or part of their investment. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may also materially adversely affect our business in the future.

STRATEGIC RISKS

We conduct business in a highly competitive industry.

Our business is largely in a highly competitive worldwide industry, with relatively low barriers to competitive entry. We compete principally on the basis of product performance, quality, reliability, depth of product line, customer service, technological innovation, design, delivery time and price. The industry in which we operate has become increasingly concentrated and globalized in recent

years and our major competitors, some of which are larger than Bel, have significant financial resources and technological capabilities.

Our intellectual property rights may not be adequately protected under the current state of the law.

Our efforts to protect our intellectual property rights through patent, copyright, trademark and trade secret laws in the United States and in other countries may not prevent misappropriation, and our failure or inability to protect our proprietary rights could materially adversely affect our business, financial condition, operating results and future prospects. A third party could, without authorization, copy or otherwise appropriate our proprietary information. Our agreements with employees and others who participate in development activities could be breached, we may not have adequate remedies for any breach, and our trade secrets may otherwise become known or independently developed by competitors.

Our acquisitions may not produce the anticipated results.

A significant portion of our growth has been attributable to acquisitions. We cannot assure that we will identify or successfully complete transactions with suitable acquisition candidates in the future. If an acquired business fails to operate as anticipated or cannot be successfully integrated with our other businesses, our results of operations, enterprise value, market value and prospects could all be materially and adversely affected. Integration of new acquisitions into our consolidated operations may result in lower average operating results for the group as a whole, and may divert management's focus from the ongoing operations of the Company during the integration period.

Our strategy also focuses on the reduction of selling, general and administrative expenses through the integration or elimination of redundant sales facilities and administrative functions at acquired companies. If we are unable to achieve our expectations with respect to our acquisitions, such inability could have a material and adverse effect on our results of operations. During the year ended December 31, 2019, we recorded a goodwill impairment charge of \$8.9 million due to weakened market conditions in our former North America operating segment. If the acquisitions fail to perform up to our expectations, or if there is further weakening of economic conditions, we could be required to record additional impairment charges.

We are dependent on our ability to develop new products.

Our future operating results are dependent, in part, on our ability to develop, produce and market new and more technologically advanced products. There are numerous risks inherent in this process, including the risks that we will be unable to anticipate the direction of technological change or that we will be unable to timely develop and bring to market new products and applications to meet customers' changing needs.

OPERATIONAL RISKS

Our global operations and demand for our products face risks related to health epidemics such as the coronavirus.

Any outbreaks of contagious diseases and other adverse public health developments in countries where we operate could have a material and adverse effect on our business, consolidated financial condition and consolidated results of operations. In January 2020, the outbreak of COVID-19 was first identified and had an unfavorable impact on our four largest manufacturing facilities, which are located in China, throughout the first quarter of 2020. Travel restrictions imposed by the local governmental authorities to control the spread of the virus resulted in an extended closure of our facilities in China over the Lunar New Year holiday, with the return of workers delayed after the holiday break. Our overall worker return rate at our China facilities was approximately 85% by early March 2020 and these factories have been running at near normal productivity levels since that time. Our suppliers, customers and our customers' contract manufacturers were similarly impacted earlier in 2020, and the majority have returned to near pre-COVID-19 production levels.

Throughout the remainder of 2020, many of the jurisdictions in which we operate within North America and Europe had mandated shelter-in-place orders, with the exception of essential businesses. As of the filing date of this Annual Report on Form 10-K, all of the Company's manufacturing sites were open, with certain locations at reduced workforce levels due to local government mandates. As the status of the COVID-19 outbreak continues to be uncertain particularly in the U.S. and Europe, additional Bel facilities could become negatively impacted. In addition, COVID-19 has adversely affected the economies and financial markets of many countries, resulting in an economic downturn that has affected demand for certain of our end customers' products. The extent to which COVID-19 will impact our business and our consolidated financial results will depend on future developments which are highly uncertain and cannot be predicted at the time of the filing of this Annual Report on Form 10-K. See "The Effects of COVID-19 on Bel's Business" in Item 7 of this Annual Report on Form 10-K for a discussion of how COVID-19 is currently impacting our business.

We may experience labor unrest.

As we periodically implement transfers of certain of our operations, we may experience strikes or other types of labor unrest as a result of lay-offs or termination of employees in higher labor cost countries. Our manufacturing facilities in the United Kingdom and Mexico are represented by labor unions and substantially all of our factory workers in the PRC are represented by government-sponsored unions.

We may experience labor shortages.

Government, economic, social and labor policies in the PRC may cause shortages of factory labor in areas where we have some of our products manufactured. Further, availability of labor is cyclical and is significantly affected by the migration of workers in relation to the annual Lunar New Year holiday. If we are required to manufacture more of these products outside of the PRC as a result of such shortages, our margins will likely be materially adversely affected.

A shortage of availability or an increase in the cost of high-quality raw materials, components and other resources may adversely impact our ability to procure these items at cost effective prices and thus may negatively impact profit margins.

Our results of operations may be materially adversely impacted by difficulties in obtaining raw materials, supplies, power, labor, natural resources and any other items needed for the production of our products, as well as by the effects of quality deviations in raw materials and the effects of significant fluctuations in the prices of existing inventories and purchase commitments for these materials. Many of these materials and components are produced by a limited number of suppliers and their availability to us may be constrained by supplier capacity. See "Key Factors Affecting our Business" in Item 7 of this Annual Report on Form 10-K for a discussion of how pricing and availability of materials is currently impacting our business.

The loss of certain substantial customers could materially and adversely affect us.

During the year ended December 31, 2020, sales to one direct customer exceeded 10% of our consolidated net sales. This customer, Hon Hai/Foxconn Technology Group, a contract manufacturer utilized by various end customers, represented 11.9% of our 2020 consolidated net sales. We believe that the loss of this customer could have a material adverse effect on our consolidated financial position and consolidated results of operations. We have experienced significant concentrations of customers in prior years. See Note 12, "Segments" for additional disclosures related to our significant customers. Furthermore, factors that negatively impact the businesses of our major customers, such as the grounding of aircraft at a major commercial aerospace customer, could materially and adversely affect us even if the customer represents less than 10% of our 2020 consolidated net sales.

We may not achieve all of the expected benefits from our restructuring programs.

We have implemented a number of restructuring programs in recent years and we may continue to restructure or rationalize our operations in future periods. These programs include various cost savings, the consolidation of certain facilities and the reduction of headcount. We make certain assumptions in estimating the anticipated savings we expect to achieve under such programs, which include the estimated savings from the elimination of certain headcount and the consolidation of facilities. These assumptions may turn out to be incorrect due to a variety of factors. In addition, our ability to realize the expected benefits from these programs is subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond our control. If we are unsuccessful in implementing these programs or if we do not achieve our expected results, our results of operations and cash flows could be adversely affected or our business operations could be disrupted.

There are risks related to the implementation of our new global enterprise resource planning system.

We are currently engaged in a multi-year process of conforming the majority of our operations onto one global enterprise resource planning system ("ERP"). The ERP is designed to improve the efficiency of our supply chain and financial transaction processes, accurately maintain our books and records, and provide information important to the operation of the business to our management team. The implementation of the ERP will continue to require significant investment of human and financial resources, and we may experience significant delays, increased costs and other difficulties as a result. Any significant disruption or deficiency in the design and implementation of the ERP could have a material adverse effect on our ability to fulfill and invoice customer orders, apply cash receipts, place purchase orders with suppliers, and make cash disbursements, and could negatively impact data processing and electronic communications among business locations, which may have a material adverse effect on our business, consolidated financial condition or consolidated results of operations. We also face the challenge of supporting our older systems and implementing necessary upgrades to those systems while we implement the new ERP system. While we have invested significant resources in planning and project management, significant implementation issues may arise.

FINANCIAL RISKS

There are several factors which can cause our margins to suffer.

Our margins could be substantially impacted by the following factors.

- Declines in Selling Prices: The average selling prices for our products tend to decrease over their life cycles, and customers put pressure on suppliers to lower prices even when production costs are increasing. Further, increased competition from low cost suppliers around the world has put additional pressures on pricing. Any drop in demand for our products or increase in supply of competitive products could also cause a dramatic drop in our average sales prices.
- Increases in Material Costs: While we continually strive to negotiate better pricing for components and raw materials, an increase in industry demand for or supplier shortages of certain components can result in higher material costs, or premiums incurred for expedited orders. Further, commodity prices, especially those pertaining to gold, copper and silver, can be volatile. Fluctuations in these prices and other commodity prices associated with Bel's raw materials will have a corresponding impact on our profit margins.
- Increases in Labor Costs: Wage rates, particularly in the PRC, Mexico and Slovakia where the majority of our manufacturing associates are located, have been gradually increasing in recent years as government-mandated increases in the minimum wage rate in these jurisdictions cause an increase in our overall pay scale. Labor costs can also be impacted by fluctuations in the exchange rates in which local wages are paid as compared to the U.S. dollar.

Profit margins will be materially and adversely impacted if we are not able to reduce our costs of production, introduce technological innovations as sales prices decline, or pass through cost increases to customers.

Our backlog figures may not be reliable indicators.

Many of the orders that comprise our backlog may be delayed, accelerated or canceled by customers without penalty. Customers may on occasion double order from multiple sources to ensure timely delivery when lead times are particularly long. Customers often cancel orders when business is weak and inventories are excessive. Therefore, we cannot be certain that the amount of our backlog equals or exceeds the level of orders that will ultimately be delivered. Our results of operations could be adversely impacted if customers cancel a material portion of orders in our backlog.

We may not be able to generate sufficient cash to service all of our indebtedness and may be forced to take other actions to satisfy our obligations under our indebtedness, which may not be successful.

Our ability to make scheduled payments on or refinance our debt obligations depends on our financial condition and operating performance, which are subject to prevailing economic and competitive conditions and to certain financial, business, legislative, regulatory and other factors beyond our control. We may be unable to maintain a level of cash flows from operating activities sufficient to permit us to pay the principal, premium, if any, and interest on our indebtedness.

If our cash flows and capital resources are insufficient to fund our debt service obligations, we could face substantial liquidity problems and could be forced to reduce or delay acquisitions, investments and capital expenditures or to dispose of material assets or operations, seek additional debt or equity capital or restructure or refinance our indebtedness. We may not be able to effect any such alternative measures on commercially reasonable terms or at all and, even if successful, those alternative actions may not allow us to meet our scheduled debt service obligations. Our credit agreement restricts our ability to dispose of assets and use the proceeds from those dispositions and may also restrict our ability to raise debt or equity capital to be used to repay other indebtedness when it becomes due. We may not be able to consummate those dispositions or to obtain proceeds in an amount sufficient to meet any debt service obligations then due.

Our inability to generate sufficient cash flows to satisfy our debt obligations, or to refinance our indebtedness on commercially reasonable terms or at all, would materially and adversely affect our consolidated financial position and consolidated results of operations. If we cannot make scheduled payments on our debt, we will be in default, the lenders under the credit agreement could terminate their commitments to loan money, the lenders could foreclose against the assets securing their borrowings and we could be forced into bankruptcy or liquidation.

Our level of indebtedness could negatively impact our access to the capital markets and our ability to satisfy financial covenants under our existing credit agreement.

Our U.S. debt service requirements are significant in relation to our U.S. revenue and cash flow. This leverage exposes us to risk in the event of downturns in our business, in our industry or in the economy generally, and may impair our operating flexibility and our ability to compete effectively. Our current credit agreement requires us to maintain certain covenant ratios, and the ratios

become more restrictive at specific dates during the term. If we do not continue to satisfy these required ratios or receive waivers from our lenders, we will be in default under the credit agreement, which could result in an accelerated maturity of our debt obligations. We cannot assure investors that we will be able to access private or public debt or equity on satisfactory terms, or at all. Any equity financing that could be arranged may dilute existing shareholders and any debt financing that could be arranged may result in the imposition of more stringent financial and operating covenants.

LEGAL, TAX AND REGULATORY RISKS

We may be sued by third parties for alleged infringement of their proprietary rights and we may incur defense costs and possibly royalty obligations or lose the right to use technology important to our business.

From time to time, we receive claims by third parties asserting that our products violate their intellectual property rights. Any intellectual property claims, with or without merit, could be time consuming and expensive to litigate or settle and could divert management attention from administering our business. A third party asserting infringement claims against us or our customers with respect to our current or future products may materially and adversely affect us by, for example, causing us to enter into costly royalty arrangements or forcing us to incur settlement or litigation costs.

We are subject to taxation in multiple jurisdictions. As a result, any adverse development in the tax laws of any of these jurisdictions or any disagreement with our tax positions could have a material adverse effect on our business, consolidated financial condition or consolidated results of operations.

We are subject to taxation in, and to the tax laws and regulations of, multiple jurisdictions as a result of the international scope of our operations and our corporate and financing structure. We are also subject to transfer pricing laws with respect to our intercompany transactions, including those relating to the flow of funds among our companies. Adverse developments in fiscal or tax laws, regulations or policies, or any change in position regarding the application, administration or interpretation thereof, in any applicable jurisdiction, could have a material adverse effect on our business, consolidated financial condition or consolidated results of our operations. In addition, the tax authorities in any applicable jurisdiction, including the United States, may disagree with the positions we have taken or intend to take regarding the tax treatment or characterization of any of our transactions. If any applicable tax authorities, including U.S. tax authorities, were to successfully challenge the tax treatment or characterization of any of our transactions, it could have a material adverse effect on our business, consolidated financial condition or consolidated results of our operations.

Expanding and evolving data privacy laws and regulations could impact our business and expose us to increased liability.

Our global business is subject to complex and changing laws and regulations including but not limited to privacy, data security and data localization. Evolving foreign events, including the effect of the United Kingdom's withdrawal from the European Union, may adversely affect our revenues and could subject us to new regulatory costs and challenges (such as the transfer of personal data between the EU and the United Kingdom), in addition to other adverse effects that we are unable to effectively anticipate. This may impose significant requirements on how we collect, process and transfer personal data, as well as significant financial penalties for non-compliance. Any inability to adequately address privacy concerns, even if unfounded, or to comply with the more complex privacy or data protection laws, regulations and privacy standards, could lead to significant financial penalties, which may result in a material and adverse effect on our consolidated results of operations.

RISKS RELATED TO OUR COMMON STOCK

As a result of protective provisions in the Company's certificate of incorporation, the voting power of holders of Class A common shares whose voting rights are not suspended (including officers, directors and principal shareholders) may be increased at future meetings of the Company's shareholders.

The Company's certificate of incorporation provides that if a shareholder, other than shareholders subject to specific exceptions, acquires (after the date of the Company's 1998 recapitalization) 10% or more of the outstanding Class A common stock and does not own an equal or greater percentage of all then outstanding shares of both Class A and Class B common stock (all of which common stock must have been acquired after the date of the 1998 recapitalization), such shareholder must, within 90 days of the trigger date, purchase Class B common shares, in an amount and at a price determined in accordance with a formula described in the Company's certificate of incorporation, or forfeit its right to vote its Class A common shares. As of February 28, 2021, to the Company's knowledge, there was one shareholder of the Company's common stock with ownership in excess of 10% of Class A outstanding shares with no ownership of the Company's Class B common stock and with no basis for exception from the operation of the above-mentioned provisions. In order to vote its shares at Bel's next shareholders' meeting, this shareholder must either purchase the required number of Class B common shares or sell or otherwise transfer Class A common shares until its Class A holdings are under 10%. As of February 28, 2021, to the Company's knowledge, this shareholder owned 21.6% of the Company's Class A common stock and had not taken steps to either purchase the required number of Class B common shares or sell or otherwise transfer Class A common shares until its Class A holdings fall below 10%. Unless and until this situation is satisfied in a manner

permitted by the Company's Restated Certificate of Incorporation, the subject shareholder will not be permitted to vote its shares of common stock.

To the extent that the voting rights of particular holders of Class A common stock are suspended as of times when the Company's shareholders vote due to the above-mentioned provisions, such suspension will have the effect of increasing the voting power of those holders of Class A common shares whose voting rights are not suspended. As of February 28, 2021, Daniel Bernstein, the Company's chief executive officer, beneficially owned 380,686 Class A common shares (or 22.6%) of the outstanding Class A common shares whose voting rights were not suspended, and all directors and current executive officers as a group (which includes Daniel Bernstein) beneficially owned 391,534 Class A common shares (or 23.1%) of the outstanding Class A common shares whose voting rights were not suspended.

Our stock price, like that of many technology companies, has been and may continue to be volatile.

The market price of our common stock may fluctuate as a result of variations in our quarterly operating results and other factors beyond our control. These fluctuations may be exaggerated if the trading volume of our common stock is low. The market price of our common stock may rise and fall in response to a variety of other factors, including:

- announcements of technological or competitive developments;
- general market or economic conditions;
- the impact of the ongoing COVID-19 pandemic on our operations and supply chain;
- market or economic conditions specific to particular geographical areas in which we operate;
- acquisitions or strategic alliances by us or our competitors;
- the gain or loss of a significant customer or order; or
- changes in estimates of our financial performance or changes in recommendations by securities analysts regarding us or our industry

In addition, equity securities of many technology companies have experienced significant price and volume fluctuations even in periods when the capital markets generally are not distressed. These price and volume fluctuations often have been unrelated to the operating performance of the affected companies.

Our results of operations may be materially and adversely impacted by environmental and other regulations.

Our manufacturing operations, products and/or product packaging are subject to environmental laws and regulations governing air emissions; wastewater discharges; the handling, disposal and remediation of hazardous substances, wastes and certain chemicals used or generated in our manufacturing processes; employee health and safety labeling or other notifications with respect to the content or other aspects of our processes, products or packaging; restrictions on the use of certain materials in or on design aspects of our products or product packaging; and, responsibility for disposal of products or product packaging. Discussions and proposals related to gas emissions and climate change have increasingly become the subject of substantial attention; additional regulation in this area could have the effect of restricting our business operations or increasing our operating costs. More stringent environmental regulations may be enacted in the future, and we cannot presently determine the modifications, if any, in our operations that any such future regulations might require, or the cost of compliance with these regulations.

GENERAL RISKS

The global nature of our operations exposes us to numerous risks that could materially adversely affect our consolidated financial condition and consolidated results of operations.

We operate in 15 countries, and our products are distributed in those countries as well as in other parts of the world. A large portion of our manufacturing operations are located outside of the United States and a large portion of our sales are generated outside of the United States. Operations outside of the United States, particularly operations in developing regions, are subject to various risks that may not be present or as significant for our U.S. operations. Economic uncertainty in some of the geographic regions in which we operate, including developing regions, could result in the disruption of commerce and negatively impact cash flows from our operations in those areas.

Risks inherent in our international operations include:

- COVID-19-related closures and other pandemic-related uncertainties in the countries in which we operate;
- Import and export regulations that could erode profit margins or restrict exports;
- Foreign exchange controls and tax rates;
- Foreign currency exchange rate fluctuations, including devaluations;
- Changes in regional and local economic conditions, including local inflationary pressures;

- Difficulty of enforcing agreements and collecting receivables through certain foreign legal systems;
- Variations in protection of intellectual property and other legal rights;
- More expansive legal rights of foreign unions or works councils;
- Changes in labor conditions and difficulties in staffing and managing international operations;
- Inability or regulatory limitations on our ability to move goods across borders;
- Changes in laws and regulations, including the laws and policies of the United States affecting trade, tariffs and foreign investment;
- Restrictive governmental actions such as those on transfer or repatriation of funds and trade protection matters, including antidumping duties, tariffs, trade wars, embargoes and prohibitions or restrictions on acquisitions or joint ventures;
- Social plans that prohibit or increase the cost of certain restructuring actions;
- The uncertainty surrounding the implementation and effects of Brexit;
- The potential for nationalization of enterprises or facilities; and
- Unsettled political conditions and possible terrorist attacks against U.S. or other interests.

As a multi-national company, we are faced with increased complexities due to recent changes to the U.S. corporate tax code relating to our unremitted foreign earnings, potential revisions to international tax law treaties, and renegotiated trade deals. In addition, other events, such as the United Kingdom's exit from the European Union and the ongoing discussion and negotiations concerning varying levels of tariffs on product imported from the PRC, also create a level of uncertainty. If we are unable to anticipate and effectively manage these and other risks, it could have a material and adverse effect on our business, our consolidated results of operations and consolidated financial condition.

Cyber risk and the failure to maintain the integrity of our operational or security systems or infrastructure, or those of third parties with which we do business, could have a material adverse effect on our business, consolidated financial condition and consolidated results of operations.

Cyber threats are rapidly evolving and are becoming increasingly sophisticated. Our Company expects to continue to experience cyber threats from time to time, which pose a risk to the security of our systems and networks and the confidentiality, availability and integrity of our data. Disruptions or failures in the physical infrastructure or operating systems that support our businesses and customers, or cyber-attacks or security breaches of our networks or systems, could result in the loss of customers and business opportunities, legal liability, regulatory fines, penalties or intervention, other litigation, regulatory and legal risks and the costs associated therewith, reputational damage, reimbursement or other compensatory costs, remediation costs, increased cybersecurity protection costs, additional compliance costs, increased insurance premiums, and lost revenues, damage to the Company's competitiveness, stock price, and long-term shareholder value, any of which could materially adversely affect our business, financial condition and results of operations. While we attempt to mitigate these risks, our systems, networks, products, solutions and services remain potentially vulnerable to advanced and persistent threats. We also maintain and have access to sensitive, confidential or personal data or information in certain of our businesses that is subject to privacy and security laws and regulations. Despite our efforts to protect such sensitive, confidential or personal data or information, our facilities and systems and those of our customers and third-party service providers may be vulnerable to security breaches, theft, fraud, misplaced or lost data, "Acts of God", programming and/or human errors that could lead to the compromising of sensitive, confidential or personal data or information, improper use of our systems, software solutions or networks, unauthorized access, use, disclosure, modification or destruction of information, defective products, production downtimes and operational disruptions, which in turn could adversely affect our consolidated financial condition and consolidated results of operations.

A loss of the services of the Company's executive officers or other skilled associates could negatively impact our operations and results.

The success of the Company's operations is largely dependent upon the performance of its executive officers, managers, engineers and salespeople. Many of these individuals have a significant number of years of experience within the Company and/or the industry in which we compete and would be extremely difficult to replace. The loss of the services of any of these associates may materially and adversely impact our results of operations if we are unable to replace them in a timely manner.

Item 1B. *Unresolved Staff Comments*

None.

Item 2. *Properties*

The Company is headquartered in Jersey City, New Jersey, where it currently owns 19,000 square feet of office and warehouse space. In addition to its facilities in Jersey City, New Jersey, the Company occupies 324,000 square feet at 22 non-manufacturing facilities, which are used primarily for management, financial accounting, engineering, sales and administrative support. Of this space, the Company leases 216,000 square feet in 17 facilities and owns properties of 125,000 square feet.

The Company also operated 20 manufacturing facilities in 7 countries as of December 31, 2020. Approximately 14% of the 2.2 million square feet the Company occupies is owned while the remainder is leased. See Note 17, "Commitments and Contingencies", for additional information pertaining to leases.

The following is a list of the locations of the Company's principal manufacturing facilities at December 31, 2020:

Location	Approximate Square Feet	Owned/ Leased	Percentage Used for Manufacturing
Dongguan, People's Republic of China	650,000	Leased	28%
Pingguo, People's Republic of China	251,000	Leased	71%
Shenzhen, People's Republic of China	227,000	Leased	100%
Zhongshan, People's Republic of China	314,000	Leased	86%
Zhongshan, People's Republic of China	118,000	Owned	100%
Zhongshan, People's Republic of China	78,000	Owned	100%
Louny, Czech Republic	11,000	Owned	75%
Dubnica nad Vahom, Slovakia	35,000	Owned	100%
Dubnica nad Vahom, Slovakia	70,000	Leased	100%
Worksop, United Kingdom	51,000	Leased	28%
Chelmsford, United Kingdom	17,000	Leased	80%
Sudbury, United Kingdom	12,000	Leased	90%
Dominican Republic	33,000	Leased	85%
Cananea, Mexico	29,000	Leased	60%
Reynosa, Mexico	77,000	Leased	56%
Glen Rock, Pennsylvania	74,000	Owned	60%
Waseca, Minnesota	124,000	Leased	83%
McAllen, Texas	40,000	Leased	56%
Melbourne, Florida	18,000	Leased	64%
Tempe, Arizona	8,000	Leased	100%
	<u>2,237,000</u>		

Of the space described above, 289,000 square feet is used for engineering, warehousing, sales and administrative support functions at various locations and 463,000 square feet is designated for dormitories, canteen and other employee related facilities in the PRC.

The Territory of Hong Kong became a Special Administrative Region ("SAR") of the PRC during 1997. The territory of Macao became a SAR of the PRC at the end of 1999. Management cannot presently predict what future impact, if any, this will have on the Company or how the political climate in the PRC will affect its contractual arrangements in the PRC. A significant portion of the Company's manufacturing operations and approximately 32.6% of its identifiable assets are located in Asia.

Item 3. *Legal Proceedings*

The information called for by this Item is incorporated herein by reference to the caption "Legal Proceedings" in Note 17, "Commitments and Contingencies."

Item 4. *Mine Safety Disclosures*

Not applicable.

PART II

Item 5. *Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities*

(a) Market Information

The Company's voting Class A Common Stock, par value \$0.10 per share, and non-voting Class B Common Stock, par value \$0.10 per share ("Class A" and "Class B," respectively), are traded on the NASDAQ Global Select Market under the symbols BELFA and BELFB, respectively.

(b) Holders

As of February 28, 2021, there were 41 registered shareholders of the Company's Class A Common Stock and 329 registered shareholders of the Company's Class B Common Stock. As of February 28, 2021, the Company estimates that there were 652 beneficial shareholders of the Company's Class A Common Stock and 2,872 beneficial shareholders of the Company's Class B Common Stock. At February 28, 2021, to the Company's knowledge, there was one shareholder of the Company's Class A common stock whose voting rights were suspended. This shareholder owned 21.6% of the Company's outstanding shares of Class A common stock. For additional discussion, see Item 1A – "Risk Factors – As a result of protective provisions in the Company's certificate of incorporation, the voting power of holders of Class A common shares whose voting rights are not suspended (including officers, directors and principal shareholders) may be increased at future meetings of the Company's shareholders".

(c) Dividends

During the years ended December 31, 2020 and 2019, the Company declared dividends on a quarterly basis at a rate of \$0.06 per Class A share of common stock and \$0.07 per Class B share of common stock totaling \$3.4 million in 2020 and \$3.4 million in 2019. There are no contractual restrictions on the Company's ability to pay dividends provided the Company is not in default under its credit agreement immediately before such payment and after giving effect to such payment. On February 1, 2021, the Company paid a dividend to all shareholders of record at January 15, 2021 of Class A and Class B Common Stock in the total amount of \$0.1 million (\$0.06 per share) and \$0.7 million (\$0.07 per share), respectively. On February 17, 2021, Bel's Board of Directors declared a dividend in the amount of \$0.06 per Class A common share and \$0.07 per Class B common share which is scheduled to be paid on April 30, 2021 to all shareholders of record at April 15, 2021. Determinations regarding future dividend payments will depend, in part, upon the immediate and long-term effects of the coronavirus on the Company, its customers and its suppliers.

(d) Common Stock Performance Comparisons

Not applicable.

Item 6. *Selected Financial Data*

Not applicable.

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

The information in this MD&A should be read in conjunction with the Company's consolidated financial statements and the notes related thereto. The discussion of results, causes and trends should not be construed to imply any conclusion that such results, causes or trends will necessarily continue in the future. See "Cautionary Notice Regarding Forward-Looking Information" above for further information. Also, when we cross reference to a "Note," we are referring to our "Notes to Consolidated Financial Statements," unless the context indicates otherwise. All amounts and percentages are approximate due to rounding.

Under the SEC's amended definition of a "smaller reporting company," the Company is deemed to be a smaller reporting company. Accordingly, among other things, the Company is not required to present selected financial data in Item 6 and has reduced the number of years covered by its financial statements in Item 8.

Overview

Our Company

We design, manufacture and market a broad array of products that power, protect and connect electronic circuits. These products are primarily used in the networking, telecommunications, computing, military, aerospace, transportation and broadcasting industries. Bel's portfolio of products also finds application in the automotive, medical and consumer electronics markets.

We operate through three product group segments, in addition to a Corporate segment. In 2020, 39% of the Company's revenues were derived from Power Solutions and Protection, 32% from Cinch Connectivity Solutions and 29% from its Magnetic Solutions operating segment.

Our operating expenses are driven principally by the cost of labor where the factories that Bel uses are located, the cost of the materials that we use and our ability to effectively and efficiently manage overhead costs. As labor and material costs vary by product line and region, any significant shift in product mix can have an associated impact on our costs of sales. Costs are recorded as incurred for all products manufactured. Such amounts are determined based upon the estimated stage of production and include labor cost and fringes and related allocations of factory overhead. Our products are manufactured at various facilities in the U.S., Mexico, Dominican Republic, England, Czech Republic, Slovakia and the PRC.

We have little visibility into the ordering habits of our customers and we can be subjected to large and unpredictable variations in demand for our products. Accordingly, we must continually recruit and train new workers to replace those lost to attrition and be able to address peaks in demand that may occur from time to time. These recruiting and training efforts and related inefficiencies, and overtime required in order to meet any increase in demand, can add volatility to the labor costs incurred by us.

The Effects of COVID-19 on Bel's Business

Throughout 2020, the Company has focused heavily on the continued safety and well-being of its associates around the world in light of COVID-19. The majority of the products manufactured by Bel are utilized in military, medical and networking applications, and are therefore deemed essential by the various jurisdictions in which we operate. Our management team has been able to respond quickly in implementing our business continuity plans around the world. Significant protective measures were put in place throughout our facilities, including employee screenings, physical partitions, social distancing, use of face coverings, travel and visitor restrictions and work from home policies as we continue to service our customers. The majority of our office staff continues to work remotely to avoid a large number of associates being present in an office setting at any one time. With the significant increase in the number of staff working remotely, Bel's IT department took a variety of precautionary measures to protect the computer equipment that associates are utilizing in the remote environment. The combination of protective measures at our factories coupled with remote work arrangements have enabled us to maintain operations, including financial reporting systems, internal controls over financial reporting and disclosure controls and procedures.

Our financial results for the first half of 2020 reflected the temporary facility closures at certain of our manufacturing locations, particularly in China, Mexico and the Dominican Republic, due to the outbreak of COVID-19 and the related disruption to our supply chain. This led to an estimated \$14-\$17 million of shipments scheduled for the first quarter which were ultimately shipped in the second quarter. The Company also incurred additional indirect COVID-19 related costs, including operational inefficiencies and employee retention programs at its manufacturing facilities in China throughout 2020, which were offset by \$4.9 million of COVID-19 relief funding received from the Chinese government also during the year ended December 31, 2020.

All of our manufacturing sites are operating as of the filing date of this Annual Report on Form 10-K. Although the majority of our factories in North America, Europe and Asia are currently at 90+% of their normal workforce levels, we are experiencing lower productivity and efficiency rates at certain sites in North America (estimated at 80%-90%, depending on the impacted site) due to a reduced workforce at those sites. In addition, in order to comply with social distancing requirements, certain of our factory floors have been reconfigured to provide additional spacing in production lines, which has resulted in some inefficiencies related to product

flow. Bel has also experienced higher freight costs for products typically shipped by air due to lower cargo capacity with the reduction in commercial air travel. While there are some delays within the supply chain in the movement of products related to border closures, to date such delays have not materially impacted our ability to operate our business or achieve our business goals. To date, we have not seen a significant reduction in demand for our products due to COVID-19, as many of our products support military, medical and networking applications, which generally have not been negatively impacted by COVID-19. However, approximately 5% of our revenue relates to products utilized in end markets that have been impacted by COVID-19, such as commercial aerospace.

Given the general uncertainty regarding the impact of COVID-19 on our manufacturing capability and on our customers, we are unable to quantify the ultimate impact of COVID-19 on our future results at this time.

Based on our analysis of ASC 350 and ASC 360 during the year ended December 31, 2020, we are currently not aware of any material impairments of our goodwill, indefinite-lived intangible assets or finite-lived assets. The Company will continue to assess the relevant criteria on a quarterly basis based on updated cash flow and market assumptions. Unfavorable changes in cash flow or market assumptions could result in impairment of these assets in future periods.

As our operations have continued, albeit at slightly reduced production and efficiency rates, we have not experienced a negative impact on our liquidity to date. Our balance of cash on hand continues to be strong at \$84.9 million at December 31, 2020 as compared to \$72.3 million at December 31, 2019, despite voluntary debt payments of \$28.2 million made during 2020. The Company also has availability under its current revolving credit facility; as of December 31, 2020, the Company could borrow an additional \$56.6 million while still being in compliance with its debt covenants. However, any further negative impact to our financial results related to COVID-19 would have a related negative impact on our financial covenants outlined in our credit agreement, which would impact the amount available to borrow under our revolving credit facility. In order to assist with maintaining our liquidity position, the Company implemented several measures during the first quarter of 2020, including the deferral of employer social security taxes under the federal CARES Act, restrictions on new hires, suspension of salary reviews, the elimination of all business travel and restrictions on spending related to capital expenditures. During the year ended December 31, 2020, travel expenses incurred by the Company were \$2.0 million lower than 2019. Management has developed Phase 2 and Phase 3 of the Company's cash conservation/cost savings plan which would be implemented in the event our liquidity position or financial results become materially impacted by COVID-19.

Our statements regarding the future impact of COVID-19 represent Forward-Looking Statements. See "Cautionary Notice Regarding Forward-Looking Information."

Key Factors Affecting our Business

The Company believes the key factors affecting Bel's 2020 and/or future results include the following:

- **Revenues** – The Company's revenues declined by \$26.6 million, or 5.4%, in 2020 as compared to 2019. By product segment, Power Solutions and Protection sales increased by 11.0%, Cinch Connectivity Solutions sales declined by 12.5% and Magnetic Solutions sales were lower by 14.7%.
- **Backlog** – Our backlog of orders totaled \$155.0 million at December 31, 2020, representing a decrease of \$5.2 million, or 3%, from December 31, 2019. Since the 2019 year-end, we saw a 37% increase in backlog for our Magnetic Solutions products, driven by restored demand from a large networking customer. The backlog for our Power Solutions and Protection products increased by 7%, due to an increase in demand across the majority of our power product lines. Our Cinch Connectivity Solutions backlog declined by 31%, primarily due to lower demand from our direct and after-market commercial aerospace customers.
- **Product Mix** – Material and labor costs vary by product line and any significant shift in product mix between higher- and lower-margin product lines will have a corresponding impact on the Company's gross margin percentage. In general, our connectivity products have the highest contribution margins of our three product groups due to the harsh-environment, high-reliability nature of these products. Our power products have a higher cost bill of materials and are impacted to a greater extent by changes in material costs. As our magnetic solutions products are more labor intensive, margins on these products are impacted to a greater extent by minimum wage increases in the PRC and fluctuations in foreign exchange rates between the U.S. Dollar and the Chinese Renminbi. Fluctuations in sales volume among our product groups will have a corresponding impact on Bel's profit margins. See Note 12, "Segments" for profit margin information by product group.
- **Pricing and Availability of Materials** – There have been recent supply constraints related to components that constitute raw materials in our manufacturing processes, particularly with resistors, capacitors, discrete semiconductors, plastic resin and copper. Lead times have been extended and the reduction in supply also caused an increase in prices for certain of these components. While we currently anticipate this impact on pricing and availability to be temporary during the first half of 2021, any increase in material pricing that we are not able to pass along to our customers will have an unfavorable impact on Bel's

profit margins. The preceding sentence represents a Forward-Looking Statement. See "Cautionary Notice Regarding Forward-Looking Information."

- **Labor Costs** – Labor costs decreased from 10.3% of sales during 2019 to 9.9% of sales during 2020, primarily due to lower demand for our labor-intensive ICM products. There was also a favorable impact from the depreciation of the Mexican Peso versus the U.S. Dollar in 2020 as compared to exchange rates in place during 2019. These items were partially offset by increased costs associated with minimum wage increases in the PRC and Mexico.
- **Restructuring** – During 2020, the Company announced facility closures in Switzerland, Germany and Hong Kong and implemented other general function consolidations and headcount reductions at various sites. In connection with the actions implemented in 2020, the Company incurred \$0.6 million in restructuring costs during 2020. These actions resulted in total annualized cost savings of \$6.0 million (\$1.2 million in cost of sales, \$3.2 million in R&D and \$1.6 million in SG&A). Of the annualized cost savings, \$1.5 million was realized in 2020 with the incremental \$4.4 million to be realized in 2021 (\$1.1 million in cost of sales, \$2.0 million in R&D and \$1.3 million in SG&A). The Company will continue to explore opportunities to streamline the organization in 2021 to further improve profitability. The preceding sentence represents a Forward-Looking Statement. See "Cautionary Notice Regarding Forward-Looking Information."
- **Impact of Foreign Currency** – During 2020, favorable fluctuations in exchange rates, particularly between the U.S. dollar and the Mexican Peso, resulted in lower labor and overhead costs of \$0.6 million versus the exchange rates in effect during 2019. Separately, a foreign exchange transactional loss of \$2.2 million was realized during 2020. Since we are a U.S. domiciled company, we translate our foreign currency-denominated financial results into U.S. dollars. Due to the changes in the value of foreign currencies relative to the U.S. dollar, translating our financial results and the revaluation of certain intercompany as well as third-party transactions to and from foreign currencies to U.S. dollars may result in a favorable or unfavorable impact to our consolidated statements of operations and cash flows. The Company has significant manufacturing operations located in the PRC where labor and overhead costs are paid in local currency. As a result, the U.S. Dollar equivalent costs of these operations were \$0.6 million lower in 2020. The Company monitors changes in foreign currencies and may implement pricing actions to help mitigate the impact that changes in foreign currencies may have on its consolidated operating results.
- **ERP System Implementation** – In January 2019, the Company completed the first phase of its ERP system implementation with the successful transition of its Power Solutions business onto the new system without any notable issues. In January 2020, the second phase of the implementation related to its TRP business was completed successfully. The Company incurred expenses of \$1.8 million during 2019 related to this project with no additional costs incurred during 2020. The remaining phases of this project, expected to be completed by mid-2021, will largely leverage Bel's trained internal resources which should result in minimal implementation costs going forward. The Company realized annual cost savings of \$2.0 million related to the elimination of redundant license fees associated with its ERP systems, with those savings beginning in 2019.
- **Effective Tax Rate** – The Company's effective tax rate will fluctuate based on the geographic region in which the pretax profits are earned. Of the jurisdictions in which the Company operates, the U.S. and Europe's tax rates are generally equivalent; and Asia has the lowest tax rates of the Company's three geographic regions. See Note 9 to the Company's Consolidated Financial Statements - "Income Taxes".

In January 2021, we announced the acquisition of rms Connectors and the anticipated acquisition of EOS Power expected to close later in the first quarter of 2021. These two acquisitions fit squarely into Bel's growth strategy by increasing market share while diversifying our product portfolios and geographic footprint. Visibility on our base business continues to be limited as a result of COVID-19 and long lead times for semiconductors and certain components and these factors may affect our organic growth for 2021. We believe, however, that the incremental contribution from the two new acquisitions coupled with continued actions under our global cost savings initiative will bode well for further profitability in the coming year. The preceding two sentences represent Forward-Looking Statements. See "Cautionary Notice Regarding Forward-Looking Information."

Summary by Operating Segment

Net Sales and Gross Margin

The Company's net sales and gross margin by major product line for the years ended December 31, 2020 and 2019 were as follows (dollars in thousands):

	Years Ended December 31,			
	Net Sales		Gross Margin	
	2020	2019	2020	2019
Connectivity solutions	\$ 150,731	\$ 172,348	28.0%	25.8%
Magnetic solutions	133,552	156,536	24.8%	21.9%
Power solutions and protection	181,488	163,528	25.1%	20.1%
	<u>\$ 465,771</u>	<u>\$ 492,412</u>	<u>25.7%</u>	<u>22.3%</u>

Cinch Connectivity Solutions:

Sales of our Connectivity Solutions products declined \$21.6 million during 2020 as compared to 2019. This decline was primarily due to lower demand from direct and after-market commercial aerospace customers, partially offset by higher demand for our military products during 2020 as compared to 2019. This shift in product mix along with the operational cost reductions detailed in the "Restructuring" section above have resulted in improved gross margins during 2020 as compared to 2019.

Magnetic Solutions:

Sales of our magnetic products declined by \$23.0 million from 2019 due to lower demand from a large OEM networking customer. While orders received for our magnetic products in 2020 were down by \$4.8 million from 2019 levels, we saw our first indication of recovery in the fourth quarter of 2020, with an increase in bookings of \$8.0 million compared to the fourth quarter of 2019. The gross margin improvement in 2020 versus 2019 was largely the result of restructuring measures implemented in late 2019 and a shift in product mix within the Magnetic Solutions segment. These benefits were partially offset by higher labor costs within this product group driven by the appreciation of the Renminbi versus the U.S. dollar in 2020 as compared to the exchange rates in place throughout 2019.

Power Solutions and Protection:

Sales of our Power Solutions products increased by \$18.0 million during 2020 as compared to 2019. The CUI business, which was acquired in December 2019, contributed incremental sales of \$41.0 million in 2020 at a gross margin of 34.1%. Our circuit protection sales increased by \$2.7 million, or 21.0%, from 2019 primarily resulting from a rebound in demand from our catalog distributors. Sales of our Bel Power Solutions products decreased by \$19.8 million during 2020 as compared to 2019 and sales of our modules products were \$3.5 million lower than 2019. These declines were largely due to the elimination of certain low-margin power products. The gross margin expansion in 2020 versus 2019 is primarily due to the inclusion of higher-margin CUI sales, elimination of low-margin products and cost savings that resulted from restructuring efforts implemented in the latter half of 2019.

Cost of Sales

Cost of sales as a percentage of net sales for the two years ended December 31, 2020 consisted of the following:

	Years Ended December 31,	
	2020	2019
Material costs	43.3%	44.7%
Labor costs	9.9%	10.3%
Other expenses	20.7%	22.5%
Total cost of sales	<u>73.9%</u>	<u>77.5%</u>

Material costs as a percentage of sales decreased during 2020 compared to 2019 as the 2019 financials included the remaining sales of high-cost inventory on hand from 2018 when premiums were paid due to material shortages and long lead times. The elimination of low-margin power products, which carried a high material content, also contributed to this reduction.

Labor costs as a percentage of sales declined in 2020 compared to 2019 as a more favorable exchange rate environment related to the Mexican Peso coupled with a reduction in labor-intensive production of Magnetic products offset the impacts from minimum wage rate increases in the PRC, Mexico and Slovakia that went into effect during 2020.

The other expenses noted in the table above include fixed cost items such as support labor and fringe, depreciation and amortization, and facility costs (rent, utilities and insurance). In total, these other expenses decreased during 2020 by \$13.0 million as compared

to 2019, primarily due to a \$6.1 million reduction in other overhead expenses as a result of our restructuring efforts over the past year. Other factors contributing to the decline included lower support labor and fringe expense of \$4.5 million, a reduction in utilities expense of \$0.8 million and lower depreciation and amortization expense of \$0.6 million.

Research and Development ("R&D")

R&D expenses were \$23.6 million and \$26.9 million for the years ended December 31, 2020 and 2019, respectively. The reduction in R&D expenses during 2020 largely resulted from restructuring efforts during the year, including the closure of the Company's Power R&D facility in Switzerland in August 2020.

Selling, General and Administrative Expenses ("SG&A")

SG&A expenses were \$78.7 million in 2020 as compared with \$77.4 million in 2019. The acquisition of CUI in December 2019 accounted for \$7.0 million in incremental SG&A expense during 2020. Excluding CUI, SG&A expense was \$5.7 million lower compared to 2019. Notable drivers included a reduction in travel expense of \$2.1 million, lower selling-related costs (commissions, advertising and other costs) of \$1.5 million, a reduction in legal and professional fees of \$1.1 million (largely due to elimination of redundant ERP license and support fees), and \$1.1 million of lower salaries and fringe benefits compared to 2019.

Restructuring Charges

The Company recorded \$0.6 million of restructuring charges in 2020 related to cost savings measures implemented during the year, including the closure of its Switzerland and Germany facilities, and a portion of its warehouse space in Hong Kong, among other actions. The Company recorded restructuring charges of \$2.6 million in 2019 in connection with the transition of its manufacturing operations from Inwood, New York to other existing Bel facilities, the closure of its office in Shanghai and indirect headcount reductions in Europe and Asia, largely related to its Power segment.

Interest Expense

The Company incurred interest expense of \$4.7 million in 2020 and \$5.4 million in 2019 primarily due to our outstanding borrowings under the Company's credit and security agreement. The reduction in interest expense during 2020 related to lower interest rates on our outstanding balance during 2020, in addition to a lower debt balance throughout most of 2020 as compared to 2019. See "Liquidity and Capital Resources" and Note 10 of the Notes to our Consolidated Financial Statements - "Debt," for further information on the Company's outstanding debt.

Other (Expense) Income, Net

Other (expense) income, net was expense of \$1.8 million in 2020 compared to expense of \$0.3 million in 2019. This line item included a foreign exchange loss of \$2.2 million in 2020 as compared to a foreign exchange gain of \$0.1 million in 2019. Another contributing factor was gains on the Company's SERP investments which amounted to \$1.1 million in 2020 as compared to \$2.1 million in 2019. These gains in 2019 were offset by a \$2.1 million loss on liquidation of foreign subsidiaries.

Income Taxes

The Company's effective tax rate will fluctuate based on the geographic segment in which the pretax profits are earned. Of the jurisdictions in which the Company operates, the U.S. and Europe's tax rates are generally equivalent; and Asia has the lowest tax rates of the Company's three geographic regions. See Note 9 to the Company's Consolidated Financial Statements, "Income Taxes" and the "Tax Reform" discussion below.

Tax Reform

The Tax Cuts and Jobs Act (the "Act") was enacted on December 22, 2017. The Act reduced the U.S. federal corporate tax rate from 35% to 21%, required companies to pay a one-time transition tax on earnings of certain foreign subsidiaries that were previously tax deferred and created new taxes on certain foreign sourced earnings.

Effective January 1, 2018, the Act subjects a U.S. shareholder to current tax on global intangible low-taxed income (GILTI) earned by certain foreign subsidiaries. The Company has elected an accounting policy to provide for the tax expense related to the GILTI in the period the tax is incurred. On July 20, 2020, the Department of the Treasury and the Internal Revenue Service issued a final regulation under Section 954A as enacted by the 2017 tax reform legislation. These regulations relate to the treatment of income that is subject to a high rate of foreign tax under the GILTI income regimes. The final regulations allow taxpayers to exclude certain high-taxed income of a controlled foreign corporation from their GILTI computation on an elective basis and contain modifications on the level at which the estimated tax rate test is applied. The election can be made annually for tax years that begin after December 31, 2017.

The Company's inclusion of approximately \$6.8 million of GILTI income for the year ended December 31, 2019 was impacted by the final regulations enacted on July 20, 2020. The Company reduced the GILTI inclusion for the year ended December 31, 2019 to \$3.4 million. As a result of the NOL carryforward created by the exclusion, the Company recognized a benefit associated with the final regulations of approximately \$1.0 million in the year ended December 31, 2020. The Company included \$12.5 million of GILTI income for the year ended December 31, 2020. The GILTI income was offset by the Company's U.S. losses and credits which resulted in no additional U.S. tax expense.

On March 27, 2020, the Coronavirus Aid, Relief and Economic Security ("CARES") Act was enacted and signed into law. Certain provisions of the CARES Act impact the 2019 income tax provision computations of the Company and were reflected in the year ended December 31, 2020, or the period of enactment. The CARES Act contains modifications on the limitation of business interest for tax years beginning in 2019 and 2020. The modifications to Section 163(j) increase the allowable business interest deduction from 30% of adjusted taxable income to 50% of adjusted taxable income. This modification would increase the allowable interest expense deduction of the Company and resulted in a net operating loss ("NOL") for the year ended December 31, 2019. The Company carried back the NOL to the tax year ended December 31, 2015 and has reflected this impact in the tax provision for the year ended December 31, 2020. Due to the foregoing, and as a result of the difference in corporate tax rates in the NOL carryback period, the Company recognized a benefit associated with the enactment of the CARES Act of approximately \$0.1 million for the year ended December 31, 2020.

2020 as Compared to 2019

The (benefit) provision for income taxes for the years ended December 31, 2020 and 2019 was \$(0.7) million and \$1.4 million, respectively. The Company's earnings before income taxes for the year ended December 31, 2020 were approximately \$19.4 million higher than the same period in 2019, primarily attributable to a increase in income in the Asia and North America regions, offset by a decrease in the Europe region. The Company's effective tax rate was (5.4%) and (19.7%) for the years ended December 31, 2020 and 2019, respectively. The change in the effective tax rate during the year ended December 31, 2020 as compared to the same period in 2019 is primarily attributable to tax benefits relating to the federal tax law changes regarding the final regulations on GILTI high-tax exception and the reversal of uncertain tax positions resulting from the expiration of certain statutes of limitations. Additionally, the effective tax rate of 2019 was unfavorably impacted by the impairment of goodwill in North America.

Other Tax Matters

The Company has a portion of its products manufactured on the mainland of the PRC where Bel is not subject to corporate income tax on manufacturing services provided by third parties. Hong Kong has a territorial tax system which imposes corporate income tax at a rate of 16.5% on income from activities solely conducted in Hong Kong.

The Company holds an offshore business license from the government of Macao. With this license, a Macao offshore company named Bel Fuse (Macao Commercial Offshore) Limited has been established to handle the Company's sales to third-party customers in Asia. Sales by this company primarily consist of products manufactured in the PRC. This company is not subject to Macao corporate profit taxes which are imposed at a tax rate of 12%. As part of Macao's commitment to comply with OECD standards, it abolished the existing offshore company (MOC) regime as of January 1, 2021. The existing law and the relevant regulations related to the offshore business will be abolished and the operating permit to carry on offshore business will be terminated on January 1, 2021. The Company has decided to continue this company's operations and beginning January 1, 2021 will pay 12% tax on any profits from this operation.

Management has no specific plans to indefinitely reinvest the unremitted earnings of our foreign subsidiaries as of December 31, 2020. Applicable income and dividend withholding taxes have been reflected in the accompanying consolidated statements of operations for the year ended December 31, 2020. Due to the practicality of determining the deferred taxes on outside basis differences in our investments in our foreign subsidiaries, we have not provided for deferred taxes on outside basis differences and deemed that these basis differences will be indefinitely reinvested.

Inflation and Foreign Currency Exchange

During the past two years, we do not believe the effect of inflation was material to our consolidated financial position or our consolidated results of operations. We are exposed to market risk from changes in foreign currency exchange rates. Fluctuations of the U.S. dollar against other major currencies have not significantly affected our foreign operations as most sales continue to be denominated in U.S. dollars or currencies directly or indirectly linked to the U.S. dollar. Most significant expenses, including raw materials, labor and manufacturing expenses, are incurred primarily in U.S. dollars or the Chinese Renminbi, and to a lesser extent in British pounds and Mexican pesos. The Mexican Peso depreciated by approximately 11% in 2020 as compared to 2019. There were no significant fluctuations in the average exchange rate of the Chinese Renminbi or the British Pound during 2020 as compared to 2019. To the extent the Renminbi or Peso appreciate in future periods, it could result in the Company's incurring higher costs for most expenses incurred in the PRC and Mexico. The Company's European entities, whose functional currencies are Euros, British

pounds and Czech Korunas, enter into transactions which include sales that are denominated principally in euros, British pounds and various other European currencies, and purchases that are denominated principally in U.S. dollars and British pounds. Such transactions, as well as those related to our multi-currency intercompany payable and receivable transactions, resulted in net realized and unrealized currency exchange (losses) gains of (\$2.2) million and \$0.1 million for the years ended December 31, 2020 and 2019, respectively, which were included in other income/expense, net on the consolidated statements of operations. The currency exchange losses recorded in 2020 were primarily due to the unfavorable impact of the appreciation of the Chinese Renminbi and Euro against the U.S. dollar. Translation of subsidiaries' foreign currency financial statements into U.S. dollars resulted in translation adjustments, net of taxes, of \$6.9 million and \$2.6 million for the years ended December 31, 2020 and 2019, respectively, which are included in accumulated other comprehensive loss on the consolidated balance sheets.

Liquidity and Capital Resources

Our primary sources of cash are the collection of trade receivables generated from the sales of our products and services to our customers and amounts available under our existing lines of credit, including our credit facility. Our primary uses of cash are payments for operating expenses, investments in working capital, capital expenditures, interest, taxes, dividends, debt obligations and other long-term liabilities. We believe that our current liquidity position and future cash flows from operations will enable us to fund our operations, including all of the items mentioned above in the next twelve months.

At December 31, 2020 and 2019, \$57.5 million and \$29.1 million, respectively (or 68% and 40%, respectively), of cash and cash equivalents was held by foreign subsidiaries of the Company. During 2020, the Company repatriated \$5.0 million of funds from outside of the U.S., with minimal incremental tax liability. We continue to analyze our global working capital and cash requirements and the potential tax liabilities attributable to further repatriation, and we have yet to make any further determination regarding repatriation of funds from outside the U.S. to fund the Company's U.S. operations in the future. In the event these funds were needed for Bel's U.S. operations, the Company would be required to accrue and pay U.S. state taxes and any applicable foreign withholding taxes to repatriate these funds.

In June 2014, the Company entered into a senior Credit and Security Agreement, which was subsequently amended in December 2014, March 2016, and further amended and refinanced in December 2017 (see Note 10, "Debt," for additional details). The Credit and Security Agreement contains customary representations and warranties, covenants and events of default and financial covenants that measure (i) the ratio of the Company's total funded indebtedness, on a consolidated basis, to the amount of the Company's consolidated EBITDA, as defined ("Leverage Ratio"), and (ii) the ratio of the amount of the Company's consolidated EBITDA to the Company's consolidated fixed charges ("Fixed Charge Coverage Ratio"). If an event of default occurs, the lenders under the Credit and Security Agreement would be entitled to take various actions, including the acceleration of amounts due thereunder and all actions permitted to be taken by a secured creditor. On February 18, 2020, the Company further amended its credit agreement whereby the Company voluntarily prepaid a portion of its term loan under the credit agreement in the amount of \$8.2 million. The Amendment also served to modify the interest rate and fees applicable to the loans under the credit agreement and changes certain covenants related to matters including acquisitions, share repurchases and financial ratios.

The Company was in compliance with its debt covenants as of December 31, 2020, including its most restrictive covenant, the Leverage Ratio. The unused credit available under the credit facility at December 31, 2020 was \$63.0 million, of which we had the ability to borrow \$56.6 million without violating our Leverage Ratio covenant based on the Company's existing consolidated EBITDA.

At December 31, 2020, the Company had \$116.8 million outstanding under its credit agreement. Scheduled principal payments of the long-term debt outstanding are included in "Contractual Obligations" below and in Note 10, "Debt."

For information regarding further commitments under the Company's operating leases, see Note 17, "Commitments and Contingencies."

We are currently engaged in a multi-year process of conforming the majority of our operations onto one global Enterprise Resource Planning system ("ERP"). The ERP is designed to improve the efficiency of our supply chain and financial transaction processes, accurately maintain our books and records, and provide information important to the operation of the business to our management team. The implementation of the ERP is being conducted by business units on a three-phase approach through mid-2021. Since inception of the project, we have incurred costs in a cumulative amount of \$7.0 million in connection with this implementation, of which \$1.8 million in implementation costs was incurred during 2019. These costs are included in SG&A on the consolidated financial statements. No implementation costs were incurred during the year ended December 31, 2020. The first phase of the ERP implementation project was completed in the first quarter of 2019 with the Power Solutions business going live on the new system effective January 1, 2019. The second phase of the project was completed in the first quarter of 2020 with the TRP business going live on the new system effective January 1, 2020. We've achieved annual cost savings on ERP licensing fees of approximately \$2.0 million within SG&A expense which were largely realized in 2019. We anticipate completing the final phase of this project primarily with in-house resources by mid-2021. The preceding sentence represents a Forward-Looking Statement. See "Cautionary Notice Regarding Forward-Looking Information."

Cash Flows

During the year ended December 31, 2020, the Company's cash and cash equivalents increased by \$12.7 million. This increase was primarily due to cash provided by operations of \$46.1 million and proceeds from the sale of properties of \$4.0 million, partially offset by repayments of long-term debt of \$28.2 million, the purchase of property, plant and equipment of \$5.5 million, and payments of \$3.4 million for dividends. Cash provided by operations increased by \$21.7 million in 2020 as compared to 2019, primarily due to improved net earnings coupled with lower year-end inventory levels and accounts receivable balances in 2020.

During the year ended December 31, 2019, the Company's cash and cash equivalents increased by \$18.4 million. This increase was primarily due to cash provided by operations of \$24.5 million and \$32.0 million of net proceeds from borrowing under our revolving credit facility, partially offset by a \$29.0 million payment, net of cash acquired, for the acquisition of the CUI power assets, the purchase of property, plant and equipment of \$9.9 million, repayments of long-term debt of \$3.0 million, and payments of \$3.4 million for dividends. Cash provided by operations increased by \$14.4 million in 2019 as compared to 2018, primarily due to lower year-end inventory levels and accounts receivable balances in 2019.

Cash and cash equivalents, marketable securities and accounts receivable comprised approximately 34.4% and 31.6% of the Company's total assets at December 31, 2020 and December 31, 2019, respectively. The Company's current ratio (i.e., the ratio of current assets to current liabilities) was 3.2 to 1 and 3.1 to 1 at December 31, 2020 and December 31, 2019, respectively.

During the year ended December 31, 2020, accounts receivable decreased \$5.4 million primarily due to more timely collection of receivables which reduced our DSO by the end of 2020. Days sales outstanding (DSO) decreased to 57 days at December 31, 2020 from 60 days at December 31, 2019. Inventories decreased by \$9.7 million from the December 31, 2019 level as raw material levels were lower in response to a decrease in customer demand for our products. Inventory turns, excluding R&D, were 3.4 times per year at each of December 31, 2020 and December 31, 2019.

Contractual Obligations

The following table sets forth at December 31, 2020 the amounts of payments due under specific types of contractual obligations, aggregated by category of contractual obligation, for the time periods described below.

Contractual Obligations	Payments due by period (dollars in thousands)				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Long-term debt obligations(1)	\$ 116,836	\$ 5,948	\$ 110,888	\$ -	\$ -
Interest payments due on long-term debt(2)	4,708	2,510	2,198	-	-
Capital expenditure obligations	2,055	2,055	-	-	-
Operating leases(3)	16,109	7,575	7,076	1,143	315
Raw material purchase obligations	42,541	40,903	1,638	-	-
First quarter 2021 quarterly cash dividend declared	845	845	-	-	-
Total	<u>\$ 183,094</u>	<u>\$ 59,836</u>	<u>\$ 121,800</u>	<u>\$ 1,143</u>	<u>\$ 315</u>

- (1) Represents the principal amount of the debt required to be repaid in each period.
- (2) Includes interest payments required under our CSA related to our term loans and revolver balance. The interest rate in place under our Credit and Security Agreement on December 31, 2020 was utilized and this calculation assumes obligations are repaid when due.
- (3) Represents estimated future minimum annual rental commitments primarily under non-cancelable real and personal property leases as of December 31, 2020.

At December 31, 2020, we had liabilities for unrecognized tax benefits and related interest and penalties of \$28.5 million, most of which is included in other liabilities and the remaining balance of which is included in other current liabilities on our Consolidated Balance Sheet. At December 31, 2020, we cannot reasonably estimate the future period or periods of cash settlement of these liabilities. See Note 9, "Income Taxes," of the Notes to Consolidated Financial Statements for further discussion.

The Company is required to pay SERP obligations at the occurrence of certain events. As of December 31, 2020, \$24.3 million is included in long-term liabilities as an unfunded pension obligation on the Company's consolidated balance sheet. Included in other assets at December 31, 2020 is the cash surrender value of company-owned life insurance and marketable securities held in a rabbi

trust with an aggregate value of \$15.4 million, which has been designated by the Company to be utilized to fund the Company's SERP obligations.

Critical Accounting Policies and Other Matters

The Company's consolidated financial statements include certain amounts that are based on management's best estimates and judgments. Estimates are used when accounting for amounts recorded in connection with mergers and acquisitions, including determination of the fair value of assets and liabilities. Additionally, estimates are used in determining such items as current fair values of goodwill and other intangible assets, as well as provisions related to product returns, bad debts, inventories, intangible assets, investments, SERP expense, income taxes and contingencies and litigation. The Company bases its estimates on historical experience and on various other assumptions, including in some cases future projections, that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. The following accounting policies require accounting estimates that have the potential for significantly impacting Bel's financial statements.

Inventory

The Company makes purchasing and manufacturing decisions principally based upon firm sales orders from customers, projected customer requirements and the availability and pricing of raw materials. Future events that could adversely affect these decisions and result in significant charges to the Company's operations include miscalculating customer requirements, technology changes which render certain raw materials and finished goods obsolete, loss of customers and/or cancellation of sales orders, stock rotation with distributors and termination of distribution agreements. The Company reduces the carrying value of its inventory for estimated obsolescence or unmarketable inventory by an amount equal to the difference between the cost of inventory and the estimated market value based on the aforementioned assumptions. When such inventory is subsequently used in the manufacturing process, the lower adjusted cost of the material is charged to cost of sales and the improved gross profit is recognized at the time the completed product is shipped and the sale is recorded. As of December 31, 2020 and 2019, the Company had reserves for excess or obsolete inventory of \$9.9 million and \$9.1 million, respectively. If actual market conditions are less favorable than those projected by management, additional inventory write-downs may be required.

Goodwill and Indefinite-Lived Intangible Assets

Goodwill is reviewed for possible impairment at least annually on a reporting unit level during the fourth quarter of each year. A review of goodwill may be initiated before or after conducting the annual analysis if events or changes in circumstances indicate the carrying value of goodwill may no longer be recoverable.

A reporting unit is the operating segment unless discrete financial information is prepared and regularly reviewed by management at businesses one level below that operating segment, the "component" level, and the component has economic characteristics that are different from the economic characteristics of the other components of the operating segment, in which case the component is the reporting unit.

While we are permitted to conduct a qualitative assessment to determine whether it is necessary to perform a quantitative goodwill impairment test, for our annual goodwill impairment tests in the fourth quarter of 2020 and 2019, we performed quantitative tests for all of our reporting units that have goodwill allocated.

The goodwill impairment test involves a comparison of the fair value of each of our reporting units with goodwill to its carrying value, including the goodwill allocated to the reporting unit. If the fair value of the reporting unit exceeds its carrying value, there is no indication of impairment and no further testing is required. If the fair value of the reporting unit is less than the carrying value, the difference is recorded as an impairment loss.

We use a fair value approach to test goodwill for impairment. We must recognize a non-cash impairment charge for the amount, if any, by which the carrying amount of goodwill exceeds its implied fair value. We derive an estimate of fair values for each of our reporting units using a combination of an income approach and an appropriate market approach, each based on an applicable weighting. We assess the applicable weighting based on such factors as current market conditions and the quality and reliability of the data. Absent an indication of fair value from a potential buyer or similar specific transactions, we believe that the use of these methods provides a reasonable estimate of a reporting unit's fair value.

Fair value computed by these methods is arrived at using a number of factors, including projected future operating results, anticipated future cash flows, effective income tax rates, comparable marketplace data within a consistent industry grouping, and the cost of capital. There are inherent uncertainties, however, related to these factors and to our judgment in applying them to this analysis. Nonetheless, we believe that the combination of these methods provides a reasonable approach to estimate the fair value of our reporting units. Assumptions for sales, net earnings and cash flows for each reporting unit were consistent among these methods.

Income Approach Used to Determine Fair Values

The income approach is based upon the present value of expected cash flows. Expected cash flows are converted to present value using factors that consider the timing and risk of the future cash flows. The estimate of cash flows used is prepared on an unleveraged debt-free basis. We use a discount rate that reflects a market-derived weighted average cost of capital. We believe that this approach is appropriate because it provides a fair value estimate based upon the reporting unit's expected long-term operating and cash flow performance. The projections are based upon our best estimates of projected economic and market conditions over the related period including growth rates, estimates of future expected changes in operating margins and cash expenditures. Other significant estimates and assumptions include terminal value long-term growth rates, provisions for income taxes, future capital expenditures and changes in future cashless, debt-free working capital.

Market Approach Used to Determine Fair Values

Each year we consider various relevant market approaches that could be used to determine fair value.

The market approach estimates the fair value of the reporting unit by applying multiples of operating performance measures to the reporting unit's operating performance (the "Public Company Method"). These multiples are derived from comparable publicly-traded companies with similar investment characteristics to the reporting unit, and such comparables are reviewed and updated as needed annually. We believe that this approach is appropriate because it provides a fair value estimate using multiples from entities with operations and economic characteristics comparable to our reporting units and the Company. The second market approach is based on the publicly traded common stock of the Company, and the estimate of fair value of the reporting unit is based on the applicable multiples of the Company (the "Quoted Price Method"). The third market approach is based on recent mergers and acquisitions of comparable publicly-traded and privately-held companies in our industries (the "Mergers and Acquisition Method").

The key estimates and assumptions that are used to determine fair value under these market approaches include current and forward 12-month operating performance results and the selection of the relevant multiples to be applied. Under the Public Company and Quoted Price Methods, a control premium, or an amount that a buyer is usually willing to pay over the current market price of a publicly traded company, is applied to the calculated equity values to adjust the public trading value upward for a 100% ownership interest, where applicable.

In order to assess the reasonableness of the calculated fair values of our reporting units, we also compare the sum of the reporting units' fair values to our market capitalization and calculate an implied control premium (the excess of the sum of the reporting units' fair values over the market capitalization). We evaluate the control premium by comparing it to control premiums of recent comparable market transactions. If the implied control premium is not reasonable in light of these recent transactions, we will reevaluate our fair value estimates of the reporting units by adjusting the discount rates and/or other assumptions.

We applied a combined weighting of 25% to the market approach when determining the fair value of these reporting units.

If our assumptions and related estimates change in the future, or if we change our reporting unit structure or other events and circumstances change (such as a sustained decrease in the price of our common stock, a decline in current market multiples, a significant adverse change in legal factors or business climates, an adverse action or assessment by a regulator, heightened competition, strategic decisions made in response to economic or competitive conditions or a more-likely-than-not expectation that a reporting unit or a significant portion of a reporting unit will be sold or disposed of), we may be required to record impairment charges in future periods. Any impairment charges that we may take in the future could be material to our consolidated results of operations and consolidated financial condition.

The Company conducted its annual goodwill impairment test as of October 1, 2020, and no impairment was identified at that time. Management has also concluded that the fair value of its goodwill exceeded the associated carrying value at December 31, 2020 and that no impairment exists as of that date. See Note 4, "Goodwill and Other Intangible Assets," for details of our goodwill balance and the goodwill review performed in 2020.

We will continue to monitor goodwill on an annual basis and whenever events or changes in circumstances, such as significant adverse changes in business climate or operating results, changes in management's business strategy or significant declines in our stock price, indicate that there may be a potential indicator of impairment.

Indefinite-Lived Intangible Assets

The Company annually tests indefinite-lived intangible assets for impairment on October 1, using a fair value approach, the relief-from-royalty method (a form of the income approach). The Company conducted its annual impairment tests as of October 1, 2020 and 2019, and no impairment was identified at either testing date. Management has also concluded that the fair value of its

trademarks exceeds the associated carrying values at December 31, 2020 and that no impairment existed as of that date. At December 31, 2020, the Company's indefinite-lived intangible assets related solely to trademarks.

Long-Lived Assets and Other Intangible Assets

The Company depreciates its property, plant and equipment on a straight-line basis over the estimated useful lives of the assets. Intangible assets with a finite useful life are amortized on a straight-line basis over the estimated useful lives of the assets. Management reviews long-lived assets and other intangible assets for potential impairment whenever significant events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. An impairment exists when the estimated undiscounted cash flows expected to result from the use of an asset and its eventual disposition are less than its carrying amount. If an impairment exists, the resulting write-down would be the difference between the fair market value of the long-lived asset and the related net book value. No material impairments related to long-lived assets or amortized intangible assets were recorded during the years ended December 31, 2020 or 2019.

Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, as measured by enacted tax rates that are expected to be in effect in the periods when the deferred tax assets and liabilities are expected to be settled or realized. Significant judgment is required in determining the worldwide provisions for income taxes. Valuation allowances are provided for deferred tax assets where it is considered more likely than not that the Company will not realize the benefit of such asset. In the ordinary course of a global business, the ultimate tax outcome is uncertain for many transactions. It is the Company's policy not to recognize tax benefits arising from uncertain tax positions that may not be realized in future years as a result of an examination by tax authorities. The Company establishes the provisions based upon management's assessment of exposure associated with permanent tax differences and tax credits applied to temporary difference adjustments. The tax provisions are analyzed periodically (at least quarterly) and adjustments are made as events occur that warrant adjustments to those provisions. The accounting literature requires significant judgment in determining what constitutes an individual tax position as well as assessing the outcome of each tax position. Changes in judgment as to recognition or measurement of tax positions can materially affect the estimate of the effective tax rate and, consequently, affect our operating results.

Revenue Recognition

Revenue is recognized when a customer obtains control of promised goods or services. The amount of revenue recognized reflects the consideration to which the Company expects to be entitled to receive in exchange for these goods and services. Taxes assessed by a governmental authority that are both imposed on and concurrent with a specific revenue-producing transaction, that are collected by the Company from a customer, are excluded from revenue. Shipping and handling costs associated with outbound freight after control over a product has transferred to a customer are accounted for as a fulfillment cost and are included in cost of sales.

During the year ended December 31, 2020, the Company had one direct customer with sales in excess of 10% of Bel's consolidated revenue. Management believes that the loss of this individual customer could have a material adverse effect on our consolidated financial position and results of operations. During the year ended December 31, 2020, the Company had sales of \$55.2 million to this customer, Hon Hai/Foxconn Technology Group, representing 11.9% of Bel's consolidated revenue. Sales to this customer are primarily in the Company's Magnetic Solutions operating segment.

Commitments and Contingencies — Litigation

On an ongoing basis, we assess the potential liabilities and costs related to any lawsuits or claims brought against us. We accrue a liability when we believe a loss is probable and when the amount of loss can be reasonably estimated. Litigation proceedings are evaluated on a case-by-case basis considering the available information, including that received from internal and outside legal counsel, to assess potential outcomes. While it is typically very difficult to determine the timing and ultimate outcome of these actions, we use our best judgment to determine if it is probable that we will incur an expense related to the settlement or final adjudication of these matters and whether a reasonable estimation of the probable loss, if any, can be made. In assessing probable losses, we consider insurance recoveries, if any. We expense legal costs, including those legal costs expected to be incurred in connection with a loss contingency, as incurred. We have in the past adjusted existing accruals as proceedings have continued, been settled or otherwise provided further information on which we could review the likelihood of outflows of resources and their measurability, and we expect to do so in future periods. Due to the inherent uncertainties related to the eventual outcome of litigation and potential insurance recovery, it is possible that disputed matters may be resolved for amounts materially different from any provisions or disclosures that we have previously made.

Other Matters

The Company believes that it has sufficient cash reserves to fund its foreseeable working capital needs. It may, however, seek to expand such resources through bank borrowings, at favorable lending rates, from time to time. If the Company were to undertake another substantial acquisition for cash, the acquisition would either be funded with cash on hand or would be financed in part through cash on hand and in part through bank borrowings or the issuance of public or private debt or equity. If the Company borrows additional money to finance acquisitions, this would further decrease the Company's ratio of earnings to fixed charges, and could further impact the Company's material restrictive covenants, depending on the size of the borrowing and the nature of the target company. Under its existing credit facility, the Company is required to obtain its lender's consent for certain additional debt financing and to comply with other covenants, including the application of specific financial ratios, and may be restricted from paying cash dividends on its common stock. Depending on the nature of the transaction, the Company cannot assure investors that the necessary acquisition financing would be available to it on acceptable terms, or at all, when required. If the Company issues a substantial amount of stock either as consideration in an acquisition or to finance an acquisition, such issuance may dilute existing stockholders and may take the form of capital stock having preferences over its existing common stock.

New Financial Accounting Standards

The discussion of new financial accounting standards applicable to the Company is incorporated herein by reference to Note 1, "Description of Business and Summary of Significant Accounting Policies."

Item 7A. *Quantitative and Qualitative Disclosures About Market Risk*

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and Board of Directors of Bel Fuse Inc.
Jersey City, New Jersey

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Bel Fuse Inc. and subsidiaries (the "Company") as of December 31, 2020 and 2019, the related consolidated statements of operations, comprehensive income (loss), stockholders' equity, and cash flows for each of the two years in the period ended December 31, 2020, and the related notes (collectively referred to as the "financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2020 and 2019, and the results of its operations and its cash flows for each of the two years in the period ended December 31, 2020, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by COSO.

Basis for Opinions

The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on these financial statements and an opinion on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the financial statements included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures to respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current-period audit of the financial statements that were communicated or required to be communicated to the audit committee and that (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Goodwill - Cinch Connectivity Solutions Europe (“CCS”), Power Solutions & Protection Europe (“PSP”), and CUI Power (“CUI”) Reporting Units – Refer to Notes 1 and 4 to the Financial Statements

Critical Audit Matter Description

The Company’s evaluation of goodwill for impairment involves the comparison of the fair value of each reporting unit to its carrying value. The Company estimates the fair value of its reporting units using a weighting of fair values derived from income and market approaches, which requires management to make significant estimates and assumptions related to the weighted-average cost of capital (“WACC”), long-term growth rates, forecasts of future revenues and profitability measures, and valuation multiples. Changes in these assumptions could have a significant impact on the fair value. The Company performed their annual impairment assessment of its CCS, PSP and CUI reporting units as of October 1, 2020. CCS and PSP’s operations are sensitive to changes in the European economy, while CUI’s operations are sensitive to changes in the North America economy.

The goodwill balance was \$24.0 million as of December 31, 2020, of which \$7.9 million was related to CCS, \$5.2 million was related to PSP, and \$10.9 million relating to CUI. The Company determined that the fair value of these reporting units exceeded their carrying value.

Given the significant judgments made by management to estimate the fair value of its reporting units, performing audit procedures to evaluate the reasonableness of management’s estimates and assumptions related to WACCs, long-term growth rates, forecasts of future revenues and profitability measures, and valuation multiples, specifically due to the sensitivity of the Company’s operations to changes in the global economy, required a high degree of auditor judgment and an increased extent of effort, including the need to involve our fair value specialists.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to WACCs, long-term growth rates, forecasts of future revenue and profitability measures, and valuation multiples to determine the fair value of the Company’s CCS, PSP and CUI reporting units included the following, among others:

- We tested the effectiveness of controls over management’s goodwill impairment evaluation, including those over the determination of the fair value of CCS, PSP and CUI, such as controls related to management’s selection of the WACCs, long-term growth rates, forecasts of future revenues and profitability measures, selection of guideline public companies, valuation multiples, and application of company specific risk premiums.
- We evaluated management’s ability to accurately forecast future revenues and profitability measures by comparing actual results to management’s historical forecasts.
- We evaluated the reasonableness of management’s revenue and profitability forecasts by comparing the forecasts to (1) internal communications to management and the Board of Directors and (2) forecasted information included in Company press releases as well as in analyst and industry reports for the Company and certain of its peer companies.
- With the assistance of our fair value specialists, we evaluated the reasonableness of the (1) valuation methodology, (2) selected WACCs, (3) long-term growth rates and (4) market related assumptions including guideline public companies and valuation multiples by testing the source information underlying the determination of the WACCs, long-term growth rates and market related assumptions and the mathematical accuracy of the calculation.

Indefinite-Lived Intangible Assets – Cinch, Connectivity Solutions and CUI Trademarks — Refer to Notes 1 and 4 to the financial statements

Critical Audit Matter Description

The Company's evaluation of indefinite-lived intangible assets for impairment involves the comparison of the fair value of each indefinite-lived intangible asset to its carrying value. The Company estimates the fair value of its trademark intangible assets using the relief-from-royalty approach, which requires management to make significant estimates and assumptions related to the WACCs, royalty rates, and long-term growth rates. Changes in these assumptions could have a significant impact on the fair value. The Company performed their annual impairment assessment of its trademarks as of October 1, 2020.

The trademark intangible asset balance as of December 31, 2020 was \$17.0 million, of which the Cinch Connectivity Solutions trademark was \$10.4 million, and the CUI trademark intangible asset was \$5 million. The Company determined that the fair value of these trademarks exceeded their carrying value.

Given the fair value determination of trademark intangibles requires management to make significant estimates and assumptions related to WACCs, royalty rates, and long-term growth rates, performing audit procedures to evaluate the reasonableness of these assumptions required a high degree of auditor judgment and an increased extent of effort, including the need to involve our fair value specialists.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the WACCs, royalty rates, and long-term growth rates for the trademark intangibles included the following, among others:

- We tested the effectiveness of controls over the valuation of trademark intangible assets, including management's controls over forecasts of projected revenue, and selection of WACCs, royalty rates, long-term growth rates and other valuation assumptions.
- We assessed the reasonableness of management's forecasts of future revenues by comparing the projections to historical results and certain peer companies.
- With the assistance of our fair value specialists, we evaluated the reasonableness of the (1) valuation methodology, (2) selected WACCs, (3) royalty rates, and (4) long-term growth rates by testing the source information underlying the determination of the WACCs, royalty rates and long-term growth rates and testing the mathematical accuracy of the calculation.
- We evaluated whether the estimated projected revenues and long-term growth rates were consistent with evidence obtained in other areas of the audit.

/s/ Deloitte & Touche LLP

New York, New York
March 12, 2021

We have served as the Company's auditor since 1983.

BEL FUSE INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

AS OF AND FOR THE YEARS ENDED DECEMBER 31, 2020 AND 2019

1. DESCRIPTION OF BUSINESS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Bel Fuse Inc. and subsidiaries ("Bel," the "Company," "we," "us," and "our") design, manufacture and sell a broad array of products that power, protect and connect electronic circuits. These products are used in the networking, telecommunication, high-speed data transmission, commercial aerospace, military, broadcasting, transportation and consumer electronic industries around the world. We manage our operations by product group through our reportable operating segments, Cinch Connectivity Solutions, Power Solutions and Protection and Magnetic Solutions, in addition to a Corporate segment.

All amounts included in the tables to these notes to consolidated financial statements, except per share amounts, are in thousands.

Principles of Consolidation - The consolidated financial statements include all of the accounts of the Company and its wholly owned subsidiaries. All intercompany transactions and balances have been eliminated in consolidation.

Reclassifications - During the fourth quarter of 2020, the Company changed its financial statement presentation related to gain/loss on its SERP investments. These gains/losses were previously included within cost of sales and selling, general and administrative expense. Gains on SERP investments in the amount of \$1.1 million and \$2.1 million have been reclassified from cost of sales and selling, general and administrative expense to other (expense) income, net on the accompanying statements of operations for the years ended December 31, 2020 and 2019, respectively.

Use of Estimates - The preparation of the consolidated financial statements in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP") requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates, including but not limited to those related to product returns, provisions for bad debt, inventories, goodwill, intangible assets, investments, Supplemental Executive Retirement Plan ("SERP") expense, income taxes, contingencies, litigation and the impact related to tax reform. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Cash Equivalents - Cash equivalents include short-term investments in money market funds and certificates of deposit with an original maturity of three months or less when purchased. Accounts at each U.S. institution are insured by the Federal Deposit Insurance Corporation ("FDIC") up to \$250,000. Some of our balances are in excess of the FDIC insured limit.

Allowance for Doubtful Accounts - We maintain an allowance for doubtful accounts for estimated losses from the inability of our customers to make required payments. We determine our allowance by both specific identification of customer accounts where appropriate and the application of historical loss experience to non-specific accounts.

Effects of Foreign Currency - In non-U.S. locations that are not considered highly inflationary, we translate the non-equity components of our foreign balance sheets at the end of period exchange rates with translation adjustments accumulated within stockholders' equity on our consolidated balance sheets. We translate the statements of operations at the average exchange rates during the applicable period. In connection with foreign currency denominated transactions, including multi-currency intercompany payable and receivable transactions and loans, the Company incurred net realized and unrealized currency exchange (losses) gains of (\$2.2) million and \$0.1 million for the years ended December 31, 2020 and 2019, respectively, which were included in other (expense) income, net on the consolidated statements of operations.

Concentration of Credit Risk - Financial instruments which potentially subject us to concentrations of credit risk consist principally of accounts receivable and temporary cash investments. We grant credit to customers that are primarily original equipment manufacturers and to subcontractors of original equipment manufacturers based on an evaluation of the customer's financial condition, without requiring collateral. Exposure to losses on receivables is principally dependent on each customer's financial condition. We control our exposure to credit risk through credit approvals, credit limits and monitoring procedures and establish allowances for anticipated losses. See Note 12, "Segments," for disclosures regarding significant customers.

We place temporary cash investments with quality financial institutions and commercial issuers of short-term paper and, by policy, limit the amount of credit exposure in any one financial instrument.

Inventories - Inventories are stated at the lower of weighted-average cost or market. Costs related to inventories include raw materials, direct labor and manufacturing overhead which are included in cost of sales on the consolidated statements of operations. The Company utilizes the average cost method in determining amounts to be removed from inventory.

Revenue Recognition – Revenue is recognized when a customer obtains control of promised goods or services. The amount of revenue recognized reflects the consideration to which the Company expects to be entitled to receive in exchange for these goods and services. Taxes assessed by a governmental authority that are both imposed on and concurrent with a specific revenue-producing transaction, that are collected by the Company from a customer, are excluded from revenue. Shipping and handling costs associated with outbound freight after control over a product has transferred to a customer are accounted for as a fulfillment cost and are included in cost of sales.

Product Warranties – Warranties vary by product line and are competitive for the markets in which the Company operates. Warranties generally extend for one to three years from the date of sale, providing customers with assurance that the related product will function as intended. The Company reviews its warranty liability quarterly based on an analysis of actual expenses and failure rates accompanied with estimated future costs and projected failure rate trends. Factors taken into consideration when evaluating our warranty reserve are (i) historical claims for each product, (ii) volume increases, (iii) life of warranty, (iv) historical warranty repair costs and (v) other factors. To the extent that actual experience differs from our estimate, the provision for product warranties will be adjusted in future periods. Actual warranty repair costs are charged against the reserve balance as incurred. See Note 11, "Accrued Expenses."

Product Returns – We estimate product returns, including product exchanges under warranty, based on historical experience. In general, the Company is not contractually obligated to accept returns except for defective product or in instances where the product does not meet the Company's product specifications. However, the Company may permit its customers to return product for other reasons. In certain instances, the Company would generally require a significant cancellation penalty payment by the customer. The Company estimates such returns, where applicable, based upon management's evaluation of historical experience, market acceptance of products produced and known negotiations with customers. Such estimates are deducted from sales and provided for at the time revenue is recognized. Distribution customers often receive what is referred to as "ship and debit" arrangements, whereby Bel will invoice them at an agreed upon unit price upon shipment of product and a price reduction may be granted if the market price of the product declines after shipment. Distributors may also be entitled to special pricing discount credits, and certain customers are entitled to return allowances based on previous sales volumes. Bel deducts estimates for anticipated credits, refunds and returns from sales each quarter based on historical experience.

Goodwill and Identifiable Intangible Assets – Goodwill represents the excess of the aggregate of the following (1) consideration transferred, (2) the fair value of any noncontrolling interest in the acquiree and, (3) if the business combination is achieved in stages, the acquisition-date fair value of our previously held equity interest in the acquiree over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed.

Identifiable intangible assets consist primarily of patents, licenses, trademarks, trade names, customer lists and relationships, non-compete agreements and technology-based intangibles and other contractual agreements. We amortize finite lived identifiable intangible assets over the shorter of their stated or statutory duration or their estimated useful lives, ranging from 1 to 16 years, on a straight-line basis to their estimated residual values and periodically review them for impairment. Total identifiable intangible assets comprise 14.5% and 15.4% at December 31, 2020 and 2019, respectively, of our consolidated total assets.

We use the acquisition method of accounting for all business combinations and do not amortize goodwill or intangible assets with indefinite useful lives. Goodwill and intangible assets with indefinite useful lives are tested for possible impairment annually during the fourth quarter of each fiscal year or more frequently if events or changes in circumstances indicate that the asset might be impaired.

Impairment and Disposal of Long-Lived Assets – For definite-lived intangible assets, such as customer relationships, contracts, intellectual property, and for other long-lived assets, such as property, plant and equipment, whenever impairment indicators are present, we perform a review for impairment. We calculate the undiscounted value of the projected cash flows associated with the asset, or asset group, and compare this estimated amount to the carrying amount. If the carrying amount is found to be greater, we record an impairment loss for the excess of book value over the fair value. In addition, in all cases of an impairment review, we re-evaluate the remaining useful lives of the assets and modify them, as appropriate.

For indefinite-lived intangible assets, such as trademarks and trade names, each year and whenever impairment indicators are present, we determine the fair value of the asset and record an impairment loss for the excess of book value over the fair value, if any. In addition, in all cases of an impairment review we re-evaluate whether continuing to characterize the asset as indefinite-lived is appropriate. See Note 4, "Goodwill and Other Intangible Assets," for additional details.

Depreciation - Property, plant and equipment are stated at cost less accumulated depreciation and amortization. Depreciation and amortization are calculated primarily using the straight-line method over the estimated useful life of the asset. The estimated useful

lives primarily range from 1 to 33 years for buildings and leasehold improvements, and from 2 to 15 years for machinery and equipment.

Income Taxes - We account for income taxes under the asset and liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the consolidated financial statements. Under this method, deferred tax assets and liabilities are determined based on the differences between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in income in the period that includes the enactment date. See Note 9, "Income Taxes".

We record net deferred tax assets to the extent we believe these assets will more-likely-than-not be realized. In making such determination, we consider all available positive and negative evidence, including future reversals of existing taxable temporary differences, projected future taxable income, tax planning strategies and recent financial operations. We have established valuation allowances for deferred tax assets that are not likely to be realized. In the event we were to determine that we would be able to realize our deferred income tax assets in the future in excess of our net recorded amount, we would adjust the valuation allowance, which would reduce the provision for income taxes.

We establish liabilities for tax contingencies when, despite the belief that our tax return positions are fully supported, it is more likely than not that certain positions may be challenged and may not be fully sustained. The tax contingency liabilities are analyzed on a quarterly basis and adjusted based upon changes in facts and circumstances, such as the conclusion of federal and state audits, expiration of the statute of limitations for the assessment of tax, case law and emerging legislation. Our effective tax rate includes the effect of tax contingency liabilities and changes to the liabilities as considered appropriate by management.

Earnings (Loss) per Share – We utilize the two-class method to report our earnings (loss) per share. The two-class method is an earnings (loss) allocation formula that determines earnings (loss) per share for each class of common stock according to dividends declared and participation rights in undistributed earnings (losses). The Company's Certificate of Incorporation, as amended, states that Class B common shares are entitled to dividends at least 5% greater than dividends paid to Class A common shares, resulting in the two-class method of computing earnings (loss) per share. In computing earnings (loss) per share, the Company has allocated dividends declared to Class A and Class B based on amounts actually declared for each class of stock and 5% more of the undistributed earnings (losses) have been allocated to Class B shares than to the Class A shares on a per share basis. Basic earnings (loss) per common share are computed by dividing net earnings (loss) by the weighted-average number of common shares outstanding during the period. Diluted earnings (loss) per common share, for each class of common stock, are computed by dividing net earnings (loss) by the weighted-average number of common shares and potential common shares outstanding during the period. There were no potential common shares outstanding during the years ended December 31, 2020 and 2019 which would have had a dilutive effect on earnings (loss) per share.

The earnings (loss) and weighted average shares outstanding used in the computation of basic and diluted earnings (loss) per share are as follows:

	Years Ended December 31,	
	2020	2019
Numerator:		
Net earnings (loss)	\$ 12,795	\$ (8,743)
Less dividends declared:		
Class A	515	518
Class B	2,852	2,834
Undistributed earnings (loss)	<u>\$ 9,428</u>	<u>\$ (12,095)</u>
Undistributed earnings (loss) allocation:

Net earnings (loss) per share:		
Class A	<u>\$ 0.97</u>	<u>\$ (0.71)</u>
Class B	<u>\$ 1.05</u>	<u>\$ (0.71)</u>

Research and Development ("R&D") - Our engineering groups are strategically located around the world to facilitate communication with and access to customers' engineering personnel. This collaborative approach enables partnerships with customers for technical development efforts. On occasion, we execute non-disclosure agreements with our customers to help develop proprietary, next generation products destined for rapid deployment. R&D costs are expensed as incurred, and are shown as a separate line within operating expenses on the consolidated statements of operations. Generally, R&D is performed internally for the benefit of the Company. R&D costs include salaries, building maintenance and utilities, rents, materials, administration costs and miscellaneous other items. R&D expenses for the years ended December 31, 2020 and 2019 amounted to \$23.6 million and \$26.9 million, respectively.

Fair Value Measurements - We utilize the accounting guidance for fair value measurements and disclosures for all financial assets and liabilities and nonfinancial assets and liabilities that are recognized or disclosed at fair value in the consolidated financial statements on a recurring basis or on a nonrecurring basis during the reporting period. The fair value is an exit price, representing the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants based upon the best use of the asset or liability at the measurement date. The Company utilizes market data or assumptions that market participants would use in pricing the asset or liability. We classify our fair value measurements based on the lowest level of input included in the established three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers are defined as follows:

Level 1 - Observable inputs such as quoted market prices in active markets

Level 2 - Inputs other than quoted prices in active markets that are either directly or indirectly observable

Level 3 - Unobservable inputs about which little or no market data exists, therefore requiring an entity to develop its own assumptions

For financial instruments such as cash and cash equivalents, accounts receivable, accounts payable and accrued expenses, the carrying amount approximates fair value because of the short maturities of such instruments. See Note 5, "Fair Value Measurements," for additional disclosures related to fair value measurements.

Recently Issued Accounting Standards

Recently Adopted Accounting Standards

In August 2018, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2018-13, *Fair Value Measurement (Topic 820): Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement*. The updated guidance improves the disclosure requirements on fair value measurements. The updated guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. The Company adopted the updated provisions effective January 1, 2020. The adoption did not have a material impact on the Company's consolidated financial position or consolidated results of operations.

In August 2018, the FASB issued ASU 2018-15, *Intangibles – Goodwill and Other-Internal-Use Software (Subtopic 350-40): Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That is a Service Cost*. This guidance aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. This guidance is effective for interim and annual reporting periods beginning after December 15, 2019. The Company adopted this guidance effective January 1, 2020 and it did not have a material impact on its consolidated financial position or consolidated results of operations.

In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842)* ("ASU 2016-02"), to provide a new comprehensive model for lease accounting. Under this guidance, lessees and lessors should apply a "right-of-use" model in accounting for all leases (including subleases) and eliminate the concept of operating leases and off-balance sheet leases. Recognition, measurement and presentation of expenses will depend on classification as a finance or operating lease. Similar modifications have been made to lessor accounting in-line with revenue recognition guidance. This guidance was effective for annual periods and interim periods within those annual periods beginning after December 15, 2018. The amendments also require certain quantitative and qualitative disclosures about leasing arrangements.

The Company adopted ASU 2016-02, as amended, effective January 1, 2019 using the modified retrospective approach. In connection with the adoption, we elected to utilize the Comparatives Under 840 Option whereby the Company will continue to present prior period financial statements and disclosures under ASC 840. In addition, we elected the transition package of three practical expedients permitted within the standard, which eliminates the requirements to reassess prior conclusions about lease identification, lease classification and initial direct costs. Further, we elected a short-term lease exception policy, permitting us to not apply the recognition requirements of this standard to short-term leases (i.e. leases with terms of 12 months or less) and an accounting policy to account for lease and non-lease components as a single component for certain classes of assets. We implemented a new lease system to facilitate the requirements of the new standard and completed the necessary changes to our accounting policies, processes, disclosures and internal control over financial reporting.

Adoption of the new standard resulted in the recording of right-of-use assets in the amount of \$20.7 million and lease liabilities related to our operating leases in the amount of \$21.0 million on our consolidated balance sheet as of January 1, 2019. The standard did not materially affect the Company's consolidated net earnings or have any impact on cash flows. See Note 16, "Leases", for Topic 842 disclosures in connection with the adoption of ASU 2016-02.

In February 2018, the FASB issued ASU 2018-02, *Income Statement – Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income*. This guidance allows a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the U.S. Tax Cuts and Jobs Act, which was enacted on December 22, 2017. This guidance is effective for all entities for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years and should be applied either in the period of adoption or retrospectively to each period in which the effect of the change in the U.S. federal corporate income tax rate in the U.S. Tax Cuts and Jobs Act is recognized. This guidance was adopted by the Company effective January 1, 2019. In accordance with this guidance, the Company reclassified \$0.5 million of stranded tax effects from accumulated other comprehensive income to retained earnings within the equity section of the consolidated balance sheet as of January 1, 2019. The adoption of this guidance did not have a material impact on the Company's consolidated financial statements.

In May 2018, the FASB issued ASU 2018-07, *Compensation – Stock Compensation (Topic 718): Improvements to Nonemployee Share-Based Payment Accounting*, which simplifies the accounting for share-based payments granted to nonemployees for goods and services. This guidance will better align the treatment of share-based payments to nonemployees with the requirements for such share-based payments granted to employees. This guidance is effective for all public entities for fiscal years beginning after December 15, 2018, including interim periods within that year. This guidance was adopted by the Company effective January 1, 2019 and did not have a material impact on the Company's consolidated financial statements.

In January 2017, the FASB issued ASU 2017-04, *Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment* ("ASU 2017-04"). ASU 2017-04 simplifies how an entity is required to test goodwill for impairment by eliminating

Step 2 from the goodwill impairment test. Early adoption is permitted for interim and annual goodwill impairment tests performed on testing dates after January 1, 2017. The Company elected to early adopt ASU 2017-04 effective July 1, 2019 and accounted for the goodwill impairment charge discussed in Note 4 under this guidance.

Accounting Standards Issued But Not Yet Adopted

In June 2016, the FASB issued ASU No. 2016-13, *Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments* (“ASU 2016-13”), as amended. The new guidance will broaden the information that an entity must consider in developing its expected credit loss estimates related to its financial instruments and adds to U.S. GAAP an impairment model that is based on expected losses rather than incurred losses. The amendment is currently effective for the Company for annual reporting periods beginning after December 15, 2022, with early adoption permitted. Management is currently assessing the impact of ASU 2016-13, but it is not expected to have a material impact on the Company’s consolidated financial statements.

In August 2018, the FASB issued ASU 2018-14, *Compensation-Retirement Benefits-Defined Benefit Plans-General (Subtopic 715-20): Disclosure Framework – Changes to the Disclosure Requirements for Defined Benefit Plans* (“ASU 2018-14”). This guidance removes certain disclosures that are not considered cost beneficial, clarifies certain required disclosures and adds additional disclosures. The standard is effective for fiscal years ending after December 15, 2020. The amendments in ASU 2018-14 would need to be applied on a retrospective basis. The Company is currently assessing the impact the new guidance will have on the Company's disclosures.

In December 2019, the FASB issued ASU 2019-12, *Simplifying the Accounting for Income Taxes* (“ASU 2019-12”), which modifies ASC 740 to reduce complexity while maintaining or improving the usefulness of the information provided to users of financial statements. ASU 2019-12 is effective for the Company for interim and annual reporting periods beginning after December 15, 2021. The Company is currently assessing the impact of ASU 2019-12, but it is not expected to have a material impact on the Company’s consolidated financial statements.

2. ACQUISITIONS

Agreement to Acquire EOS Power:

On November 25, 2020, the Company entered into a stock purchase agreement (the “Agreement”) with EOS Power Panama Inc. to acquire substantially all of the issued and outstanding shares of EOS Power India Private Ltd. (“EOS”). The Agreement provides for the assumption of certain liabilities and the purchase price is subject to closing working capital adjustments. Based in Mumbai, India, the EOS business had 2020 sales of approximately \$12 million, and manufactures power products that are well known in the market and the distribution channels in which EOS operates. The acquisition of EOS is expected to increase Bel's Power Solution presence in the industrial and medical markets. EOS has developed a strong line of high-power density and low-profile products with high convection ratings that support these same markets. Importantly, this acquisition will allow Bel to extend its manufacturing footprint outside of China through a turnkey operation that has an established local supply chain and onsite technical expertise for design and manufacturing. The transaction is expected to close by the end of the first quarter of 2021. The purchase price, estimated to be approximately \$7.0 million (after working capital adjustments), is expected to be funded with cash on hand.

CUI Acquisition:

On December 3, 2019, the Company completed the acquisition of the majority of the power supply products business of CUI Inc. (the “CUI power business”) through an asset purchase agreement with CUI Global Inc. for \$29.2 million (after a working capital adjustment), plus the assumption of certain liabilities. The CUI power business, headquartered in Tualatin, Oregon, designs and markets a broad portfolio of AC/DC and DC/DC power supplies and board level components. The acquisition of the CUI power business enhanced Bel's existing offering of power products, allowing us to better address more of our customers' power needs. It also introduced an alternative business model to Bel's, one which carries a higher gross margin profile and lower manufacturing risk.

The results of operations of the CUI power business have been included in the Company's consolidated financial statements for the period subsequent to its acquisition date. During the years ended December 31, 2020 and December 31, 2019, the CUI power business contributed revenue of \$43.1 million and \$2.2 million, respectively, and operating income (loss) of \$6.8 million and (\$0.4) million, respectively, to the Company's consolidated financial results. During each of the years ended December 31, 2020 and December 31, 2019, the Company incurred \$0.2 million in acquisition-related costs relating the CUI acquisition. These costs are included in selling, general and administrative expense in the accompanying consolidated statement of operations.

The accounting related to the acquisition of the CUI power business has been finalized. The following table depicts the Company’s acquisition date fair values of the combined consideration transferred and identifiable net assets acquired in this transaction:

	Acquisition-Date Fair Values	Measurement Period Adjustments	Acquisition-Date Fair Values (As adjusted)
Total identifiable assets	\$ 9,764	\$ 15,412	\$ 25,176
Total liabilities assumed	(6,855)	-	(6,855)
Net identifiable assets acquired	2,909	15,412	18,321
Goodwill	29,091	(18,216)	10,875
Net assets acquired	<u>\$ 32,000</u>	<u>\$ (2,804)</u>	<u>\$ 29,196</u>
Cash paid	32,000	(2,804)	29,196
Fair value of consideration transferred	<u>\$ 32,000</u>	<u>\$ (2,804)</u>	<u>\$ 29,196</u>

The identifiable assets acquired included \$11.0 million assigned to customer relationships, which is being amortized over its estimated future life of 13 years utilizing the straight-line method, and \$5.0 million assigned to the CUI tradename, which is concluded to have an indefinite life. The goodwill noted above related to the CUI acquisition was allocated to the Company's Power Solutions and Protection operating segment at the time of acquisition. The Company has determined that all of the goodwill and intangible assets associated with the CUI acquisition will be deductible for tax purposes.

The following unaudited pro forma information presents a summary of the combined results of operations of the Company and the results of CUI for the periods presented as if the acquisition had occurred on January 1, 2019, along with certain pro forma adjustments. These pro forma adjustments give effect to the amortization of certain definite-lived intangible assets, interest expense related to the financing of the business combination, and related tax effects. The pro forma results do not reflect the realization of any potential cost savings, or any related integration costs. Certain cost savings may result from the acquisition; however, there can be no assurance that these cost savings will be achieved. The unaudited pro forma results are presented for illustrative purposes only and are not necessarily indicative of the results that would have actually been obtained if the acquisition had occurred on the assumed date, nor is the pro forma data intended to be a projection of results that may be obtained in the future:

	Year Ended December 31, 2019
Revenue	\$ 522,128
Net loss	(7,715)
Loss per Class A common share - basic and diluted	(0.63)
Loss per Class B common share - basic and diluted	(0.63)

3. REVENUE

Nature of Goods and Services

Our revenues are substantially derived from sales of our products.

In our Cinch Connectivity Solutions product group, we provide connectors and cable assemblies to the aerospace, military/defense, commercial, rugged harsh environment and communication markets. This group also includes passive jacks, plugs and cable assemblies that provide connectivity in networking equipment, as well as modular plugs and cable assemblies used within the structured cabling system, known as premise wiring.

In our Power Solutions and Protection group, we provide AC/DC and DC/DC power conversion devices and circuit protection products. Applications range from board-mount power to system-level architectures for servers, storage, networking, industrial and transportation.

In our Magnetic Solutions group, we provide an extensive line of integrated connector modules (ICM), where an Ethernet magnetic solution is integrated into a connector package. Products within the Company's magnetic solutions group are primarily used in networking and industrial applications.

The Company also provides incremental services to our customers in the form of training, technical support, special tooling, and other support as deemed necessary from time to time. For purposes of ASC 606, all such incremental services were concluded to be immaterial in the context of the contracts.

Types of Contracts

Substantially all of the Company's revenue is derived from contracts with its customers under one of the following types of contracts:

- **Direct with customer:** This includes contracts with original equipment manufacturers (OEMs), original design manufacturers (ODMs), and contract manufacturers (CMs). The nature of Bel's products are such that they represent components which are installed in various end applications (*e.g.*, servers, aircraft, missiles and rail applications). The OEMs, ODMs or CMs that purchase our product for further installation are our end customers. Contracts with these customers are broad-based and cover general terms and conditions. Details such as order volume and pricing are typically contained in individual purchase orders, and as a result, we view each product on each purchase order as an individual performance obligation. Incremental services included in the contracts, such as training, tooling and other customer support are determined to be immaterial in the context of the contract, both individually and in the aggregate. Revenue under these contracts is generally recognized at a point in time, generally upon shipping or delivery, which closely mirrors the shipping terms dictated by the applicable contract.
- **Distributor:** Distribution customers buy product directly from Bel and sell it in the marketplace to end customers. Bel contracts directly with the distributor. These contracts are typically global in nature and cover a variety of our product groups. Similar to contracts with OEMs, ODMs and CMs, each product on each purchase order is considered an individual performance obligation. Revenue is recognized at a point in time, generally upon shipping or delivery, which closely mirrors the shipping terms dictated by the applicable contract.
- **Customer-Designated Hub Arrangements:** These customers operate under a type of concession agreement whereby the Company ships goods to a warehouse or hub, where they will be pulled by the customer at a later date. The terms specified in the customer-designated hub contracts specify that the Company will not invoice the customer for product until it is pulled from the warehouse or hub. Once product arrives at the hub, it is generally not returned to Bel unless there is a warranty issue (see "Warranties" section below). Similar to the contracts described above, each product on each purchase order is considered an individual performance obligation. Under ASC 606, it was determined that the majority of these hubs are customer-controlled, and therefore control transfers to the customer upon either delivery from Bel's warehouse, or arrival at the customer-controlled hub, depending upon the applicable shipping terms. Revenue is therefore recognized as control of the product is transferred to the customer (for customer-controlled hubs, this is at the time product is shipped to the hub). The accompanying consolidated balance sheet reflects a corresponding unbilled receivable balance, as we do not have the right to invoice the customer until product is pulled from the hub.
- **Licensing Agreements:** License agreements are only applicable to our Power Solutions and Protection product group, and include provisions for Bel to receive sales-based royalty income related to the licensing of Bel's patents or other intellectual property (IP) utilized by a third-party entity. Income related to these agreements is tracked by the licensee throughout the year based on their sales of product that utilize Bel's IP, and that data is reported to Bel either on a quarterly or annual basis, with payment generally received within 30 days of the reporting date. Our performance obligation is satisfied upon delivery of the IP at the beginning of the license period, as the licenses are functional in nature. However, the recognition of revenue associated with these licenses is subject to the sales- or usage-based constraint on variable consideration. As such, the Company records a constrained estimate of this variable consideration as royalty income in the period of the underlying customers' product sales, with adjustments made as actual licensee sales data becomes available.

Significant Payment Terms

Contracts with customers indicate the general terms and conditions in which business will be conducted for a set period of time. Individual purchase orders state the description, quantity and price of each product purchased. Payment for products sold under direct contracts with customers or contracts with distributors is typically due in full within 30-90 days from the transfer of title to customer. Payment for products sold under our customer-designated hub arrangements is typically due within 60 days of the customer pulling the product from the hub. Payment due related to our licensing agreements is generally within 30 days of receiving the licensee sales data, which is either on a quarterly or annual basis.

Since the customer agrees to a stated price for each product on each purchase order, the majority of contracts are not subject to variable consideration. However, the "ship and debit" arrangements with distributors, royalty income associated with our licensing agreements, and the product returns described above are each deemed to be variable consideration which requires the Company to make constrained estimates based on historical data.

Disaggregation of Revenue

The following table provides information about disaggregated revenue by geographic region and sales channel, and includes a reconciliation of the disaggregated revenue to our reportable segments:

Year Ended December 31, 2020				
	Cinch Connectivity Solutions	Power Solutions and Protection	Magnetic Solutions	Consolidated
<i>By Geographic Region:</i>				
North America	\$ 112,663	\$ 123,014	\$ 29,999	\$ 265,676
Europe	30,017	34,447	6,328	70,792
Asia	8,051	24,027	97,225	129,303
	<u>\$ 150,731</u>	<u>\$ 181,488</u>	<u>\$ 133,552</u>	<u>\$ 465,771</u>
<i>By Sales Channel:</i>				
Direct to customer	\$ 95,853	\$ 113,570	\$ 108,727	\$ 318,150
Through distribution	54,878	67,918	24,825	147,621
	<u>\$ 150,731</u>	<u>\$ 181,488</u>	<u>\$ 133,552</u>	<u>\$ 465,771</u>
Year Ended December 31, 2019				
	Cinch Connectivity Solutions	Power Solutions and Protection	Magnetic Solutions	Consolidated
<i>By Geographic Region:</i>				
North America	\$ 128,096	\$ 93,540	\$ 34,408	\$ 256,044
Europe	33,099	41,016	7,507	81,622
Asia	11,153	28,972	114,621	154,746
	<u>\$ 172,348</u>	<u>\$ 163,528</u>	<u>\$ 156,536</u>	<u>\$ 492,412</u>
<i>By Sales Channel:</i>				
Direct to customer	\$ 113,115	\$ 110,587	\$ 132,911	\$ 356,613
Through distribution	59,233	52,941	23,625	135,799
	<u>\$ 172,348</u>	<u>\$ 163,528</u>	<u>\$ 156,536</u>	<u>\$ 492,412</u>

Contract Assets and Contract Liabilities:

A contract asset results when goods or services have been transferred to the customer but payment is contingent upon a future event, other than passage of time. In the case of our consignment arrangements, we are unable to invoice the customer until product is pulled from the hub by the customer, which generates an unbilled receivable (a contract asset) when revenue is initially recognized.

A contract liability results when cash payments are received or due in advance of our performance obligation being met. We have certain customers who provide payment in advance of product being shipped, which results in deferred revenue (a contract liability).

The balances of the Company's contract assets and contract liabilities at December 31, 2020 and December 31, 2019 are as follows:

	December 31, 2020	December 31, 2019
Contract assets - current (unbilled receivable)	\$ 14,135	\$ 16,318
Contract liabilities - current (deferred revenue)	\$ 2,077	\$ 653

The change in balance of our unbilled receivables from December 31, 2019 to December 31, 2020 primarily relates to a timing difference between the Company's performance (i.e. when our product is shipped to a customer-controlled hub) and the point at which the Company can invoice the customer per the terms of the customer contract (i.e. when the customer pulls our product from the customer-controlled hub).

A tabular presentation of the activity within the deferred revenue account for the year ended December 31, 2020 is presented below:

	Year Ended December 31, 2020
Balance, January 1	\$ 653
New advance payments received	7,798
Recognized as revenue during period	(6,380)
Currency translation	6
Balance, December 31	<u>\$ 2,077</u>

Transaction Price Allocated to Future Obligations:

The aggregate amount of transaction price allocated to remaining performance obligations that have not been satisfied as of December 31, 2020 related to contracts that exceed one year in duration amounted to \$8.6 million, with expected contract expiration dates that range from 2022 - 2025. It is expected that 63% of this aggregate amount will be recognized in 2022, 6% will be recognized in 2023 and the remainder will be recognized in years beyond 2023. The majority of the Company's total backlog of orders at December 31, 2020 is related to contracts that have an original expected duration of one year or less, for which the Company is electing to utilize the practical expedient available within the guidance, and are excluded from the transaction price related to these future obligations. The Company will generally satisfy the remaining performance obligations as we transfer control of the products ordered to our customers. The transaction price related to these future obligations also excludes variable consideration consisting of sales or usage-based royalties earned on licensing agreements. The variability related to these sales or usage-based royalties will be resolved in the periods when the licensee generates sales related to the licensed intellectual property.

4. GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill

Goodwill represents the excess of the purchase price and related acquisition costs over the fair value assigned to the net tangible and other intangible assets acquired in a business acquisition. At December 31, 2020 and 2019, the Company's reportable operating segments were as follows:

- **Cinch Connectivity Solutions:** includes the 2010 acquisition of Cinch Connectors, the 2012 acquisitions of Fibreco Limited and GigaCom Interconnect, the 2013 acquisition of Array Connector, the 2014 acquisition of Emerson Network Power Connectivity Solutions, in addition to sales and an estimated allocation of expenses related to connectivity products manufactured at Bel sites that are not product group specific.
- **Power Solutions and Protection:** includes the 2012 acquisition of Powerbox Italia, the 2014 acquisition of Power-One's Power Solutions business, the 2019 acquisition of the majority of CUI Inc.'s power products business, in addition to sales and an estimated allocation of expenses related to power products manufactured at Bel sites that are not product group specific.
- **Magnetic Solutions:** includes the 2013 acquisition of TE Connectivity's Coil Wound Magnetics business, our Signal Transformer business, in addition to sales and an estimated allocation of expenses related to Bel's ICM and discrete magnetic products that are manufactured at Bel sites that are not product group specific.

Prior to October 1, 2019, the Company operated under three reportable operating segments which were geographic in nature: North America, Asia and Europe. In connection with the transition in ERP systems, and resulting discussions around how management would like to view the results of the Company on a go-forward basis, management determined that viewing the Company by product group for purposes of managing the business and asset allocation decisions was most appropriate. This change in management's view resulted in a reorganization of the Company's reportable operating segments effective October 1, 2019. As of the October 1, 2019 segment reorganization date, the remaining goodwill under the former segment structure was reassigned to the new reporting units identified within the three product group reportable operating segments using a relative fair value allocation approach.

The changes in the carrying value of goodwill classified by our segment reporting structure for the years ended December 31, 2020 and 2019 are as noted in the table below.

	Total	Cinch Connectivity Solutions	Power Solutions & Protection	Magnetic Solutions
Balance at January 1, 2020:				
Goodwill, gross	\$ 21,993	\$ 7,179	\$ 14,814	\$ -
Accumulated impairment charges	-	-	-	-
Goodwill, net	<u>\$ 21,993</u>	<u>\$ 7,179</u>	<u>\$ 14,814</u>	<u>\$ -</u>
Goodwill allocation related to acquisition	588	-	588	-
Foreign currency translation	1,385	676	709	-
Balance at December 31, 2020:				
Goodwill, gross	\$ 23,966	\$ 7,855	\$ 16,111	\$ -
Goodwill, net	<u>\$ 23,966</u>	<u>\$ 7,855</u>	<u>\$ 16,111</u>	<u>\$ -</u>

As discussed in Note 5, *Fair Value Measurements*, goodwill is reviewed for impairment on a reporting unit basis annually during the fourth quarter of each year and whenever events or changes in circumstances indicate the carrying value of goodwill may not be recoverable. We estimated the fair value of these reporting units using a weighting of fair values derived from income and market approaches. Under the income approach, we determine the fair value of a reporting unit based on the present value of estimated future cash flows. Cash flow projections are based on management's estimates of revenue growth rates and operating margins, taking into consideration industry and market conditions. The discount rate used is based on a weighted average cost of capital adjusted for the relevant risk associated with the characteristics of the business and the projected cash flows. The market approach estimates fair value based on market multiples of revenue and earnings derived from comparable publicly traded companies with similar operating and investment characteristics as the reporting unit.

2020 Annual Impairment Test

On October 1, 2020, the Company completed step one of our annual goodwill impairment test for our reporting units. We concluded that the fair value of the Company's Connectivity Europe, Power Europe and CUI reporting units (the only reporting units with goodwill) exceeded the carrying value and that there was no indication of impairment.

The excess of estimated fair values over carrying value, including goodwill for each of our reporting units that had goodwill as of the 2020 annual impairment test were as follows:

Reporting Unit	% by Which Estimated Fair Value Exceeds Carrying Value
Connectivity Europe	51.1%
Power Europe	21.0%
CUI	38.6%

2019 Impairment Tests

As weakened market conditions from earlier in 2019 continued into the third quarter without a visible rebound in incoming orders, the Company's actual revenue and margin levels in 2019 were significantly lower than the financial projections utilized in the annual goodwill impairment analysis (performed as of October 1, 2018), and were not projected to rebound to those levels in 2019. The Company determined that current business conditions, and the resulting decrease in the Company's projected undiscounted and discounted cash flows, together with the accompanying stock price decline, constituted a triggering event, which required the Company to perform interim impairment tests related to its long-lived assets and goodwill during the third quarter of 2019. This resulted in a full impairment of the Company's then North America operating segment, and the Company recorded a resulting goodwill impairment charge of \$8.9 million in the third quarter of 2019. No impairment existed as of the July 31, 2019 interim test date related to the Company's then Europe operating segment. As of the interim test date, the estimated fair value of the Company's then Europe operating segment exceeded its carrying value by 17.3%.

On October 1, 2019, the Company completed step one of our annual goodwill impairment test for our reporting units. We concluded that the fair value of the Company's then Europe reporting unit (the only remaining reporting unit with goodwill) exceeded the carrying value and that there was no indication of impairment. As described above, the Company reorganized its segment structure effective October 1, 2019. In connection with the segment reorganization, the Company also completed step one of our annual goodwill impairment test for our new reporting units. We concluded that the fair value each of the Company's reporting units exceeded the respective carrying values and that there was no indication of impairment on that date.

As noted above, the fair value determined in connection with the goodwill impairment test completed in the fourth quarter of 2020 exceeded the carrying value for each reporting unit. Therefore, there was no impairment of goodwill. However, if the fair value decreases in future periods, the Company may need to complete an interim goodwill impairment test and any potential goodwill impairment charge would be dependent upon the estimated fair value of the reporting unit at that time and the outcome of the impairment test. The fair values of the assets and liabilities of the reporting unit, including the intangible assets, could vary depending on various factors.

The future occurrence of a potential indicator of impairment, such as a decrease in expected net earnings, adverse equity market conditions, a decline in current market multiples, a decline in our common stock price, a significant adverse change in legal factors or business climates, an adverse action or assessment by a regulator, unanticipated competition, strategic decisions made in response to economic or competitive conditions, or a more-likely-than-not expectation that a reporting unit or a significant portion of a reporting unit will be sold or disposed of, could require an interim assessment for some or all of the reporting units before the next required annual assessment. In the event of significant adverse changes of the nature described above, it may be necessary for us to recognize an additional non-cash impairment of goodwill, which could have a material adverse effect on our consolidated financial condition and consolidated results of operations.

Other Intangible Assets

Other identifiable intangible assets include patents, technology, license agreements, non-compete agreements and trademarks. Amounts assigned to these intangible assets have been determined by management. Management considered a number of factors in determining the allocations, including valuations and independent appraisals. Trademarks have indefinite lives and are reviewed for impairment on an annual basis. Other intangible assets, excluding trademarks, are being amortized over 1 to 16 years.

The Company tests indefinite-lived intangible assets for impairment using a fair value approach, the relief-from-royalty method (a form of the income approach). At December 31, 2020, the Company's indefinite-lived intangible assets related to the trademarks acquired in the CUI, Power Solutions, Connectivity Solutions, Cinch and Fibreco acquisitions.

The components of definite and indefinite-lived intangible assets are as follows:

	December 31, 2020			December 31, 2019		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Patents, licenses and technology	\$ 39,056	\$ 25,160	\$ 13,896	\$ 38,885	\$ 21,757	\$ 17,128
Customer relationships	56,261	21,280	34,981	55,656	17,231	38,425
Non-compete agreements	2,716	2,717	(1)	2,701	2,701	-
Trademarks	16,953	40	16,913	16,852	40	16,812
	<u>\$ 114,986</u>	<u>\$ 49,197</u>	<u>\$ 65,789</u>	<u>\$ 114,094</u>	<u>\$ 41,729</u>	<u>\$ 72,365</u>

Amortization expense was \$7.1 million and \$6.4 million in 2020 and 2019, respectively.

Estimated amortization expense for intangible assets for the next five years is as follows:

December 31,	Amortization Expense
2021	\$ 6,972
2022	5,673
2023	4,523
2024	4,461
2025	4,445

2020 and 2019 Impairment Tests

The Company completed its annual indefinite-lived intangible assets impairment test as of October 1, 2020 and October 1, 2019, noting no impairment. During the third quarter of 2019, due to weakened market conditions discussed above, the Company completed an interim impairment test related to its indefinite-lived intangible assets as of July 31, 2019, noting no impairment. Management has concluded that the fair value of these trademarks exceeded the related carrying values at both December 31, 2020 and December 31, 2019, with no indication of impairment at either date.

5. FAIR VALUE MEASUREMENTS

As of December 31, 2020 and December 31, 2019, our available-for-sale securities primarily consisted of investments held in a rabbi trust which are intended to fund the Company's Supplemental Executive Retirement Plan ("SERP") obligations. These securities are measured at fair value using quoted prices in active markets for identical assets (Level 1) inputs and amounted to \$0.7 million at December 31, 2020 and \$1.1 million at December 31, 2019. During the second quarter of 2020, the Company entered into foreign exchange forward contracts, the fair value of which was less than \$0.1 million at December 31, 2020. The Company does not have any financial assets measured at fair value on a recurring basis categorized as Level 3, and there were no transfers in or out of Level 1, Level 2 or Level 3 during 2020 or 2019. There were no changes to the Company's valuation techniques used to measure asset fair values on a recurring or nonrecurring basis during 2020.

There were no financial assets accounted for at fair value on a nonrecurring basis as of December 31, 2020 or December 31, 2019.

The Company has other financial instruments, such as cash and cash equivalents, accounts receivable, restricted cash, accounts payable and accrued expenses, which are not measured at fair value on a recurring basis but are recorded at amounts that approximate fair value due to their liquid or short-term nature. The fair value of the Company's long-term debt is estimated using a discounted cash flow method based on interest rates that are currently available for debt issuances with similar terms and maturities. At December 31, 2020 and 2019, the estimated fair value of total debt was \$118.4 million and \$146.4 million, respectively, compared to a carrying amount of \$115.6 million and \$143.7 million, respectively. The Company did not have any other financial liabilities within the scope of the fair value disclosure requirements as of December 31, 2020.

Nonfinancial assets and liabilities, such as goodwill, indefinite-lived intangible assets and long-lived assets, are accounted for at fair value on a nonrecurring basis. These items are tested for impairment upon the occurrence of a triggering event. We review goodwill for impairment on a reporting unit basis annually during the fourth quarter of each year and whenever events or changes in circumstances indicate the carrying value of goodwill may not be recoverable. As weakened market conditions from earlier in 2019 continued into the third quarter without a visible rebound in incoming orders, the Company's actual revenue and margin levels in 2019 were significantly lower than the financial projections utilized in the annual goodwill impairment analysis (performed as of October 1, 2018), and were not projected to rebound to those levels in 2019. The Company determined that current business conditions, and the resulting decrease in the Company's projected undiscounted and discounted cash flows, together with the accompanying stock price decline, constituted a triggering event, which required the Company to perform interim impairment tests related to its long-lived assets, indefinite-lived intangible assets and goodwill during the third quarter of 2019. The Company's interim test on its long-lived assets and indefinite-lived intangible assets indicated that the carrying value of these assets were recoverable and that no impairment existed as of the July 31, 2019 testing date.

The Company's Level 3 fair value analysis related to the interim test for goodwill impairment was supported by a weighting of two generally accepted valuation approaches, the income approach and the market approach, as further described in Note 4, "Goodwill and Other Intangible Assets". These approaches include numerous assumptions with respect to future circumstances, such as industry and/or local market conditions, which might directly impact each of the reporting units' operations in the future, and are therefore uncertain. These approaches are utilized to develop a range of fair values and a weighted average of these approaches is utilized to determine the best fair value estimate within that range.

The July 31, 2019 interim impairment test related to the Company's goodwill was performed by reporting unit (North America and Europe). The valuation test, which heavily weights future discounted cash flow projections, indicated impairment of the goodwill associated with the Company's then North America reporting unit. As a result, the Company recorded a non-cash goodwill impairment charge of \$8.9 million (\$8.5 million after-tax) during the third quarter of 2019. The Company's goodwill associated with its then North America reporting unit originated from several of Bel's prior acquisitions, primarily Power Solutions and Connectivity Solutions. The remaining goodwill as of September 30, 2019 had a carrying value of \$10.8 million related solely to the Company's then Europe reporting unit. Effective October 1, 2019, in connection with a change in how management views the business as a result of our ongoing transition in ERP systems and the recent acquisition of CUI, the Company reorganized its segment reporting structure. The Company's new reportable operating segments are Cinch Connectivity Solutions, Power Solutions and Protection, and Magnetic Solutions. At our October 1, 2019 annual goodwill impairment test date, an analysis was performed on both the former segments and the new segments to ensure no impairment existed under either structure as of the reorganization date. See Note 4, "Goodwill and Other Intangible Assets".

6. OTHER ASSETS

At December 31, 2020 and 2019, the Company has obligations of \$24.3 million and \$21.5 million, respectively, associated with its SERP. As a means of informally funding these obligations, the Company has invested in life insurance policies related to certain employees and marketable securities held in a rabbi trust. At December 31, 2020 and 2019, these assets had a combined value of \$15.4 million and \$14.7 million, respectively.

Company-Owned Life Insurance

Investments in company-owned life insurance policies ("COLI") were made with the intention of utilizing them as a long-term funding source for the Company's SERP obligations. However, the cash surrender value of the COLI does not represent a committed funding source for these obligations. Any proceeds from these policies are subject to claims from creditors. The cash surrender value of the COLI of \$14.7 million and \$13.7 million at December 31, 2020 and 2019, respectively, is included in other assets in the accompanying consolidated balance sheets. The volatility in global equity markets in recent years has also had an effect on the cash surrender value of the COLI policies. The Company recorded income to account for the increase in cash surrender value in the amount of \$1.4 million and \$2.4 million during the years ended December 31, 2020 and 2019, respectively. Prior to the fourth quarter of 2020, these fluctuations in the cash surrender value were allocated between cost of sales and selling, general and administrative expenses on the consolidated statements of operations. Beginning in the fourth quarter of 2020, these fluctuations have been reclassified to other income (expense), net on the consolidated statements of operations for all periods presented. This revised classification is consistent with the costs associated with the long-term employee benefit obligations that the COLI is intended to fund.

Other Investments

At December 31, 2020 and 2019, the Company held, in the aforementioned rabbi trust, available-for-sale investments at a cost of \$0.7 million and \$1.1 million, respectively. Together with the COLI described above, these investments are intended to fund the Company's SERP obligations and are classified as other assets in the accompanying consolidated balance sheets. The Company monitors these investments for impairment on an ongoing basis. At December 31, 2020 and 2019, the fair market value of these investments was \$0.7 million and \$1.1 million, respectively.

7. INVENTORIES

The components of inventories are as follows:

	December 31,	
	2020	2019
Raw materials	\$ 40,846	\$ 47,936
Work in progress	25,916	27,065
Finished goods	33,371	32,275
Inventories	<u>\$ 100,133</u>	<u>\$ 107,276</u>

8. PROPERTY, PLANT AND EQUIPMENT, NET

Property, plant and equipment, net consist of the following:

	December 31,	
	2020	2019
Land	\$ 1,115	\$ 1,431
Buildings and improvements	19,917	29,722
Machinery and equipment	124,114	132,134
Construction in progress	1,603	5,090
	<u>146,749</u>	<u>168,377</u>
Accumulated depreciation	(112,248)	(126,434)
Property, plant and equipment, net	<u>\$ 34,501</u>	<u>\$ 41,943</u>

Depreciation expense for the years ended December 31, 2020 and 2019 was \$9.3 million and \$10.0 million, respectively.

9. INCOME TAXES

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction and various states and foreign jurisdictions. The Company is no longer subject to U.S. federal examinations by tax authorities for years before 2017 and for state examinations before 2014. Regarding foreign subsidiaries, the Company is no longer subject to examination by tax authorities for years before 2010 in Asia and generally 2012 in Europe.

At December 31, 2020 and 2019, the Company has approximately \$28.5 million and \$29.1 million, respectively, of liabilities for uncertain tax positions (\$2.4 million and \$2.2 million, respectively, is included in other current liabilities on the consolidated balance sheets and \$26.1 million and \$26.9 million, respectively, is included in liability for uncertain tax positions on the consolidated balance sheets). These amounts, if recognized, would reduce the Company's effective tax rate. As of December 31, 2020, approximately \$2.4 million of the Company's liabilities for uncertain tax positions are expected to be resolved during the next twelve months by way of expiration of the related statute of limitations.

A reconciliation of the beginning and ending amount of the liability for uncertain tax positions, including the portion included in income taxes payable, is as follows:

	Year Ended December 31,	
	2020	2019
Liability for uncertain tax positions - January 1	\$ 29,061	\$ 28,951
Additions based on tax positions related to the current year	764	1,738
Translation adjustment	887	(211)
Settlement/expiration of statutes of limitations	(2,196)	(1,417)
Liability for uncertain tax positions - December 31	<u>\$ 28,516</u>	<u>\$ 29,061</u>

The Company's policy is to recognize interest and penalties related to uncertain tax positions as a component of the current provision for income taxes. During the years ended December 31, 2020 and 2019, the Company recognized \$0.8 million and \$0.7 million, respectively, in interest and penalties in the consolidated statements of operations. During the years ended December 31, 2020 and 2019, the Company recognized a benefit of \$0.5 million and \$0.7 million, respectively, for the reversal of such interest and penalties, relating to the expiration of statutes of limitations and settlement of the acquired liability for uncertain tax positions, respectively. The Company has approximately \$5.2 million and \$4.9 million accrued for the payment of interest and penalties at December 31, 2020 and 2019, respectively, which is included in both income taxes payable and liability for uncertain tax positions in the consolidated balance sheets.

The Company's total earnings (loss) before provision for income taxes included losses from domestic operations of (\$6.0) million and (\$17.1) million for 2020 and 2019, respectively, and earnings before provision for income taxes from foreign operations of \$18.1 million and \$9.8 million for 2020 and 2019, respectively.

The provision (benefit) for income taxes consists of the following:

	Years Ended December 31,	
	2020	2019
Current:		
Federal	\$ (1,555)	\$ (215)
State	168	141
Foreign	<u>2,472</u>	<u>3,687</u>
	<u>1,085</u>	<u>3,613</u>
Deferred:		
Federal	(1,412)	(2,222)
State	(151)	(135)
Foreign	<u>(181)</u>	<u>185</u>
	<u>(1,744)</u>	<u>(2,172)</u>
	<u>\$ (659)</u>	<u>\$ 1,441</u>

A reconciliation of taxes on income computed at the U.S. federal statutory rate to amounts provided is as follows:

	Years Ended December 31,			
	2020		2019	
	\$	%	\$	%
Tax provision (benefit) computed at the federal statutory rate	\$ 2,549	21%	\$ (1,534)	21%
Increase (decrease) in taxes resulting from:				
Different tax rates applicable to foreign operations	311	3%	2,978	(41%)
(Reversal of) increase in liability for uncertain tax positions - net	(1,432)	(12%)	320	(4%)
Impact of U.S. Tax Reform	(1,129)	(9%)	-	0%
Research and experimentation and foreign tax credits	(245)	(2%)	(907)	12%
State taxes, net of federal benefit	4	0%	(54)	1%
SERP/COLI and restricted stock income	(234)	(2%)	(547)	7%
Impairment of goodwill	-	0%	1,522	(21%)
Other, net	(483)	(4%)	(337)	5%
Tax (benefit) provision computed at the Company's effective tax rate	<u>\$ (659)</u>	<u>(5%)</u>	<u>\$ 1,441</u>	<u>(20%)</u>

As of December 31, 2020, the Company has \$22.9 million of deferred tax assets, which the Company evaluates for utilization on an annual basis. The Company has gross federal, state and foreign net operating losses ("NOL") of \$27.5 million which amount to \$5.9 million of deferred tax assets. In addition, the Company has \$2.6 million of credit carryforwards and acquired deferred tax assets of \$0.6 million. The Company believes that it is more likely than not that the benefit arising from certain NOL, credit carryforwards and acquisition assets will not be realized. In recognition of this risk, the Company has provided a valuation allowance of \$6.3 million on these deferred tax assets. The federal and certain foreign NOL's can be carried forward indefinitely, the state and certain foreign NOL's expire at various times during 2025 – 2040 and the tax credit carryforwards expire at various times during 2028 - 2040.

Management has no specific plans to indefinitely reinvest the unremitted earnings of our foreign subsidiaries as of December 31, 2020. Applicable income and dividend withholding taxes of \$0.2 million have been reflected in the accompanying consolidated statements of operations for the year ended December 31, 2020. Due to the practicality of determining the deferred taxes on outside basis differences in our investments in our foreign subsidiaries, we have not provided for deferred taxes on outside basis differences and deemed that these basis differences will be indefinitely reinvested.

Components of deferred income tax assets are as follows:

	December 31,	
	2020	2019
	Tax Effect	Tax Effect
Deferred tax assets:		
State tax credits	\$ 757	\$ 1,046
Unfunded pension liability	1,840	1,102
Reserves and accruals	3,181	2,721
Federal, state and foreign net operating loss and credit carryforwards	7,744	8,042
Depreciation	604	686
Amortization	142	698
Lease accounting	3,217	3,961
Other accruals	5,452	5,079
Total deferred tax assets	22,937	23,335
Deferred tax liabilities:		
Depreciation	1,992	1,901
Amortization	6,541	6,973
Lease accounting	3,110	3,871
Other accruals	330	370
Total deferred tax liabilities	11,973	13,115
Valuation allowance	6,289	8,216
Net deferred tax assets	\$ 4,675	\$ 2,004

The Company continues to monitor proposed legislation affecting the taxation of transfers of U.S. intangible property and other potential tax law changes.

10. DEBT

At December 31, 2020 and 2019, borrowings outstanding related to the respective term loans described below were \$104.8 million and \$113.0 million, respectively, with \$12.0 million and \$32.0 borrowings outstanding under the revolver, respectively. The unused credit available under the applicable credit facility was \$63.0 million at December 31, 2020 and \$43.0 million at December 31, 2019. At December 31, 2020 and 2019 the carrying value of the debt on the consolidated balance sheets is reflected net of \$1.3 million and \$1.3 million, respectively, of deferred financing costs.

The interest rate in effect at December 31, 2020 was 2.19%, which consisted of LIBOR of 0.19% plus the Company's margin of 2.00%. The interest rate in effect at December 31, 2019 was 3.31%, which consisted of LIBOR of 1.81% plus the Company's margin of 1.50%. In connection with its outstanding borrowings and amortization of the deferred financing costs described below, the Company incurred \$4.7 million and \$5.4 million of interest expense during the years ended December 31, 2020 and 2019, respectively.

2014 Credit and Security Agreement

On June 19, 2014, the Company entered into a senior Credit and Security Agreement with KeyBank National Association ("KeyBank"), as administrative agent and lender, which was amended on June 30, 2014 principally to add a syndicate of additional lenders (as so amended, the "2014 CSA"). The 2014 CSA consisted of (i) a \$50 million revolving credit facility ("Revolver"), (ii) a \$145 million term loan facility ("Term Loan") and (iii) a \$70 million delayed draw term loan ("DDTL"). The maturity date of the 2014 CSA was June 18, 2019. The Company recorded \$5.8 million of deferred financing costs associated with the 2014 CSA, to be amortized through interest expense over the 5-year term of the agreement.

2016 Amendment

In March 2016, the Company amended the terms of the 2014 CSA to modify (i) the date by which the Company was obligated to make excess cash flow prepayments in 2016 on account of excess cash flow achieved for fiscal year 2015, (ii) the method of application of mandatory and voluntary prepayments related to the Company's loans, and (iii) the maximum Leverage Ratio of the Company allowed under the 2014 CSA for the period from the effective date of the amendment through September 2016. In connection with this amendment to the 2014 CSA, the Company paid \$0.7 million of deferred financing costs, and the modification

to the amortization schedule resulted in \$0.5 million of existing deferred financing costs to be accelerated and recorded as interest expense during the first quarter of 2016.

2017 Amendment and Refinancing

On December 11, 2017, the Company refinanced the borrowings under the 2014 CSA and further amended its terms as follows: (i) extended the maturity date to December 11, 2022, (ii) revised the amount of the Term Loan to \$125.0 million, (iii) increased the amount available under the Revolver to \$75.0 million, (iv) reduced mandatory amortization payments over the first four years of the new 5-year term; and (v) reduced the pricing grid related to interest expense, among other items (the "2017 CSA"). Concurrent with its entry into the 2017 CSA, the Company's outstanding balances due under the DDTL and Revolver were paid in full. In connection with 2017 CSA and related refinancing, the Company paid \$1.8 million of deferred financing costs. Due to the magnitude of the modifications to the 2014 CSA, including a reduction in the number of lenders within the syndicate, this modification was deemed an extinguishment of the balances outstanding related to the Term Loan and DDTL that originated under the 2014 CSA. As a result, \$1.0 million of existing deferred financing costs were accelerated and recorded as interest expense during the fourth quarter of 2017.

Under the terms of the 2017 CSA, the Company is entitled, subject to the satisfaction of certain conditions, to request additional commitments under the revolving credit facility or term loans in the aggregate principal amount of up to \$75 million to the extent that existing or new lenders agree to provide such additional commitments and/or term loans.

The obligations of the Company under the 2017 CSA are guaranteed by certain of the Company's material U.S. subsidiaries (together with the Company, the "Loan Parties") and are secured by a first priority security interest in substantially all of the existing and future personal property of the Loan Parties, certain material real property of the Loan Parties and certain of the Loan Parties' material U.S. subsidiaries, including 65% of the voting capital stock of certain of the Loan Parties' direct foreign subsidiaries.

The borrowings under the 2017 CSA bear interest at a rate equal to, at the Company's option, either (1) LIBOR, plus a margin ranging from 1.375% per annum to 2.75% per annum depending on the Company's leverage ratio, or (2)(a) an "Alternate Base Rate," which is the highest of (i) the federal funds rate plus 0.50%, (ii) KeyBank's prime rate and (iii) the LIBOR rate with a maturity of one month plus 1.00%, plus (b) a margin ranging from 0.375% per annum to 1.75% per annum, depending on the Company's leverage ratio.

The 2017 CSA contains customary representations and warranties, covenants and events of default and financial covenants that measure (i) the ratio of the Company's total funded indebtedness, on a consolidated basis, to the amount of the Company's consolidated EBITDA, as defined, ("Leverage Ratio") and (ii) the ratio of the amount of the Company's consolidated EBITDA to the Company's consolidated fixed charges ("Fixed Charge Coverage Ratio"). If an event of default occurs, the lenders under the CSA would be entitled to take various actions, including the acceleration of amounts due thereunder and all actions permitted to be taken by a secured creditor.

2020 Amendment

On February 18, 2020, the Company further amended its credit agreement whereby the Company voluntarily prepaid a portion of its term loan under the credit agreement in the amount of \$8.2 million. The Amendment also served to modify the interest rate and fees applicable to the loans under the credit agreement and change certain covenants related to matters including acquisitions, share repurchases and financial ratios.

At December 31, 2020, the Company was in compliance with its debt covenants, including its most restrictive covenant, the Leverage Ratio.

Scheduled principal payments of the total debt outstanding at December 31, 2020 are as follows (in thousands):

2021	\$	5,948
2022		110,887
Total long-term debt		116,835
Less: Current maturities of long-term debt		(5,948)
Noncurrent portion of long-term debt	\$	<u>110,887</u>

11. ACCRUED EXPENSES

Accrued expenses consist of the following:

	December 31,	
	2020	2019
Sales commissions	\$ 2,574	\$ 2,542
Subcontracting labor	758	990
Salaries, bonuses and related benefits	17,165	14,715
Warranty accrual	1,010	1,576
Other	6,969	7,095
	<u>\$ 28,476</u>	<u>\$ 26,918</u>

The change in warranty accrual during 2020 primarily related to repair costs incurred and adjustments to pre-existing warranties. There were no new material warranty charges incurred during 2020.

12. SEGMENTS

The Company operates in one industry with three reportable operating segments, which represent the Company's three product groups and a corporate segment. The segments consist of Cinch Connectivity Solutions, Power Solutions and Protection, Magnetic Solutions and a Corporate segment. The primary criteria by which financial performance is evaluated and resources are allocated are net sales and income from operations. The following is a summary of key financial data:

	Year Ended December 31, 2020				
	Connectivity Solutions	Power Solutions and Protection	Magnetic Solutions	Corporate Segment	Total
Net sales	\$ 150,731	\$ 181,488	\$ 133,552	\$ -	\$ 465,771
Gross Profit	42,200	45,587	33,072	(1,129)	119,730
Gross Profit %	28.0%	25.1%	24.8%	nm	25.7%
Total Assets	137,333	180,939	92,538	43,056	453,866

Total Assets	145,344	168,422	89,463	65,688	468,917
Capital Expenditures	2,934	4,570	2,387		9,891
Depreciation and Amortization Expense	6,021	7,858	2,592		16,471

Entity-Wide Information

The following is a summary of entity-wide information related to the Company's net sales to external customers by geographic area and by major product line.

	Years Ended December 31,	
	2020	2019
<i>Net Sales by Geographic Location:</i>		
United States	\$ 265,676	\$ 256,044
Macao	129,303	154,745
United Kingdom	22,017	24,877
Slovakia	17,609	22,705
Germany	13,582	14,855
Switzerland	8,612	10,654
All other foreign countries	8,972	8,532
Consolidated net sales	<u>\$ 465,771</u>	<u>\$ 492,412</u>

<i>Net Sales by Major Product Line:</i>		
Connectivity solutions	\$ 150,731	\$ 172,348
Magnetic solutions	133,552	156,536
Power solutions and protection	181,488	163,528
Consolidated net sales	<u>\$ 465,771</u>	<u>\$ 492,412</u>

The following is a summary of long-lived assets by geographic area as of December 31, 2020 and 2019:

	December 31,	
	2020	2019
<i>Long-lived Assets by Geographic Location:</i>		
United States	\$ 26,748	\$ 27,377
People's Republic of China (PRC)	28,711	30,245
Slovakia	5,514	5,726
Switzerland	87	2,339
United Kingdom	1,715	2,053
All other foreign countries	1,148	1,123
Consolidated long-lived assets	<u>\$ 63,923</u>	<u>\$ 68,863</u>

Long-lived assets consist of property, plant and equipment, net and other assets of the Company that are identified with the operations of each geographic area.

The territory of Hong Kong became a Special Administrative Region ("SAR") of the PRC in the middle of 1997. The territory of Macao became a SAR of the PRC at the end of 1999. Management cannot presently predict what future impact this will have on the Company, if any, or how the political climate in the PRC will affect the Company's contractual arrangements in the PRC. A significant portion of the Company's manufacturing operations and approximately 32.6% of its identifiable assets are located in Asia.

Net Sales to Major Customers

The Company had net sales to one customer in excess of ten percent of consolidated net sales in 2020 and 2019. The net sales associated with this customer were \$55.2 million (11.9% of sales) in 2020 and \$50.2 million (10.2% of sales) in 2019. Net sales related to this significant customer were primarily reflected in the Magnetic Solutions operating segment.

13. RETIREMENT FUND AND PROFIT SHARING PLAN

The Company maintains the Bel Fuse Inc. Employees' Savings Plan, a defined contribution plan that is intended to meet the applicable requirements for tax-qualification under sections 401(a) and (k) of the Internal Revenue Code of 1986, as amended (the "Code"). The Employees' Savings Plan allows eligible employees to voluntarily contribute a percentage of their eligible compensation, subject to Code limitations, which contributions are matched by the Company in an amount equal to 100% of the first 1% of compensation contributed by participants, and 50% of the next 5% of compensation contributed by participants. The Company's matching contribution is made in the form of Bel Fuse Inc. Class A common stock. Prior to January 1, 2012, the Company's matching and profit sharing contributions were made in the form of shares of Bel Fuse Inc. Class A and Class B common stock. The expense for the years ended December 31, 2020 and 2019 amounted to \$1.1 million for each period. As of December 31, 2020, the plan owned 257,030 and 109,435 shares of Bel Fuse Inc. Class A and Class B common stock, respectively.

The Company's subsidiaries in Asia have a retirement fund covering substantially all of their Hong Kong based full-time employees. Eligible employees contribute up to 5% of salary to the fund. In addition, the Company must contribute a minimum of 5% of eligible salary, as determined by Hong Kong government regulations. The Company currently contributes 7% of eligible salary in cash or Company stock. The expense for the years ended December 31, 2020 and 2019 amounted to approximately \$0.3 million in each year. As of December 31, 2020, the plan owned 3,323 and 17,342 shares of Bel Fuse Inc. Class A and Class B common stock, respectively.

The Company maintains a SERP, which is designed to provide a limited group of key management and other key employees of the Company with supplemental retirement and death benefits. Participants in the SERP are selected by the Compensation Committee of the Board of Directors. The SERP initially became effective in 2002 and was amended and restated in April 2007 to conform with applicable requirements of Section 409A of the Internal Revenue Code and to modify the provisions regarding benefits payable in connection with a change in control of the Company. The Plan is unfunded. Benefits under the SERP are payable from the general assets of the Company, but the Company has established a rabbi trust which includes certain life insurance policies in effect on participants as well as other investments to partially cover the Company's obligations under the Plan. See Note 6, "Other Assets," for further information on these assets.

The benefits available under the SERP vary according to when and how the participant terminates employment with the Company. If a participant retires (with the prior written consent of the Company) on his normal retirement date (65 years old, 20 years of service, and 5 years of Plan participation), his normal retirement benefit under the Plan would be annual payments equal to 40% of his average base compensation (calculated using compensation from the highest five consecutive calendar years of Plan participation), payable in monthly installments for the remainder of his life. If a participant retires early from the Company (55 years old, 20 years of service, and five years of Plan participation), his early retirement benefit under the Plan would be an amount (i) calculated as if his early retirement date were in fact his normal retirement date, (ii) multiplied by a fraction, with the numerator being the actual years of service the participant has with the Company and the denominator being the years of service the participant would have had if he had retired at age 65, and (iii) actuarially reduced to reflect the early retirement date. If a participant dies prior to receiving 120 monthly payments under the Plan, his beneficiary would be entitled to continue receiving benefits for the shorter of (i) the time necessary to complete 120 monthly payments or (ii) 60 months. If a participant dies while employed by the Company, his beneficiary would receive, as a survivor benefit, an annual amount equal to (i) 100% of the participant's annual base salary at date of death for one year, and (ii) 50% of the participant's annual base salary at date of death for each of the following four years, each payable in monthly installments. The Plan also provides for disability benefits, and a forfeiture of benefits if a participant terminates employment for reasons other than those contemplated under the Plan. The expense related to the Plan for the years ended December 31, 2020 and 2019 amounted to \$1.6 million and \$1.5 million, respectively.

Net Periodic Benefit Cost

The net periodic benefit cost related to the SERP consisted of the following components during the years ended December 31, 2020 and 2019:

	Years Ended December 31,	
	2020	2019
Service Cost	\$ 600	\$ 576
Interest Cost	636	739
Net amortization	343	192
Net periodic benefit cost	<u>\$ 1,579</u>	<u>\$ 1,507</u>

The service cost component of net benefit cost is presented within cost of sales or selling, general and administrative expense on the accompanying consolidated statements of operations, in accordance with where compensation cost for the related associate is reported. All other components of net benefit cost, including interest cost and net amortization noted above, are presented within other (expense) income, net in the accompanying consolidated statements of operations.

Obligations and Funded Status

Summarized information about the changes in plan assets and benefit obligation, the funded status and the amounts recorded at December 31, 2020 and 2019 are as follows:

	Years Ended December 31,	
	2020	2019
Fair value of plan assets, January 1	\$ -	\$ -
Company contributions	446	430
Benefits paid	(446)	(430)
Fair value of plan assets, December 31	\$ -	\$ -
Benefit obligation, January 1	\$ 21,541	\$ 18,676
Service cost	600	576
Interest cost	636	739
Benefits paid	(446)	(430)
Plan amendments	-	-
Actuarial losses	1,977	1,980
Benefit obligation, December 31	\$ 24,308	\$ 21,541
Underfunded status, December 31	\$ (24,308)	\$ (21,541)

The Company has recorded the 2020 and 2019 underfunded status as a long-term liability on the consolidated balance sheets. The accumulated benefit obligation for the SERP was \$22.4 million as of December 31, 2020 and \$18.5 million as of December 31, 2019. The aforementioned company-owned life insurance policies and marketable securities held in a rabbi trust had a combined value of \$15.4 million and \$14.7 million at December 31, 2020 and 2019, respectively. See Note 6, "Other Assets," for additional information on these investments.

The estimated net loss and prior service cost for the SERP that will be amortized from accumulated other comprehensive loss into net periodic benefit cost over the next fiscal year is \$0.5 million. The Company expects to make contributions of \$0.5 million to the SERP in 2021. The Company had no net transition assets or obligations recognized as an adjustment to other comprehensive income and does not anticipate any plan assets being returned to the Company during 2021, as the plan has no assets.

The following benefit payments, which reflect expected future service, are expected to be paid:

	Years Ending December 31,	
	2021	\$ 675
	2022	919
	2023	921
	2024	959
	2025	999
	2026 - 2030	5,642

The following gross amounts are recognized net of tax in accumulated other comprehensive loss:

	December 31,	
	2020	2019
Prior service cost	\$ 586	\$ 738
Net loss	1,773	1,965
	\$ 2,359	\$ 2,703

Actuarial Assumptions

The weighted average assumptions used in determining the periodic net cost and benefit obligation information related to the SERP are as follows:

	Years Ended December 31,	
	2020	2019
<u>Net periodic benefit cost:</u>		
Discount rate	3.00%	4.00%
Rate of compensation increase	2.50%	2.50%
<u>Benefit obligation:</u>		
Discount rate	2.25%	3.00%
Rate of compensation increase	2.50%	2.50%

14. SHARE-BASED COMPENSATION

The Company has an equity compensation program (the "Program") which provides for the granting of "Incentive Stock Options" within the meaning of Section 422 of the Internal Revenue Code of 1986, as amended, non-qualified stock options and restricted stock awards. The Company believes that such awards better align the interest of its employees with those of its shareholders. The 2020 Equity Compensation Plan provides for the issuance of 1.0 million shares of the Company's Class B common stock. At December 31, 2020, 1.0 million shares remained available for future issuance under the 2020 Equity Compensation Plan. The 2011 Equity Compensation Plan provided for the issuance of 1.4 million shares of the Company's Class B common stock. At December 31, 2020, no shares remained available for future issuance under the 2011 Equity Compensation Plan.

The Company records compensation expense in its consolidated statements of operations related to employee stock-based options and awards. The aggregate pretax compensation cost recognized for stock-based compensation amounted to approximately \$2.3 million and \$2.9 million for 2020 and 2019, respectively, and related solely to restricted stock awards. The Company did not use any cash to settle any equity instruments granted under share-based arrangements during 2020 and 2019. At December 31, 2020 and 2019, the only instruments issued and outstanding under the Program related to restricted stock awards.

Restricted Stock Awards

The Company provides common stock awards to certain officers, directors and key employees. The Company grants these awards, at its discretion, from the shares available under the Program. Unless otherwise provided at the date of grant or unless subsequently accelerated, the shares awarded are typically earned in 25% increments on the second, third, fourth and fifth anniversaries of the award and are distributed provided the employee has remained employed by the Company through such anniversary dates; otherwise the unearned shares are forfeited. The market value of these shares at the date of award is recorded as compensation expense on the straight-line method over the applicable vesting period from the respective award dates, as adjusted for forfeitures of unvested awards. During 2020 and 2019, the Company issued 113,000 shares and 70,000 shares of the Company's Class B common stock, respectively, under a restricted stock plan to various officers, directors and employees.

A summary of the restricted stock activity under the Program for the year ended December 31, 2020 is presented below:

Restricted Stock Awards	Shares	Weighted Average Award Price	Weighted Average
			Remaining Contractual Term (Years)
Outstanding at January 1, 2020	445,300	\$ 23.96	3.4 years
Granted	113,000	8.24	
Vested	(120,850)	24.10	
Forfeited	(32,000)	20.52	
Outstanding at December 31, 2020	405,450	\$ 19.77	3.0 years

As of December 31, 2020, there was \$5.1 million of total pretax unrecognized compensation cost related to non-vested stock-based compensation arrangements granted under the restricted stock award plan. That cost is expected to be recognized over a period of 4.4 years. This expense is recorded in cost of sales and SG&A expense based upon the employment classification of the award recipients.

The Company's policy is to issue new shares to satisfy restricted stock awards. Currently the Company believes that the majority of its restricted stock awards will vest.

15. COMMON STOCK

As of December 31, 2020, according to regulatory filings, there was one shareholder of the Company's common stock (other than shareholders subject to specific exceptions) with ownership in excess of 10% of Class A outstanding shares with no ownership of the Company's Class B common stock. In accordance with the Company's certificate of incorporation, the Class B Protection clause is triggered if a shareholder owns 10% or more of the outstanding Class A common stock and does not own an equal or greater percentage of all then outstanding shares of both Class A and Class B common stock (all of which common stock must have been acquired after the date of the 1998 recapitalization). In such a circumstance, such shareholder must, within 90 days of the trigger date, purchase Class B common shares, in an amount and at a price determined in accordance with a formula described in the Company's certificate of incorporation, or forfeit its right to vote its Class A common shares. As of December 31, 2020, to the Company's knowledge, this shareholder had not purchased any Class B shares to comply with these requirements. In order to vote its shares at Bel's next shareholders' meeting, this shareholder must either purchase the required number of Class B common shares or sell or otherwise transfer Class A common shares until its Class A holdings are under 10%. As of December 31, 2020, to the Company's knowledge, this shareholder owned 21.6% of the Company's Class A common stock in the aggregate and had not taken steps to either purchase the required number of Class B common shares or sell or otherwise transfer Class A common shares until its Class A holdings fall below 10%. Unless and until this situation is satisfied in a manner permitted by the Company's Restated Certificate of Incorporation, the subject shareholder will not be permitted to vote its shares of common stock.

Throughout 2020 and 2019, the Company declared cash dividends on a quarterly basis at a rate of \$0.06 per Class A (voting) share of common stock and \$0.07 per Class B (non-voting) share of common stock. The Company declared and paid cash dividends totaling \$3.4 million and \$3.4 million in 2020 and 2019, respectively. There are no contractual restrictions on the Company's ability to pay dividends, provided that the Company is not in default under its credit agreements immediately before such payment and after giving effect to such payment.

16. LEASES

The Company has operating leases for its facilities used for manufacturing, research and development, sales and administration. There are also operating and finance leases related to manufacturing equipment, office equipment and vehicles. These leases have remaining lease terms ranging from 1 year to 8 years. Certain of the leases contain options to extend the term of the lease and certain of the leases contain options to terminate the lease within a specified period of time. These options to extend or terminate a lease are included in the lease term only when it is reasonably likely that the Company will elect that option. The Company is not a party to any material sublease arrangements.

The components of lease expense, which are included in cost of sales, research and development costs, and selling, general and administrative expense, based on the underlying use of the ROU asset, were as follows:

	Year Ended December 31, 2020
Amortization of ROU assets - finance leases	\$ 205
Interest on lease liabilities - finance leases	65
Operating lease cost (cost resulting from lease payments)	8,113
Short-term lease cost	189
Variable lease cost (cost excluded from lease payments)	270
Sublease income	-
Total lease cost	<u>\$ 8,842</u>

Supplemental cash flow information related to leases are as follows:

	Year Ended December 31, 2020
Cash paid for amounts included in the measurement of lease liabilities:	
Operating cash flows from operating leases	\$ 8,022
Operating cash flows from finance leases	65
Finance cash flows from finance leases	185
Right-of-use assets obtained in exchange for lease obligations:	
Operating leases	3,384
Finance leases	451

Supplemental balance sheet information related to leases was as follows:

	December 31, 2020
Operating Leases:	
Operating lease right-of-use assets	\$ 14,217
Operating lease liability, current	6,591
Operating lease liability, long-term	8,064
Total operating lease liabilities	<u>\$ 14,655</u>
Finance Leases:	
Property, plant and equipment, gross	\$ 966
Accumulated depreciation	(391)
Property, plant and equipment, net	<u>\$ 575</u>
Other current liabilities	\$ 198
Other long-term liabilities	790
Total finance lease liabilities	<u>\$ 988</u>
	December 31, 2020
Weighted-Average Remaining Lease Term:	
Operating leases (in years)	2.7
Finance leases (in years)	4.6
Weighted-Average Discount Rate:	
Operating leases	6.0%
Finance leases	6.3%

Our discount rate is based on our incremental borrowing rate, as adjusted based on the geographic regions in which our leases assets are located.

Maturities of lease liabilities were as follows as of December 31, 2020:

Year Ending December 31,	Operating Leases	Finance Leases
2021	\$ 7,575	\$ 280
2022	4,655	264
2023	2,421	264
2024	883	248
2025	260	78
Thereafter	315	80
Total undiscounted cash flows	<u>16,109</u>	<u>1,214</u>
Less imputed interest	(1,454)	(226)
Present value of lease liabilities	<u>\$ 14,655</u>	<u>\$ 988</u>

17. COMMITMENTS AND CONTINGENCIES

Other Commitments

The Company submits purchase orders for raw materials to various vendors throughout the year for current production requirements, as well as forecasted requirements. Certain of these purchase orders relate to special purpose material and, as such, the Company may incur penalties if an order is cancelled. The Company had outstanding purchase orders related to raw materials in the amount of \$42.5 million and \$42.5 million at December 31, 2020 and December 31, 2019, respectively. The Company also had outstanding purchase orders related to capital expenditures in the amount of \$2.1 million and \$2.8 million at December 31, 2020 and December 31, 2019, respectively.

Legal Proceedings

The Company is party to a number of legal actions and claims, none of which individually or in the aggregate, in the opinion of management, are expected to have a material adverse effect on the Company's consolidated results of operations or consolidated financial position.

In connection with the acquisition of Power Solutions, there is an ongoing claim by the Arezzo Revenue Agency in Italy concerning certain tax matters related to what was then Power-One Asia Pacific Electronics Shenzhen Co. Ltd. (now Bel Power Solutions Asia Pacific Electronics Shenzhen Co. Ltd, or "BPS China") for the years 2004 to 2006. In September 2012, the Tax Court of Arezzo ruled in favor of BPS China and cancelled the claim. In February 2013, the Arezzo Revenue Agency filed an appeal of the Tax Court's ruling. The hearing of the appeal was held on October 2, 2014. On October 13, 2014, BPS China was informed of the Regional Tax Commission of Florence ruling which was in favor of the Arezzo Revenue Agency and against BPS China. An appeal was filed on July 18, 2015 before the Regional Tax Commission of Florence and rejected. On December 5, 2016, the Arezzo Revenue Agency filed an appeal with the Supreme Court and BPS China filed a counter-appeal on January 4, 2017. The Supreme Court has yet to render its judgment. The estimated liability related to this matter is approximately \$12.0 million and has been included as a liability for uncertain tax positions on the accompanying consolidated balance sheets. As Bel is fully indemnified in this matter per the terms of the stock purchase agreement with ABB, a corresponding other asset for indemnification is also included in other assets on the accompanying consolidated balance sheets at December 31, 2020 and December 31, 2019.

On June 1, 2018, the Company filed an action against Unipower, LLC in the United States District Court for the Southern District of New York for breach of contract. Specifically, the Company alleges in its Complaint that Unipower has willfully violated the Master Services Agreement ("MSA") entered into by the parties on January 23, 2015 by failing to make payment for the products it contracted for under the MSA. The parties entered into a settlement agreement on December 17, 2018 resolving all outstanding claims and a Stipulation of Dismissal was filed and entered on January 10, 2019.

The Company is not a party to any other legal proceeding, the adverse outcome of which is likely to have a material adverse effect on the Company's consolidated financial condition or consolidated results of operations.

18. ACCUMULATED OTHER COMPREHENSIVE LOSS

The components of accumulated other comprehensive loss as of December 31, 2020 and 2019 are summarized below:

	December 31,	
	2020	2019
Foreign currency translation adjustment	\$ (13,142)	\$ (20,032)
Unrealized holding gains on available-for-sale securities, net of taxes of \$0 at December 31, 2020 and \$0 at December 31, 2020	19	12
Unfunded SERP liability, net of taxes of (\$1,377) at December 31, 2020 and (\$639) at December 31, 2020	(4,940)	(4,045)
Accumulated other comprehensive loss	<u>\$ (18,063)</u>	<u>\$ (24,065)</u>

Changes in accumulated other comprehensive (loss) income by component during the years ended December 31, 2020 and 2019 are as follows. All amounts are net of tax.

	Foreign Currency Translation Adjustment	Unrealized Holding Gains on Available- for-Sale Securities	Unfunded SERP Liability	Total
Balance at January 1, 2019	\$ (22,635)	\$ 12	\$ (2,215)	\$ (24,838)
Other comprehensive income (loss) before reclassifications	2,603	-	(1,492)	1,111
Amounts reclassified from accumulated other comprehensive income (loss)	-	-	125 (a)	125
Effect of adoption of ASU 2018-02 (Topic 220)	-	-	(463)	(463)
Net current period other comprehensive income (loss)	2,603	-	(1,830)	773
Balance at December 31, 2019	(20,032)	12	(4,045)	(24,065)
Other comprehensive income (loss) before reclassifications	6,890	7	(933)	5,964
Amounts reclassified from accumulated other comprehensive income (loss)	-	-	38 (a)	38
Net current period other comprehensive income (loss)	6,890	7	(895)	6,002
Balance at December 31, 2020	\$ (13,142)	\$ 19	\$ (4,940)	\$ (18,063)

- (a) This reclassification relates to the amortization of prior service costs and gains/losses associated with the Company's SERP plan. This expense is reflected in other (expense) income, net on the accompanying consolidated statement of operations.

19. SUBSEQUENT EVENTS

Acquisition of rms Connectors, Inc.

On January 8, 2021, the Company acquired rms Connectors, Inc. ("rms Connectors"), from rms Company Inc., a division of Cretex Companies, Inc., for \$8.5 million in cash. rms Connectors is a highly-regarded connector manufacturer with over 30 years of experience producing harsh environment circular connectors used in a variety of military and aerospace applications. This acquisition complements Bel's existing military and aerospace product portfolio and we anticipate will allow us to expand key customer relationships within these end markets and leverage the combined manufacturing resources to improve our operational efficiency. The transaction was funded with cash on hand. The initial purchase price allocation related to this acquisition was not yet available at the time of filing this Annual Report on Form 10-K.

Sale of Hong Kong Property and Related Bank Consent

On January 15, 2021, the Company sold a property in Hong Kong for net cash proceeds of \$6.7 million. The net book value for this property is approximately \$0.5 million, and a related gain on sale will be recorded in the first quarter of 2021. When this asset sale is combined with the previously-announced dispositions of the Company's Signal manufacturing facility in Inwood, New York and its Power R&D facility in Switzerland, the aggregate amount of proceeds of asset sales during the term of the credit agreement exceeded the disposition basket provided pursuant to the credit agreement. On February 3, 2021, the Company received a retroactive consent from its lenders to exclude the proceeds of the Hong Kong property sale from the calculation of the disposition basket outlined in the Credit Agreement.

Item 9. *Changes in and Disagreements With Accountants on Accounting and Financial Disclosures*

None.

Item 9A. *Controls and Procedures*

Evaluation of Disclosure Controls and Procedures

During the fourth quarter of 2020, the Company's management, including the principal executive officer and principal financial officer, supervised and participated in the evaluation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) related to the recording, processing, summarization, and reporting of information in the Company's periodic reports that the Company files with the SEC. These disclosure controls and procedures have been designed to ensure that material information relating to the Company, including its subsidiaries, is made known to the Company's management, including these officers, by other of the Company's employees, and that this information is recorded, processed, summarized, evaluated, and reported, as applicable, within the time periods specified in the SEC's rules and forms.

In designing and evaluating the disclosure controls and procedures, the Company recognizes that any controls and procedures, no matter how well designed and operated, provide only reasonable, not absolute, assurance that the above objectives have been met. Notwithstanding these limitations, the Company believes that its disclosure controls and procedures are designed and are operating to provide reasonable assurances of achieving their objectives.

Based on their evaluation as of December 31, 2020, the Company's principal executive officer and principal financial officer have concluded that the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) are effective to ensure that the information required to be disclosed by the Company in the reports that the Company files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms.

Management's Annual Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Under the supervision and with the participation of the Company's management, including the Company's principal executive officer and principal financial officer, the Company conducted an evaluation of the effectiveness of the Company's internal control over financial reporting based on the framework in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Based on the Company's evaluation under the framework in *Internal Control – Integrated Framework (2013)*, the Company's management concluded that the Company's internal control over financial reporting was effective as of December 31, 2020.

Deloitte & Touche LLP has audited the effectiveness of the Company's internal control over financial reporting as of December 31, 2020 and has expressed an unqualified opinion on the effectiveness of our internal control over financial reporting as of December 31, 2020 in their report which is included in Item 8 herein.

Changes in Internal Controls Over Financial Reporting

There has not been any change in our internal control over financial reporting during the three months ended December 31, 2020 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. *Other Information*

None.

Item 10. *Directors, Executive Officers and Corporate Governance*

The Registrant incorporates by reference herein information to be set forth in its definitive proxy statement for its 2021 annual meeting of shareholders that is responsive to the information required with respect to this item.

The Registrant has adopted a code of ethics for all of its associates, including directors, executive officers and all other senior financial personnel. The code of ethics, as amended from time to time, is available on the Registrant's website under Corporate Governance. The Registrant will also make copies of its code of ethics available to investors upon request. Any such request should be sent by mail to Bel Fuse Inc., 206 Van Vorst Street, Jersey City, NJ 07302 Attn: Farouq Tuweiq or should be made by telephone by calling Farouq Tuweiq at 201-432-0463.

Item 11. Executive Compensation

The Registrant incorporates by reference herein information to be set forth in its definitive proxy statement for its 2021 annual meeting of shareholders that is responsive to the information required with respect to this Item.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The Registrant incorporates by reference herein information to be set forth in its definitive proxy statement for its 2021 annual meeting of shareholders that is responsive to the remaining information required with respect to this Item.

The table below depicts the securities authorized for issuance under the Company's equity compensation plans.

Equity Compensation Plan Information

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights (a)	Weighted Average Exercise Price of Outstanding Options, Warrants and Rights (b)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a)) (c)
Equity compensation plans approved by security holders:			
2020 Equity Compensation Plan	-	\$ -	1,000,000
Equity compensation plans not approved by security holders	-	-	-
Totals	-	\$ -	1,000,000

Item 13. Certain Relationships and Related Transactions, and Director Independence

The Registrant incorporates by reference herein information to be set forth in its definitive proxy statement for its 2021 annual meeting of shareholders that is responsive to the information required with respect to this Item.

Item 14. Principal Accountant Fees and Services

The Registrant incorporates by reference herein information to be set forth in its definitive proxy statement for its 2021 annual meeting of shareholders that is responsive to the information required with respect to this Item.

Description of Capital Stock

Bel Fuse Inc. (the “Company”) is authorized to issue 10,000,000 shares of Class A Common Stock, par value \$0.10 per share (the “Class A Common Stock”), and 30,000,000 shares of Class B Common Stock, par value \$0.10 per share (the “Class B Common Stock” and, together with the Class A Common Stock, the “Common Stock”). As of March 1, 2021, there were 2,144,912 shares of Class A Common Stock outstanding and 10,204,602 shares of Class B Common Stock outstanding.

The Company is also authorized to 1,000,000 shares of preferred stock, no par value (the “Preferred Stock”), none of which are outstanding.

Common Stock

Voting

Except as described below under the caption “Class B Protection,” each share of Class A entitles the holder thereof to one vote per share on all matters on which shareholders are entitled to vote, including the election of directors. The Class B Common Stock does not entitle the holder thereof to any vote except as otherwise provided in the Company’s certificate of incorporation or as required by law.

Dividends and Other Distributions

Cash dividends are payable to the holders of Class A Common Stock and Class B Common Stock only as and when declared by the Board of Directors. Subject to the foregoing, cash dividends declared on shares of Class B Common Stock in any calendar year cannot be less than 5% higher per share than the annual amount of cash dividends per share declared in such calendar year on shares of Class A Common Stock. No cash dividends may be paid on shares of Class A Common Stock unless, at the same time, cash dividends are paid on shares of Class B Common Stock, subject to the annual 5% provision described above. Cash dividends may be paid at any time or from time to time on shares of Class B Common Stock without corresponding cash dividends being paid on shares of Class A Common Stock.

Each share of Class A Common Stock and Class B Common Stock is otherwise equal with respect to dividends (other than cash) and distributions (including distributions in connection with any recapitalization and upon liquidation, dissolution or winding up of the Company), except that dividends or other distributions payable on the Common Stock in shares of Common Stock may be made only as follows: (i) in shares of Class B Common Stock to the holders of both Class A Common Stock and Class B Common Stock; or (ii) in shares of Class A Common Stock to the holders of Class A Common Stock and in shares of Class B Common Stock to the holders of Class B Common Stock. The Company’s certificate of incorporation also provides that neither the Class A Common Stock nor the Class B Common Stock may be split, subdivided or combined unless the other is proportionately split, subdivided or combined.

The respective amounts of future dividends, if any, to be declared on each class of Common Stock depends on circumstances existing at the time, including the Company’s financial condition, capital requirements, earnings, legally available funds for the payment of dividends and other relevant factors.

Merger and Consolidations

Each holder of Class B Common Stock is entitled to receive the same amount and form of consideration per share as the per-share consideration, if any, received by any holder of the Class A Common Stock in a merger or consolidation of the Company (whether or not the Company is the surviving corporation).

Class B Protection

The provisions described under this caption (the “Class B Protection Provisions”) may have an anti-takeover effect by making the Company a less attractive target for a takeover bid.

For purposes of the Class B Protection Provisions, the following definitions apply:

“Affiliate” of any Person means any other Person directly or indirectly controlling or controlled by or under direct or indirect common control with such Person. For purposes of this definition, control when used with respect to any specified Person means the possession of the power to direct the management and policies of such Person, directly or indirectly, whether through the

ownership of voting securities, by contract or otherwise; and the terms controlling and controlled have meanings correlative to the foregoing.

"4% Shareholder" means any Person that, alone or together with any Affiliate, or any member of the immediate family (or trusts for the benefit thereof) of any such Person or Affiliate, beneficially owned at June 9, 1998, at least 4% of the aggregate number of shares of the Company's Common Stock then outstanding.

"1934 Act" means the Securities Exchange Act of 1934, as amended.

"Person" means any individual, partnership, joint venture, limited liability company, corporation, association, trust, incorporated organization, government or governmental department or agency or any other entity (other than the Company).

For purposes of the Class B Protection Provisions as set forth in the Company's certificate of incorporation, the following shares of Class A Common Stock are excluded for the purpose of determining the shares of Class A Common Stock beneficially owned or acquired by any Person or group but not for the purpose of determining shares outstanding:

(a) shares beneficially owned by such Person or group (or, in the case of a group, shares beneficially owned by Persons that are members of such group), immediately after the effective time of the recapitalization in 1998 when the Company caused each share of its Common Stock to be converted into one half share of Class A Common Stock and one half share of Class B Common Stock (the "Effective Time");

(b) shares acquired by will or by the laws of descent and distribution, or by a gift that is made in good faith and not for the purpose of circumventing the Class B Protection Provisions, or by termination or revocation of a trust or similar arrangement or by a distribution from a trust or similar arrangement if such trust or similar arrangement was created, and such termination, revocation or distribution occurred or was effected, in good faith and not for the purpose of circumventing the Class B Protection Provisions, or by reason of the ability of a secured party (following a default) to exercise voting rights with respect to, or to dispose of, shares that had been pledged in good faith as security for a bona fide loan, or by foreclosure of a bona fide pledge which secures a bona fide loan;

(c) shares acquired upon issuance or sale by the Company;

(d) shares acquired by operation of law (including a merger or consolidation effected for the purpose of recapitalizing a Person or reincorporating a Person in another jurisdiction but excluding a merger or consolidation effected for the purpose of acquiring another Person);

(e) shares acquired in exchange for Common Stock by a holder of Common Stock (or by a parent, lineal descendant or donee of such holder of Common Stock who received such Common Stock from such holder) if the Common Stock so exchanged was acquired by such holder directly from the Company as a dividend on shares of Class A Common Stock;

(f) shares acquired by a plan of the Company qualified under Section 401(a) of the Internal Revenue Code of 1986, as amended, or any successor provision thereto, or acquired by reason of a distribution from such a plan;

(g) shares beneficially owned by a Person or group immediately after the Effective Time which are thereafter acquired by an Affiliate of such Person or group (or by the members of the immediate family (or trusts for the benefit thereof) of any such Person or Affiliate) or by a group which includes such Person or group or any such Affiliate; and

(h) shares acquired indirectly through the acquisition of securities, or all or substantially all of the assets, of a Person that has a class of its equity securities registered under Section 12 (or any successor provision) of the 1934 Act.

For purposes of calculating the number of shares of Common Stock beneficially owned or acquired by any Person or group in administering the Class B Protection Provisions:

(a) shares of Common Stock acquired by gift are deemed to be beneficially owned by such Person or member of a group if such gift was made in good faith and not for the purpose of circumventing the operations of the Class B Protection Provisions; and

(b) only shares of Common Stock owned of record by such Person or member of a group or held by others as nominees of such Person or member of a group and identified as such to the Company shall be deemed to be beneficially owned by such Person or group (provided that shares of Common Stock with respect to which such Person or member of a group has sole investment and voting power shall be deemed to be beneficially owned thereby).

Subject to the other definitional provisions applicable to the Class B Protection Provisions, "beneficial ownership" under the Class B Protection Provisions is to be determined pursuant to Rule 13d-3 (as in effect on February 1, 1996) promulgated under the

1934 Act, and the formation or existence of a "group" is to be determined pursuant to Rule 13d-5(b) (as in effect on May 1, 1998) promulgated under the 1934 Act, in each case subject to the following additional qualifications:

(a) relationships by blood or marriage between or among any Persons will not constitute any of such Persons as a member of a group with any such other Person(s), absent affirmative attributes of concerted action; and

(b) any Person acting in his or her official capacity as a director or officer of the Company shall not be deemed to beneficially own shares where such ownership exists solely by virtue of such Person's status as a trustee (or similar position) with respect to shares held by plans or trusts for the general benefit of employees or former employees of the Company, and actions taken or agreed to be taken by a Person in such Person's official capacity as an officer or director of the Company will not cause such Person to become a member of a group with any other Person.

If any Person or group (other than any 4% Shareholder) acquires after the Effective Time beneficial ownership of shares representing 10% or more of the then outstanding Class A Common Stock, and such Person or group (a "Significant Shareholder") does not then beneficially own an equal or greater percentage of all then outstanding shares of Class B Common Stock, all of which Class B Common Stock must have been acquired by such Person or group after the Effective Time, the Class B Protection Provisions require that such Significant Shareholder must, in order to maintain all of its voting power, make (within a ninety-day period beginning the day after becoming a Significant Shareholder) a public cash tender offer, in accordance with all applicable laws and regulations, to acquire additional shares of Class B Common Stock (a "Class B Protection Transaction"). The 10% ownership threshold of the number of shares of Class A Common Stock which triggers a Class B Protection Provision may not be waived by the Board of Directors, nor may this threshold be amended without shareholder approval, including a majority vote of the votes cast by the then outstanding shares of Class B Common Stock entitled to vote, tabulated separately as a class.

The Company's certificate of incorporation contains several provisions describing the nature of the public cash tender offer to be made by a Significant Shareholder. If a Significant Shareholder fails to make a tender offer required by the Class B Protection Provisions, or to purchase validly tendered and not withdrawn shares (after proration, if any), the voting rights of all of the shares of Class A Common Stock beneficially owned by such Significant Shareholder which were acquired after the Effective Time are to be automatically suspended until completion of a Class B Protection Transaction or until divestiture of the excess shares of Class A Common Stock that triggered such requirement. To the extent that the voting power of any shares of Class A Common Stock is so suspended, such shares will not be included in the determination of aggregate voting shares for any purpose.

A Class B Protection Transaction is also be required of any Significant Shareholder each time that the Significant Shareholder acquires after the Effective Time beneficial ownership of an additional amount of shares of Class A Common Stock equal to or greater than the next higher integral multiple of 5% in excess of 10% (e.g., 20%, 25%, 30%, etc.) of the outstanding shares of Class A Common Stock and such Significant Shareholder does not then own an equal or greater percentage of all then outstanding shares of Class B Common Stock that such Significant Shareholder acquired after the Effective Time. Such Significant Shareholder would be required to offer to buy that number of additional shares prescribed by a formula set forth in the Company's certificate of incorporation.

The Class B Protection Provisions specifically exclude any 4% Shareholder.

Neither the Class B Protection Transaction requirement nor the related possibility of suspension of voting rights applies to any increase in percentage beneficial ownership of shares of Class A Common Stock resulting solely from a change in the total number of shares of Class A Common Stock outstanding, provided that any acquisition after such change which results in any Person or group having acquired after the Effective Time beneficial ownership of 10% or more of the number of then outstanding shares of Class A Common Stock (or, after the last acquisition which triggered the requirement for a Class B Protection Transaction, additional shares of Class A Common Stock in an amount equal to the next higher integral multiple of 5% in excess of the number of shares of Class A Common Stock then outstanding) is subject to any Class B Protection Transaction requirement that would be otherwise imposed. All calculations with respect to percentage beneficial ownership of issued and outstanding shares of either class of Common Stock are to be based upon the number of issued and outstanding shares reported by the Company on the last to be filed of (i) the Company's most recent Annual Report on Form 10-K, (ii) its most recent Quarterly Report on Form 10-Q, (iii) its most recent Current Report on Form 8-K, and (iv) its most recent definitive proxy statement filed with the SEC.

Convertibility

Except as described below, neither the Class A Common Stock nor the Class B Common Stock is convertible into another class of Common Stock or any other security of the Company.

The Class B Common Stock may be converted into Class A Common Stock on a share-for-share basis by resolution of the Board of Directors if, as a result of the existence of the Class B Common Stock, the Class A Common Stock or the Class B

Common Stock or both become excluded from quotation on the NASDAQ National Market System or, if such shares are then quoted on another national quotation system or listed on a national securities exchange, from trading on the principal national quotation system or national securities exchange on which the shares are then traded.

In addition, if at any time, as a result of additional issuances by the Company of Class B Common Stock, repurchases by the Company of Class A Common Stock or a combination of such issuances and repurchases, the number of outstanding shares of Class A Common Stock as reflected on the stock transfer books of the Company falls below 10% of the aggregate number of outstanding shares of Class A Common Stock and Class B Common Stock, then immediately upon the occurrence of such event all of the outstanding shares of Class B Common Stock will be automatically converted into shares of Class A Common Stock, on a share-for-share basis. For purposes of the immediately preceding sentence, any shares of Class A Common Stock or Class B Common Stock repurchased or otherwise acquired by the Company and held as treasury shares will no longer be deemed "outstanding" from and after the date of acquisition.

Preemptive Rights

The Common Stock does not carry any preemptive rights enabling a holder thereof to subscribe for or receive shares of any class of stock of the Company or any securities convertible into shares of any class of stock of the Company.

Preferred Stock

Pursuant to the Company's certificate of incorporation, the Company's board of directors has the authority, without further action by the stockholders, to issue from time to time up to 1,000,000 shares of Preferred Stock in one or more series. The Company's board of directors may designate the rights, preferences, privileges and restrictions of the Preferred Stock, including dividend rights, conversion rights, voting rights, redemption rights, liquidation preference, sinking fund terms and the number of shares constituting any series or the designation of any series. The issuance of Preferred Stock could have the effect of limiting dividends on the Class A Common Stock and Class B Common Stock, diluting the voting power of the Class A Common Stock, impairing the liquidation rights of the Class A Common Stock and Class B Common Stock or delaying, deterring or preventing a change in control. Such issuance could have the effect of decreasing the market price of the Class A Common Stock and Class B Common Stock.

Anti-takeover Effects of our Certificate of Incorporation and Bylaws and New Jersey Law

The Company's certificate of incorporation and bylaws contain provisions that could have the effect of delaying, deferring or discouraging another party from acquiring control of the Company. These provisions and certain provisions of New Jersey law, which are summarized below, could discourage takeovers, coercive or otherwise. These provisions are also designed, in part, to encourage persons seeking to acquire control of the Company to negotiate first with the Company's board of directors. The Company believes that the benefits of increased protection of its potential ability to negotiate with an unfriendly or unsolicited acquirer outweigh the disadvantages of discouraging a proposal to acquire the Company.

Dual class stock. As described above, the Company's certificate of incorporation provides for a dual class common stock structure, which provides the holders of the Class A Common Stock (other than those whose right to vote has been suspended) significant influence over all matters requiring shareholder approval, including the election of directors and significant corporate transactions, such as a merger or other sale of the Company or its assets.

Issuance of undesignated preferred stock. As discussed above, the Company's board of directors has the ability to designate and issue Preferred Stock with voting or other rights or preferences that could deter hostile takeovers or delay changes in the Company's control or management.

Board classification. The Company's certificate of incorporation provides that its board of directors is divided into three classes, one class of which is elected each year by the Company's voting shareholders. The directors in each class serve for a three-year term. The Company's classified board of directors may tend to discourage a third party from making a tender offer or otherwise attempting to obtain control of the Company because it generally makes it more difficult for shareholders to replace a majority of the directors.

Greater Than Majority Vote. The Company's certificate of incorporation provides that in addition to any other voting requirement imposed by law, by contract, by the Company's certificate of incorporation or by the Company's by-laws, specific greater than majority voting requirements will apply in order to approve certain "Business Combinations" (as defined in the Company's certificate of incorporation) unless the applicable Business Combination is approved by a majority of the Company's "Continuing Directors" (as defined in the Company's certificate of incorporation) or the consideration payable to shareholders in the transaction meets certain stringent requirements. The specific greater than majority voting requirements mandate that (in the absence of such Board approval or satisfaction of the stringent consideration requirements) approval be granted by holders of (i) at least 80% of the shares entitled to vote on the transaction and (ii) at least a majority of the shares entitled to vote on the

Business Combination excluding shares held by Related Persons (as defined in the Company's certificate of incorporation) and their affiliates (with certain variances depending upon whether or not the Business Combination involves a liquidation or dissolution). This provision is intended to encourage potential bidders to negotiate with the Board and its representatives. This provision, and the New Jersey legislation described in the next two paragraphs, may have an anti-takeover effect with respect to transactions that the Company's board of directors does not approve in advance and may discourage attempts that might result in a premium over the market price for the shares of Common Stock held by the Company's shareholders.

New Jersey Legislation. Similarly, for public companies incorporated in New Jersey (such as the Company), the New Jersey Business Corporation Act contains mandatory provisions that are designed to encourage potential bidders to negotiate with the board of directors and its representatives in connection with certain business combinations. The New Jersey Business Corporation Act provides that no such companies may engage in any "business combination" (as defined in the New Jersey Business Corporation Act) with any interested stockholder (generally a 10% or greater stockholder) of such companies for a period of five years following such interested stockholder's stock acquisition date (as defined in the New Jersey Business Corporation Act), unless (x) such business combination is approved by the board of directors of such corporation prior to the interested stockholder's stock acquisition date or (y) the transaction or series of transactions that caused the interested stockholder to become an interested stockholder is approved by the board of directors of the corporation prior to that stockholder's stock acquisition date and a subsequent business combination is approved by (i) directors who are independent of the interested stockholder and (ii) holders of a majority of the voting shares (excluding the shares owned by the interested stockholder).

In addition, no such company may engage, after the five year period, in any business combination with any interested stockholder of such corporation other than: (i) a business combination approved by the board of directors prior to that stockholder's stock acquisition date, (ii) a business combination approved by the affirmative vote of the holders of two-thirds of the voting stock not beneficially owned by such interested stockholder, (iii) a business combination in which the interested stockholder pays a formula price designed to ensure that all other shareholders receive at least the highest price per share paid by such interested stockholder or (iv) a business combination that is approved by (a) directors who are independent of the interested stockholder and (b) holders of a majority of the voting shares (excluding the shares owned by the interested stockholder) if the transaction or series of related transactions that caused the interested stockholder to become an interested stockholder was approved by the board of directors of such company prior to the consummation of such transaction or series of related transactions.

Limits on ability of stockholders to call a special meeting. Subject to provisions of New Jersey law that permit holders of at least 10% of the Class A Common Stock to petition a New Jersey court to order a special meeting of shareholders for good cause shown, the Company's bylaws provide that special meetings of the stockholders may be called only by the president or a majority of the board of directors. This provision may delay the ability of the Company's shareholders to force consideration of a proposal or for holders controlling a majority of the Class a Common Stock to take any action.

Requirements for advance notification of shareholder nominations and proposals. The Company's bylaws establish advance notice procedures with respect to shareholder proposals and the nomination of candidates for election as directors at the Company's annual meeting of shareholders, other than nominations made by or at the direction of the Company's board of directors. These advance notice procedures may have the effect of precluding the conduct of certain business at a meeting if the proper procedures are not followed and may also discourage or deter a potential acquirer from conducting a solicitation of proxies to elect its own slate of directors or otherwise attempt to obtain control of the Company.

Election and removal of directors. Under the Company's certificate of incorporation, newly created directorships on the board of directors may be filled only by the affirmative vote of three quarters of the directors then serving on the board of directors. Under the Company's certificate of incorporation, directors may be removed by shareholders only for cause and only with the approval of holders of two-thirds of the shares entitled to vote on removal.

The provisions of New Jersey law and the provisions of the Company's certificate of incorporation and bylaws could have the effect of discouraging others from attempting hostile takeovers and, as a consequence, they might also inhibit temporary fluctuations in the market price of the Common Stock that often result from actual or rumored hostile takeover attempts. These provisions might also have the effect of preventing changes in the Company's management. It is also possible that these provisions could make it more difficult to accomplish transactions that shareholders might otherwise deem to be in their best interests

CONSENT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We consent to the incorporation by reference in Registration Statement No. 333-239189 on Form S-3 and Registration Statement Nos. 333-180340 and 333-239267 on Form S-8 of our report dated March 12, 2021, relating to the consolidated financial statements of Bel Fuse Inc. and subsidiaries (the "Company"), and the effectiveness of the Company's internal control over financial reporting, appearing in this Annual Report on Form 10-K of the Company for the year ended December 31, 2020.

/s/ DELOITTE & TOUCHE LLP
New York, New York

March 12, 2021

CERTIFICATIONS

I, Daniel Bernstein, certify that:

1. I have reviewed this annual report on Form 10-K of Bel Fuse Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal controls over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
