#### CAUTIONARY NOTICE REGARDING FORWARD-LOOKING INFORMATION

The terms the "Company," "Bel," "we," "us," and "our" as used in this report refer to Bel Fuse Inc. and its consolidated subsidiaries unless otherwise specified.

The Company's consolidated operating results are affected by a wide variety of factors that could materially and adversely affect revenues and profitability, including the risk factors described in Item 1A of our 2020 Annual Report on Form 10-K and the risk factors described in this quarterly report. As a result of these and other factors, the Company may experience material fluctuations in future operating results on a quarterly or annual basis, which could materially and adversely affect its business, consolidated financial condition, operating results, and common stock prices. Furthermore, this document and other documents filed by the Company with the Securities and Exchange Commission ("SEC") contain certain forward-looking statements under the Private Securities Litigation Reform Act of 1995 ("Forward-Looking Statements") with respect to the business of the Company. Forward-Looking Statements are necessarily subject to risks and uncertainties, many of which are outside our control, that could cause actual results to differ materially from these statements. Forward-Looking Statements can be identified by such words as "anticipates," "believes," "plan," "assumes," "could," "should," "estimates," "expects," "intends," "potential," "seek," "predict," "may," "will" and similar references to future periods. All statements other than statements of historical facts included in this report regarding our strategies, prospects, financial condition, operations, costs, plans and objectives and regarding the anticipated impact of COVID-19 are Forward-Looking Statements. These Forward-Looking Statements are subject to certain risks and uncertainties, including those detailed in Item 1A of our 2020 Annual Report on Form 10-K and in the risk factors described in this quarterly report, which could cause actual results to differ materially from these Forward-Looking Statements. The Company undertakes no obligation to publicly release the results of any revisions to these Forward-Looking Statements which may be necessary to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Any Forward-Looking Statement made by the Company is based only on information currently available to us and speaks only as of the date on which it is made.

# BEL FUSE INC. AND SUBSIDIARIES NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

#### 1. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

The condensed consolidated balance sheets and statements of operations, comprehensive income, stockholders' equity and cash flows for the periods presented herein have been prepared by the Company and are unaudited. In the opinion of management, all adjustments (consisting solely of normal recurring adjustments) necessary to present fairly the consolidated financial position, results of operations and cash flows for all periods presented have been made. The results for the six months ended June 30, 2021 are not necessarily indicative of the results to be expected for the full year. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and footnotes thereto included in the Bel Fuse Annual Report on Form 10-K for the year ended December 31, 2020.

Certain information and footnote disclosures required under accounting principles generally accepted in the United States of America ("U.S. GAAP") have been condensed or omitted from these condensed consolidated financial statements pursuant to the rules and regulations, including the interim reporting requirements, of the U.S. Securities and Exchange Commission ("SEC"). The preparation of condensed consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts and the disclosure of contingent amounts in our condensed consolidated financial statements and accompanying notes. Actual results could differ from these estimates.

The Company's significant accounting policies are summarized in Note 1 of the Company's Annual Report on Form 10-K for the year ended December 31, 2020. There were no significant changes to these accounting policies during the six months ended June 30, 2021, except as discussed in "Recently Adopted Accounting Standards" below.

Reclassifications - During the fourth quarter of 2020, the Company changed its financial statement presentation related to gain/loss on its SERP investments. These gains/losses were previously included within cost of sales and selling, general and administrative expense. A gain on SERP investment in the amount of \$1.5 million has been reclassified from cost of sales (\$0.5 million) and selling, general and administrative expenses (\$1.0 million), to other income (expense), net on the accompanying condensed consolidated statement of operations for the three months ended June 30, 2020. A loss on SERP investment in the amount of \$0.5 million has been reclassified from cost of sales (\$0.2 million) and selling, general and administrative expense (\$0.3 million), to other income (expense), net on the accompany condensed consolidated statement of operations for the six months ended June 30, 2020.

All amounts included in the tables to these notes to condensed consolidated financial statements, except per share amounts, are in thousands.

#### **Recently Adopted Accounting Standards**

In August 2018, the FASB issued ASU 2018-14, *Compensation-Retirement Benefits-Defined Benefit Plans-General (Subtopic 715-20): Disclosure Framework – Changes to the Disclosure Requirements for Defined Benefit Plans* ("ASU 2018-14"). This guidance removes certain disclosures that are not considered cost beneficial, clarifies certain required disclosures and adds additional disclosures. The Company adopted amendments in ASU 2018-14 on a retrospective basis effective January 1, 2021. The adoption of this guidance will modify the Company's annual disclosures for its defined benefit plan, but did not have any impact on the Company's consolidated financial statements.

In December 2019, the FASB issued ASU 2019-12, *Simplifying the Accounting for Income Taxes* ("ASU 2019-12"), which modifies ASC 740 to reduce complexity while maintaining or improving the usefulness of the information provided to users of financial statements. This guidance was adopted by the Company effective January 1, 2021 and did not have a material impact on the Company's consolidated financial statements.

#### **Accounting Standards Issued But Not Yet Adopted**

In June 2016, the FASB issued ASU No. 2016-13, *Financial Instruments — Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments* ("ASU 2016-13"), as amended. The new guidance will broaden the information that an entity must consider in developing its expected credit loss estimates related to its financial instruments and adds to U.S. GAAP an impairment model that is based on expected losses rather than incurred losses. The amendment is currently effective for the Company for annual reporting periods beginning after December 15, 2022, with early adoption permitted. Management is currently assessing the impact of ASU 2016-13, but it is not expected to have a material impact on the Company's consolidated financial statements.

In March 2020, the FASB issued ASU No. 2020-04, *Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting* ("ASU 2020-04"). ASU 2020-04 provides temporary optional guidance on contract modifications and hedging accounting to ease the financial reporting burdens of the expected market transition from the London Interbank Offered Rate ("LIBOR") to alternative reference rates. In January 2021, the FASB issued ASU 2021-01, which refines the scope of Topic 848 and clarifies some of its guidance as part of the FASB's monitoring of global reference rate activities. The new guidance was effective upon issuance, and the Company is allowed to elect to apply the amendments prospectively through December 31, 2022. Management is currently evaluating the impact of this accounting standard update on the Company's consolidated financial statements and related disclosures.

#### 2. ACQUISITIONS

#### rms Connectors

On January 8, 2021, the Company acquired rms Connectors, Inc. ("rms Connectors"), from rms Company Inc., a division of Cretex Companies, Inc., for \$9.0 million in cash, including a working capital adjustment. rms Connectors is a highly-regarded connector manufacturer with over 30 years of experience producing harsh environment circular connectors used in a variety of military and aerospace applications. This acquisition complements Bel's existing military and aerospace product portfolio and we anticipate will allow us to expand key customer relationships within these end markets and leverage the combined manufacturing resources to improve our operational efficiency. Originally based in Coon Rapids, MN, the rms Connectors business was relocated into Bel's existing facilities during the second quarter of 2021, and is a component of Bel's Connectivity Solutions group. The transaction was funded with cash on hand.

#### **EOS Power**

On March 31, 2021, the Company completed the acquisition of EOS Power ("EOS") through a stock purchase agreement for \$7.8 million, net of cash acquired, including a working capital adjustment. EOS, located in Mumbai, India, had sales of \$12.0 million for the year ended December 31, 2020. EOS is expected to play a key role in Bel's penetration of certain industrial and medical markets currently being served by EOS, with a strong line of high-power density and low-profile products with high convection ratings. In addition to new products and customers acquired, this acquisition has diversified Bel's manufacturing footprint in Asia. The EOS business is a component of Bel's Power Solutions & Protection group. The transaction was funded with cash on hand

The acquisitions of rms Connectors and EOS may hereafter be referred to collectively as either the "2021 Acquisitions" or the "2021 Acquired Companies". As of the respective acquisition dates, all of the assets acquired and liabilities assumed were recorded at their preliminary fair values and the Company's condensed consolidated results of operations for the six months ended June 30, 2021 include the operating results of the 2021 Acquired Companies from their respective acquisition dates through June 30, 2021. During the three and six months ended June 30, 2021, the Company incurred \$0.3 million and \$0.5 million, respectively, of acquisition-related costs related to the 2021 Acquisitions. These costs are included in selling, general and administrative expenses in the accompanying condensed consolidated statements of operations.

While the initial accounting related to the 2021 Acquisitions is not complete as of the filing date of this Form 10-Q, the following table depicts the Company's estimated acquisition date fair values of the consideration transferred and identifiable net assets acquired in these transactions:

		Acqui	sition 1	Date Fair Va	lues	
	r	ms		EOS	Total	
Cash and cash equivalents	\$		\$	3,903	\$	3,903
Accounts receivable		1,283		1,805		3,088
Inventories		3,946		1,878		5,824

Accounts payable		(62)		(2,148)		(2,210)
Accrued expenses		(209)		(506)		(715)
Total liabilities assumed		(271)		(2,654)		(2,925)
Net identifiable assets acquired		9,002		7,053		16,055
Goodwill		-		4,659		4,659
Net assets acquired	\$	9,002	\$	11,712	\$	20,714
•					-	
Cash paid		9,002		11,712		20,714
Fair value of consideration transferred	\$	9,002	\$	11,712	\$	20,714

Measurement period adjustments recorded during the second quarter of 2021 on the EOS acquisition related to finalization of their opening balance sheet, and subsequent audit of EOS' fiscal year-end March 31, 2021 financial statements. The Company has identified intangible assets, including but not limited to trademarks and customer lists, as well as tangible property including inventory and property, plant and equipment, which are still in the process of being valued. The Company expects to finalize these valuations and complete the purchase price allocation as soon as practicable but no later than one year from the respective acquisition dates.

Based upon the preliminary purchase price allocation above, there is currently no goodwill associated with the rms acquisition. Any goodwill recognized in connection with the EOS acquisition would be allocated to the Company's Power Solutions and Protection segment and would not be deductible for tax purposes.

The results of operations of the 2021 Acquired Companies have been included in the Company's condensed consolidated financial statements for the periods subsequent to their respective acquisition dates. During the three and six months ended June 30, 2021, the 2021 Acquired Companies contributed revenues of \$6.0 million and \$8.1 million, respectively, and estimated net earnings of \$1.0 million and \$1.4 million, respectively, to the Company since their respective acquisition dates. As EOS was acquired on March 31, 2021, this acquisition did not have any contribution to revenue or net earnings during the first quarter of 2021. The unaudited pro forma information below presents the combined operating results of the Company and the 2021 Acquired Companies. The unaudited pro forma results are presented for illustrative purposes only. They do not reflect the realization of any potential cost savings, or any related integration costs. These pro forma results do not purport to be indicative of the results that would have actually been obtained if the 2021 Acquisitions had occurred as of January 1, 2020, nor is the pro forma data intended to be a projection of results that may be achieved in the future.

The following unaudited pro forma consolidated results of operations assume that the acquisition of the 2021 Acquired Companies was completed as of January 1, 2020:

	Three Mor June	 	Six Mont June	-	
	 2021	2020	2021		2020
Revenue	\$ 138,741	\$ 125,082	\$ 252,406	\$	233,136

The balances of the Company's contract assets and contract liabilities at June 30, 2021 and December 31, 2020 are as follows:

	J	une 30, 2021	 December 31, 2020
Contract assets - current (unbilled receivables)	\$	18,277	\$ 14,135
Contract liabilities - current (deferred revenue)	\$	1,176	\$ 2,077

The change in balance of our unbilled receivables from December 31, 2020 to June 30, 2021 primarily relates to a timing difference between the Company's performance (i.e. when our product is shipped to a customer-controlled hub) and the point at which the Company can invoice the customer per the terms of the customer contract (i.e. when the customer pulls our product from the customer-controlled hub).

The aggregate amount of transaction price allocated to remaining performance obligations that have not been satisfied as of June 30, 2021 related to contracts that exceed one year in duration amounted to \$18.3 million, with expected contract expiration dates that range from 2022 - 2025. It is expected that 64% of this aggregate amount will be recognized in 2022, 23% will be recognized in 2023 and the remainder will be recognized in years beyond 2023.

#### 4. EARNINGS PER SHARE

The following table sets forth the calculation of basic and diluted net earnings per common share under the two-class method for the three and six months ended June 30, 2021 and 2020:

Numerator:         Net earnings         \$ 7,880         \$ 5,573         \$ 11,080         \$ 1,769           Less dividends declared:         \$ 129         129         257         259           Class A         129         129         257         259           Class B         714         707         1,430         1,416           Undistributed earnings         \$ 7,037         \$ 4,737         \$ 9,393         \$ 94           Undistributed earnings allocation - basic and diluted:         \$ 1,170         \$ 794         \$ 1,565         \$ 15           Class A undistributed earnings         \$ 1,170         \$ 794         \$ 1,565         \$ 15           Class B undistributed earnings         \$ 7,307         \$ 4,737         \$ 9,393         \$ 9.99           Total undistributed earnings         \$ 7,307         \$ 4,737         \$ 9,393         \$ 9.99           Net earnings allocation - basic and diluted:         \$ 1,299         \$ 9,393         \$ 1,49           Class A net earnings         \$ 5,57         \$ 1,002         \$ 1,495           Action of the earnings of the earnings         \$ 1,29         \$ 1,505         \$ 1,495           Action of the earnings         \$ 7,800         \$ 5,573         \$ 1,000         \$ 1,760           Action of		Three Months Ended June 30,					Six Mont June	-	30,

### 5. FAIR VALUE MEASUREMENTS

Fair value is defined as an exit price, representing the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants based upon the best use of the asset or liability at the measurement date. Entities are required to use a fair value hierarchy which maximizes the use of observable inputs and minimizes the use of unobservable inputs when measuring fair value. There are three levels of inputs that may be used to measure fair value:

- **Level 1** Observable inputs such as quoted market prices in active markets;
- Level 2 Inputs other than quoted prices in active markets that are either directly or indirectly observable; and
- Level 3 Unobservable inputs about which little or no market data exists, therefore requiring an entity to develop its own assumptions.

As of June 30, 2021 and December 31, 2020, our available-for-sale securities primarily consisted of investments held in a rabbi trust which are intended to fund the Company's Supplemental Executive Retirement Plan ("SERP") obligations. These securities are measured at fair value using quoted prices in active markets for identical assets (Level 1 inputs) and amounted to \$0.5 million at June 30, 2021 and \$0.7 million at December 31, 2020. During the first quarter of 2021, the Company entered into foreign exchange forward contracts, the fair value of which was less than \$0.1 million at June 30, 2021. The Company does not have any financial assets measured at fair value on a recurring basis categorized as Level 3, and there were no transfers in or out of Level 3 during the six months ended June 30, 2021 or June 30, 2020. There were no changes to the Company's valuation techniques used to measure asset fair values on a recurring or nonrecurring basis during the six months ended June 30, 2021 or June 30, 2020.

There were no financial assets accounted for at fair value on a nonrecurring basis as of June 30, 2021 or December 31, 2020.

The Company has other financial instruments, such as cash and cash equivalents, accounts receivable, restricted cash, accounts payable and accrued expenses, which are not measured at fair value on a recurring basis but are recorded at amounts that approximate fair value due to their liquid or short-term nature. The fair value of the Company's long-term debt is estimated using a discounted cash flow method based on interest rates that are currently available for debt issuances with similar terms and maturities. At June 30, 2021 and December 31, 2020, the estimated fair value of total debt was \$114.5 million and \$118.4 million, respectively, compared to a carrying amount of \$112.9 million and \$115.6 million, respectively. The Company did not have any other financial liabilities within the scope of the fair value disclosure requirements as of June 30, 2021.

Nonfinancial assets and liabilities, such as goodwill, indefinite-lived intangible assets and long-lived assets, are accounted for at fair value on a nonrecurring basis. These items are tested for impairment upon the occurrence of a triggering event or in the case of goodwill, on at least an annual basis. The Company considered the impacts of COVID-19 on Bel's business and on general economic conditions when making its assessment on whether a triggering event had occurred during the six months ended June 30, 2021. Based on the Company's assessment, it was concluded that no triggering events occurred during the six months ended June 30, 2021 or 2020 that would warrant interim impairment testing.

#### 6. INVENTORIES

The components of inventories are as follows:

	June 30, 2021	December 31, 2020
Raw materials	\$ 53,211	\$ 40,846
Work in progress	29,580	25,916
Finished goods	33,379	33,371
Inventories	\$ 116,170	\$ 100,133

### 7. PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment consist of the following:

	June 30, 2021	December 31, 2020		
Land	\$ 1,112	\$ 1,115		
Buildings and improvements	20,814	19,917		
Machinery and equipment	127,600	124,114		
Construction in progress	2,277	1,603		
	151,803	146,749		
Accumulated depreciation	(115,056)	(112,248)		
Property, plant and equipment, net	\$ 36,747	\$ 34,501		

Depreciation expense was \$2.5 million and \$2.3 million, respectively, for the three months ended June 30, 2021 and 2020 and \$5.0 million and \$4.7 million, respectively, for the six months ended June 30, 2021 and 2020. Depreciation expense related to our manufacturing facilities and equipment is included in cost of sales and depreciation expense associated with administrative facilities and office equipment is included in selling, general and administrative expense within the accompanying condensed consolidated statements of operations.

At June 30, 2021, a total of \$1.6 million of property was classified as assets held for sale on the accompanying condensed consolidated balance sheet related to our corporate headquarters building in Jersey City, New Jersey.

#### 8. ACCRUED EXPENSES

Accrued expenses consist of the following:

	June 30, 2021	December 31, 2020
Sales commissions	\$ 2,494	\$ 2,574
Subcontracting labor	2,279	758
Salaries, bonuses and related benefits	19,020	17,165
Warranty accrual	1,294	1,010
Other	8,383	6,969
	\$ 33,470	\$ 28,476

The change in warranty accrual during the six months ended June 30, 2021 primarily related to repair costs incurred and adjustments to pre-existing warranties. There were no new material warranty charges incurred during the six months ended June 30, 2021.

#### **Restructuring Activities**

Included within other accrued expenses in the table above are costs accrued related to the Company's restructuring activities. Activity and liability balances related to restructuring costs for the six months ended June 30, 2021 are as follows:

			Six Months Ended June 30, 2021				
				Cash			
	Li	ability at		Payments		5	Liability at
	D	ecember					
		31,	N	New and Other			June 30,
		2020	Ch	arges	Settlemen	ts	2021
Severance costs	\$	124	\$	277	\$ (31	l1)	\$ 90
Other restructuring costs		-		-		-	-
Total	\$	124	\$	277	\$ (31	11)	\$ 90

#### 9. DEBT

The Company has a Credit and Security Agreement with KeyBank National Association (as amended, the "credit agreement" or the "CSA"). The CSA consists of (i) a term loan, with outstanding borrowings of \$101.9 million and \$104.8 million at June 30, 2021 and December 31, 2020, respectively, and (ii) a \$75 million revolving credit facility ("Revolver"), with \$12.0 million in outstanding borrowings at each of June 30, 2021 and December 31, 2020. The CSA has a maturity date of December 11, 2022. At June 30, 2021 and December 31, 2020, the carrying value of the debt on the condensed consolidated balance sheet is reflected net of \$0.9 million and \$1.3 million, respectively, of deferred financing costs.

On February 3, 2021, the Company received a retroactive consent from its lenders to exclude the proceeds of a property sale in Hong Kong from the calculation of the disposition basket outlined in the credit agreement.

The weighted-average interest rate in effect was 1.88% at June 30, 2021 and 2.19% at December 31, 2020 and consisted of LIBOR plus the Company's credit spread, as determined per the terms of the CSA. The Company incurred \$0.7 million and \$1.3 million of interest expense during the three months ended June 30, 2021 and June 30, 2020, respectively, and \$1.5 million and \$2.6 million of interest expense during the six months ended June 30, 2021 and June 30, 2020, respectively.

The CSA contains customary representations and warranties, covenants and events of default and financial covenants that measure (i) the ratio of the Company's total funded indebtedness, on a consolidated basis, to the amount of the Company's consolidated EBITDA, as defined ("Leverage Ratio") and (ii) the ratio of the amount of the Company's consolidated EBITDA to the Company's consolidated fixed charges ("Fixed Charge Coverage Ratio"). If an event of default occurs, the lenders under the CSA would be entitled to take various actions, including the acceleration of amounts due thereunder and all actions permitted to be taken by a secured creditor. At June 30, 2021, the Company was in compliance with its debt covenants, including its most restrictive covenant, the Leverage Ratio.

#### 10. INCOME TAXES

The Company's estimated taxable income in future periods is not on a legal entity basis and therefore income tax expense for the interim period is not measured using the annual effective tax rate ("AETR") method. The Company is working on developing reliable estimates for future periods. The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction and various states and foreign jurisdictions. The Company is no longer subject to U.S. federal examinations by tax authorities for years before 2017 and for state examinations before 2014. Regarding foreign subsidiaries, the Company is no longer subject to examination by tax authorities for years before 2010 in Asia and generally 2012 in Europe.

As a result of the expiration of the statutes of limitations for specific jurisdictions, it is reasonably possible that the related unrecognized benefits for tax positions taken regarding previously filed tax returns may change materially from those recorded as liabilities for uncertain tax positions in the Company's condensed consolidated financial statements at June 30, 2021. The Company's liabilities for uncertain tax positions totaled \$26.9 million and \$28.5 million at June 30, 2021 and December 31, 2020, respectively, of which \$2.4 million is included in other current liabilities at December 31, 2020 and was resolved during 2021 by way of expiration of the related statutes of limitations. These amounts, if recognized, would reduce the Company's effective tax rate.

The Company's policy is to recognize interest and penalties related to uncertain tax positions as a component of the current provision for income taxes. During the six months ended June 30, 2021 and 2020, the Company recognized \$0.4 million and \$0.4 million, respectively, in interest and penalties in the condensed consolidated statements of operations during each period. The Company has approximately \$4.6 million and \$5.2 million, respectively, accrued for the payment of interest and penalties at June 30, 2021 and December 31, 2020, which is included in both income taxes payable and liability for uncertain tax positions in the condensed consolidated balance sheets.

#### 11. RETIREMENT FUND AND PROFIT SHARING PLAN

The Company maintains the Bel Fuse Inc. Employees' Savings Plan, a defined contribution plan that is intended to meet the applicable requirements for tax-qualification under sections 401(a) and (k) of the Internal Revenue Code of 1986, as amended. The expense for the three months ended June 30, 2021 and 2020 amounted to \$0.3 million in both periods. The expense for the six months ended June 30, 2021 and 2020 amounted to \$0.6 million in both periods. The Company's matching contribution is made in the form of Bel Fuse Inc. Class A common stock. As of June 30, 2021, the plan owned 280,812 and 106,144 shares of Bel Fuse Inc. Class A and Class B common stock, respectively.

The Company's subsidiaries in Asia have a retirement fund covering substantially all of their Hong Kong based full-time employees. The expense for the three months ended June 30, 2021 and 2020 amounted to \$0.2 million and \$0.1 million, respectively, and the expense for the six months ended June 30, 2021 and 2020 amounted to \$0.3 million and \$0.2 million, respectively. As of June 30, 2021, the plan owned 3,323 and 17,342 shares of Bel Fuse Inc. Class A and Class B common stock, respectively.

The Company maintains a SERP, which is designed to provide a limited group of key management and other key employees of the Company with supplemental retirement and death benefits. As discussed in Note 5 above, the Company has investments in a rabbi trust which are intended to fund the obligations of the SERP.

The components of SERP expense are as follows:

	Three Months Ended June 30,					Six Months Ended June 30,				
		2021		2020		2021		2020		
Service cost	\$	169	\$	150	\$	339	\$	300		
Interest cost		135		159		270		318		
Net amortization		127		86		255		172		
Net periodic benefit cost	\$	431	\$	395	\$	864	\$	790		

The service cost component of net benefit cost is presented within cost of sales or selling, general and administrative expense on the accompanying condensed consolidated statements of operations, in accordance with where compensation cost for the related associate is reported. All other components of net benefit cost, including interest cost and net amortization noted above, are presented within other income (expense), net in the accompanying condensed consolidated statements of operations.

The following amounts are recognized net of tax in accumulated other comprehensive loss:

	June 30, 2021	D	ecember 31, 2020
Prior service cost	\$ 523	\$	586
Net loss	1,582		1,773
	\$ 2,105	\$	2,359

### 12. ACCUMULATED OTHER COMPREHENSIVE LOSS

The components of accumulated other comprehensive loss at June 30, 2021 and December 31, 2020 are summarized below:

	 June 30, 2021	 ecember 31, 2020
Foreign currency translation adjustment, net of taxes of (\$426) at June 30, 2021 and (\$750)		
at December 31, 2020	\$ (13,131)	\$ (13,142)
Unrealized holding gains on available-for-sale securities, net of taxes of \$0 at June 30, 2021		
and \$0 at December 31, 2020	18	19
Unfunded SERP liability, net of taxes of (\$1,322) at June 30, 2021 and (\$1,377) at		
December 31, 2020	 (4,741)	 (4,940)
Accumulated other comprehensive loss	\$ (17,854)	\$ (18,063)

Changes in accumulated other comprehensive loss by component during the six months ended June 30, 2021 are as follows. All amounts are net of tax.

				Unrealized Holding				
		Foreign						
	(	Currency		Gains on				
	T	ranslation		Available-for-		Unfunded		
	A	djustment	5	Sale Securities	S	ERP Liability		 Total
Balance at December 31, 2020	\$	(13,142)	\$	19	\$	(4,940)		\$ (18,063)
Other comprehensive income (loss) before								
reclassifications		11		(1)		-		10
Amount reclassified from accumulated other								
comprehensive income (loss)						199	(a)	199
Net current period other comprehensive								
income (loss)		11		(1)		199		209
Balance at June 30, 2021	\$	(13,131)	\$	18	\$	(4,741)		\$ (17,854)

<sup>(</sup>a) This reclassification relates to the amortization of prior service costs and gains/losses associated with the Company's SERP Plan. This expense is reflected in other income (expense), net on the accompanying condensed consolidated statement of operations.

#### 13. COMMITMENTS AND CONTINGENCIES

#### **Legal Proceedings**

On June 23, 2021, a patent infringement lawsuit styled *Bel Power Solutions, Inc. v. Monolithic Power Systems, Inc.*, Case Number 6:21cv00655, was filed in the United States District Court for the Western District of Texas (Waco Division) by Bel Power Solutions, Inc. against Monolithic Power Systems, Inc. for infringement of various patents directed towards systems, methods and articles of manufacture that provide a substantial improvement in power control for circuits, including novel and unique point-of-load regulators. A parallel Complaint asserting the same patents against Monolithic Power Systems, Inc. was also filed in the United States District Court for the District of Delaware in order to safeguard against potential venue challenges. The Company has made a demand for a jury trial in both Complaints.

In connection with the Company's 2014 acquisition of the Power-One Power Solutions business ("Power Solutions") of ABB Ltd., there is an ongoing claim by the Arezzo Revenue Agency in Italy concerning certain tax matters related to what was then Power-One Asia Pacific Electronics Shenzhen Co. Ltd. (now Bel Power Solutions Asia Pacific Electronics Shenzhen Co. Ltd., or "BPS China") for the years 2004 to 2006. In September 2012, the Tax Court of Arezzo ruled in favor of BPS China and cancelled the claim. In February 2013, the Arezzo Revenue Agency filed an appeal of the Tax Court's ruling. The hearing of the appeal was held on October 2, 2014. On October 13, 2014, BPS China was informed of the Regional Tax Commission of Florence ruling which was in favor of the Arezzo Revenue Agency and against BPS China. An appeal was filed on July 18, 2015 before the Regional Tax Commission of Florence and rejected. On December 5, 2016, the Arezzo Revenue Agency filed an appeal with the Supreme Court and BPS China filed a counter-appeal on January 4, 2017. The Supreme Court has yet to render its judgment. The estimated liability related to this matter is approximately \$12.0 million and has been included as a liability for uncertain tax positions on the accompanying condensed consolidated balance sheets. As Bel is fully indemnified in this matter per the terms of the stock purchase agreement with ABB, a corresponding other asset for indemnification is also included in other assets on the accompanying condensed consolidated balance sheets at June 30, 2021 and December 31, 2020.

The Company is not a party to any other legal proceeding, the adverse outcome of which is likely to have a material adverse effect on the Company's consolidated financial condition or results of operations.

#### 14. SEGMENTS

The Company operates in one industry with three reportable operating segments, which represent the Company's three product groups and a corporate segment. The segments consist of Cinch Connectivity Solutions, Power Solutions and Protection, Magnetic Solutions and a Corporate segment. The primary criteria by which financial performance is evaluated and resources are allocated are revenue and gross profit. The following is a summary of key financial data:

				Three M	onth	hs Ended June 30	), 20	21

### Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information in this Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") should be read in conjunction with the Company's condensed consolidated financial statements and the related notes set forth in Item 1 of Part I of this Quarterly Report on Form 10-Q, our MD&A set forth in Item 7 of Part II of our 2020 Annual Report on Form 10-K and our consolidated financial statements and related notes set forth in Item 8 of Part II of our 2020 Annual Report on Form 10-K. See Part II, Item 1A, "Risk Factors," below and "Cautionary Notice Regarding Forward-Looking Information," above, and the information referenced therein, for a description of risks that we face and important factors that we believe could cause actual results to differ materially from those in our forward-looking statements. All statements herein regarding the likely impact of COVID-19 constitute forward-looking statements. All amounts and percentages are approximate due to rounding and all dollars in the text are in millions, except per share amounts or where otherwise noted. When we cross-reference to a "Note," we are referring to our "Notes to Condensed Consolidated Financial Statements," unless the context indicates otherwise. All amounts noted within the tables are in thousands and amounts and percentages are approximate due to rounding.

#### Overview

#### **Our Company**

Bel designs, manufactures and markets a broad array of products that power, protect and connect electronic circuits. These products are primarily used in the military, aerospace, networking, telecommunications, computing, transportation and broadcasting industries. Bel's portfolio of products also finds application in the automotive, medical and consumer electronics markets.

The Company operates through three product group segments, in addition to a Corporate segment. In the six months ended June 30, 2021, 40% of the Company's revenues were derived from Power Solutions and Protection, 32% from Cinch Connectivity Solutions and 28% from its Magnetic Solutions operating segment.

Our operating expenses are driven principally by the cost of labor where the factories that Bel uses are located, the cost of the materials that we use and our ability to effectively and efficiently manage overhead costs. As labor and material costs vary by product line and region, any significant shift in product mix can have an associated impact on our costs of sales. Costs are recorded as incurred for all products manufactured. Such amounts are determined based upon the estimated stage of production and include materials, labor cost and fringes and related allocations of factory overhead. Our products are manufactured at various facilities in the U.S., Mexico, Dominican Republic, England, Czech Republic, Slovakia and the People's Republic of China (PRC).

We have little visibility into the ordering habits of our customers and we can be subjected to large and unpredictable variations in demand for our products. Accordingly, we must continually recruit and train new workers to replace those lost to attrition and be able to address peaks in demand that may occur from time to time. These recruiting and training efforts and related inefficiencies, and overtime required in order to meet any increase in demand, can add volatility to the labor costs incurred by us.

### The Effects of COVID-19 on Bel's Business

During the first half of 2021, the Company continued to be focused on the safety and well-being of its associates around the world in light of COVID-19 and the emergence of the Delta variant. A significant amount of products manufactured by Bel are utilized in military, medical and networking applications, and are therefore deemed essential by the various jurisdictions in which we operate. Our management team has been able to effectively respond in implementing our business continuity plans around the world. Protective measures are in place throughout our facilities, including employee screenings, physical partitions, social distancing, use of face coverings, travel and visitor restrictions and work from home policies as we continue to service our customers. The majority of our office staff continues to work remotely for part of the week to avoid a large number of associates being present in an office setting at any one time. The combination of protective measures at our factories coupled with remote work arrangements have enabled us to maintain operations, including financial reporting systems, internal controls over financial reporting and disclosure controls and procedures.

During the first half of 2020, the Company incurred indirect COVID-19 related costs, including operational inefficiencies and employee retention programs at its manufacturing facilities in China, which were offset by \$1.0 million and \$3.2 million of COVID-19 relief funding received from the Chinese government during the three and six months ended June 30, 2020, respectively.

All of our manufacturing sites are operating as of the filing date of this Quarterly Report. Although the majority of our factories in North America, Europe and Asia are currently at 90+% of their normal workforce levels, we are experiencing lower productivity and efficiency rates at certain sites in North America and Europe (estimated at 80-90%, depending on the impacted site) due to a reduced workforce at those sites. In addition, in order to comply with social distancing requirements, certain of our factory floors are reconfigured to provide additional spacing in production lines, which has resulted in some inefficiencies related to product flow. Bel has also experienced higher freight costs for products typically shipped by air due to lower cargo capacity with the reduction in commercial air travel. While there are some delays within the supply chain in the movement of products related to border closures, to date such delays have not materially impacted our ability to operate our business or achieve our business goals. To date, we have not seen a significant reduction in demand for our products due to COVID-19, as many of our products support military, medical and networking applications, which generally have not been negatively impacted by COVID-19. However, approximately 5% of our revenue relates to products utilized in end markets that have been impacted by COVID-19, such as commercial aerospace.

Given the general uncertainty regarding the impact of COVID-19 on our manufacturing capability and on our customers, we are unable to quantify the ultimate impact of COVID-19 on our future results at this time.

Based on our analysis of ASC 350 and ASC 360 during the six months ended June 30, 2021, we are not aware of any potential triggering events for impairment of our goodwill, indefinite-lived intangible assets or finite-lived assets. The Company will continue to assess the relevant criteria on a quarterly basis based on updated cash flow and market assumptions. Unfavorable changes in cash flow or market assumptions could result in impairment of these assets in future periods.

As our operations have continued, albeit at slightly reduced production and efficiency rates, we have not experienced a negative impact on our liquidity to date. Our balance of cash on hand continues to be strong at \$66.4 million at June 30, 2021 as compared to \$84.9 million at December 31, 2020, despite the utilization of \$19.4 million in cash to fund acquisitions in the first quarter of 2021. The Company also has availability under its current revolving credit facility; as of June 30, 2021, the Company could borrow an additional \$29.0 million while still being in compliance with its debt covenants. However, any further negative impact to our financial results related to COVID-19 would have a related negative impact on our financial covenants outlined in our credit agreement, which would impact the amount available to borrow under our revolving credit facility. In order to assist with maintaining our liquidity position, the Company implemented several measures during the first quarter of 2020, including the deferral of employer social security taxes under the federal CARES Act (through December 31, 2020), restrictions on new hires, suspension of salary reviews, the near elimination of non-essential business travel and restrictions on spending related to capital expenditures. Certain of these restrictions were lifted in the second quarter of 2021. During the six months ended June 30, 2021, travel expenses incurred by the Company were \$0.4 million lower than the first half of 2020. The management team closely monitors the highly-evolving COVID situation and has developed plans which could be implemented to minimize the impact to the Company in the event the situation deteriorates.

Our statements regarding the future impact of COVID-19 represent Forward-Looking Statements. See "Cautionary Notice Regarding Forward-Looking Information."

#### Other Key Factors Affecting our Business

The Company believes that, in addition to COVID-19, the key factors affecting Bel's results for the six months ended June 30, 2021 and/or future results include the following:

- Revenues The Company's revenues in the first six months of 2021 were up \$24.2 million, or 10.8%, as compared to the same period of 2020. The increase was primarily seen within our Power Solutions and Protection group from increased demand for our CUI and circuit protection products, and recent power design wins moving into production within the eMobility end market, partially offset by a reduction in modules product sales as we discontinue that product line. The 2021 acquisitions of rms and EOS contributed a combined \$8.1 million to Bel's consolidated sales from their respective acquisition dates through June 30, 2021.
- <u>Backlog</u> Our backlog of orders amounted to \$313.8 million at June 30, 2021, an increase of \$158.8 million, or 102%, from December 31, 2020. Since year-end 2020, we saw a 143% increase in the backlog for our Power Solutions and Protection business due to increased demand across the majority of our power product lines. The backlog of orders for our Magnetic Solutions products grew by 105% from year end, primarily driven by an increase in orders from a large networking customer. Backlog for our Connectivity Solutions products increased by 45% from the 2020 year-end levels, primarily due to a partial recovery in demand from our direct and after-market commercial aerospace customers.

- <u>Product Mix</u> Material and labor costs vary by product line and any significant shift in product mix between higher- and lower-margin product lines will have a corresponding impact on the Company's gross margin percentage. In general, our connectivity products have the highest contribution margins of our three product groups. Our power products have a higher cost bill of materials and are impacted to a greater extent by changes in material costs. As our magnetic solutions products are more labor intensive, margins on these products are impacted to a greater extent by minimum and market-based wage increases in the PRC and fluctuations in foreign exchange rates between the U.S. Dollar and the Chinese Renminbi. Fluctuations in revenue volume among our product groups will have a corresponding impact on Bel's profit margins. See *Summary by Operating Segment Revenue and Gross Margin* below for further details.
- <u>Pricing and Availability of Materials</u> There have been recent supply constraints related to components that constitute raw materials in our manufacturing processes, particularly with resistors, capacitors, discrete semiconductors, plastic resin and copper. Lead times have been extended and the reduction in supply also caused an increase in prices for certain of these components. As a result, the Company's material costs as a percentage of revenue increased to 46.0% of sales during the first six months of 2021 from 43.5% during the same period of 2020.
- <u>Labor Costs</u> Labor costs were 9.4% of revenue during the first six months of 2021 as compared to 9.7% of revenue during the same period of 2020. A favorable shift in product mix to less labor-intensive product was offset by higher labor costs associated with unfavorable exchange rate fluctuations in 2021 and wage increases that went into effect in March 2020 and May 2020 at our PRC factories. There were also wage increases which went into effect at one of our factories in the PRC effective April 1, 2021 which had an impact on labor costs beginning in the second quarter of 2021.
- Restructuring During the second quarter of 2021, the Company decided to exit its custom modules power product line. As a result, the modules design center in Maidstone, UK will be closing during the third quarter of 2021, which is anticipated to result in annualized cost savings of \$400,000. During 2020, the Company implemented facility closures in Switzerland, Germany and Hong Kong and other general function consolidations at various sites. In connection with the actions implemented in 2020, annualized cost savings of \$4.4 million are expected to be realized in 2021 (\$1.1 million in cost of sales, \$2.0 million in R&D and \$1.3 million in SG&A). The Company will continue to explore opportunities to streamline the organization throughout the balance of 2021 to further improve profitability.
- <u>Impact of Foreign Currency</u> During the three and six months ended June 30, 2021, labor and overhead costs were \$1.6 million and \$2.9 million higher, respectively, than the same periods of 2020 due to an unfavorable foreign exchange environment as compared to the prior year period. The Company also realized foreign exchange transactional losses of \$0.2 million and gains of \$0.1 million during the and three and six months ended June 30, 2021, respectively, due to the fluctuation of the spot rates of certain currencies in effect when translating our balance sheet accounts at June 30, 2021 versus those in effect at December 31, 2020. Since we are a U.S. domiciled company, we translate our foreign currencydenominated financial results into U.S. dollars. Due to the changes in the value of foreign currencies relative to the U.S. dollar, translating our financial results and the revaluation of certain intercompany as well as third-party transactions to and from foreign currencies to U.S. dollars may result in a favorable or unfavorable impact to our consolidated statements of operations and cash flows. The Company was unfavorably impacted by transactional foreign exchange gains in the first six months of 2021 due to the appreciation of the Euro, British Pound, Mexican Peso and Chinese Renminbi against the U.S. dollar as compared to exchange rates in effect during 2020. The Company has significant manufacturing operations located in in the PRC where labor and overhead costs are paid in local currency. As a result, the U.S. Dollar equivalent costs of these operations were \$1.6 million and \$2.9 million higher, respectively, in the three and six months ended June 30, 2021 as compared to the same period of 2020. During the first quarter of 2021, the Company entered into forward contracts to secure a favorable exchange rate related to the Mexican Peso through August 2021 for a portion of Bel's expected Peso obligations for the remainder of the year. The Company monitors changes in foreign currencies and may implement further actions to help mitigate the impact that changes in foreign currencies may have on its consolidated operating results.
- <u>Effective Tax Rate</u> The Company's effective tax rate will fluctuate based on the geographic jurisdiction in which our pretax profits are earned. Of the geographic jurisdictions in which we operate, the U.S. and Europe's tax rates are generally equivalent; and Asia has the lowest tax rates of the Company's three geographical segments. See Note 10, "Income Taxes".

In the first quarter of 2021, Bel implemented price adjustments to offset labor and material cost increases and we will continue to see the benefit of these pricing increases over the remainder of the year. With our new CFO coming on board earlier in 2021, there is a heightened focus on profit improvement, driving operational efficiencies and the pursuit of IoT and 5G opportunities which are expected to drive growth in our networking, rail, e-Mobility and medical end markets. We enter the second half of 2021 with a sense of cautious optimism around shipping our healthy backlog of orders, while further analyzing the global organization to maximize profit retention. The preceding sentences represent Forward-Looking Statements. See "Cautionary Notice Regarding Forward-Looking Information."

#### **Summary by Operating Segment**

#### Revenue and Gross Margin

The Company's revenue by operating segment for the three and six months ended June 30, 2021 and 2020 were as follows:

			Three Mor	nths Ended				Six Months Ended						
	June 30,								June	June 30,				
	 Rev	enue		Gross	Margin		Rev	Revenue Gross Margin						
	 2021		2020	2021	2020		2021		2020	2021	2020			
Connectivity solutions	\$ 43,046	\$	38,908	30.3%	29.6%	\$	81,102	\$	78,007	28.1%	29.1%			
Magnetic solutions	40,305		37,152	23.2%	25.4%		69,252		65,853	19.2%	23.4%			
Power solutions and protection	55,390		45,112	25.9%	23.5%		99,031		81,289	25.4%	24.0%			
	\$ 138,741	\$	121,172	24.7%	25.8%	\$	249,385	\$	225,149	23.7%	25.3%			

#### Connectivity Solutions:

Sales of our Connectivity Solutions products increased by \$4.1 million and \$3.1 million during the three and six months ended June 30, 2021, respectively, as compared to the same periods of 2020. These increases were primarily due to a partial rebound in demand from direct and after-market commercial aerospace customers of \$2.9 million and \$1.1 million during the three and six months ended June 30, 2021, respectively, as compared to the same periods of 2020. Sales of Connectivity Solutions products through our distribution channels were also higher by \$2.0 million and \$2.3 million during the three and six months ended June 30, 2021, respectively, as compared to the same periods of 2020. These sales increases were offset by a decline in military sales of \$1.7 million and \$2.0 million during the three and six months ended June 30, 2021, respectively, as compared to the prior year periods. The shift in product mix in addition to higher material and labor costs in the 2021 periods offset the benefits of the higher sales volume on the gross margin line.

#### *Magnetic Solutions:*

Sales of our Magnetic Solutions products improved by \$3.2 million and \$3.4 million during the three and six months ended June 30, 2021, respectively. Demand for our Magnetic Solutions products has increased in recent quarters and we saw the heightened orders translate into sales beginning in the second quarter of 2021. The labor market in the PRC continues to be competitive, driving wage rates higher. Further, the Renminbi has appreciated against the U.S. Dollar in the three and six month periods ended June 30, 2021 as compared to the same periods of 2020, adding to the higher labor burden in the 2021 periods. During the first half of 2020, our ability to manufacture product was temporarily impacted due to the factory closures associated with COVID-19. Bel received \$1.0 million and \$3.2 million in subsidies from the Chinese government during the three and six months ended June 30, 2020, respectively, to assist in offsetting COVID-related costs incurred, which aided our gross margin for this group in the 2020 periods presented above.

#### Power Solutions and Protection:

Sales of our Power Solutions and Protection products were higher by \$10.3 million during the second quarter of 2021 and by \$17.7 million during the first half of 2021 as compared to the same periods of 2020. The sales increase for the second quarter was led by the inclusion of EOS, acquired in March 2021, which contributed sales of \$3.5 million, higher CUI sales of \$3.2 million (30%), a \$2.3 million (56%) increase in fuse sales, and a \$1.0 million (53%) increase in sales of product going into the eMobility end market. The sales increase for the first half of 2021 versus the same period of 2020 were primarily due to growth of \$9.8 million from the Bel Power Solutions business (including \$2.5 million of higher sales into e-Mobility applications), a \$5.3 million increase in CUI sales, \$3.7 million of higher fuse sales, and the \$3.5 million contribution from the March 2021 acquisition of EOS. Sales growth in both periods presented was offset by declines in custom module sales of \$2.8 million and \$4.2 million for the three and six months ended June 30, 2021, respectively, as compared to the same periods of 2020 as the Company is discontinuing this product line. Gross margin improved in the 2021 periods above as compared to the 2020 periods as higher sales volume offset the impact of increased material and labor costs.

### Cost of Sales

Cost of sales as a percentage of revenue for the three and six months ended June 30, 2021 and 2020 consisted of the following:

	Three Month June 3		Six Months June 3			
	2021	2020	2021	2020		
Material costs	46.4%	43.4%	46.0%	43.5%		
Labor costs	9.5%	10.5%	9.4%	9.7%		
Other expenses	19.4%	20.3%	20.9%	21.5%		
Total cost of sales	75.3%	74.2%	76.3%	74.7%		

The increases in material costs as a percentage of sales during the second quarter and first half of 2021 compared to the same periods in 2020 primarily relate to a higher percentage of our revenue relating to Power Solutions and Protection products, which carry a higher material content. Further, there have been industry-wide shortages on certain raw materials, such as semiconductors and plastic resin, which has led to an increase in material pricing from our suppliers. Labor costs as a percentage of sales have also increased from the 2020 periods due to wage rate increases at our PRC factories that went into effect in March 2020 and May 2020, and an unfavorable fluctuation in the Chinese Renminbi, Mexican Peso and Euro exchange rate versus the U.S. Dollar.

The other expenses noted in the table above include fixed cost items such as support labor and fringe, depreciation and amortization, and facility costs (rent, utilities, insurance). In total, these other expenses increased during the second quarter of 2021 by \$2.4 million and in the first half of 2021 by \$4.2 million as compared to the same periods of 2020, as costs during the three and six months ended June 30, 2020 were reduced by \$1.0 million and \$3.2 million, respectively, related to subsidies received from the Chinese government to offset costs and inefficiencies incurred due to the temporary closures of our factories in China in connection with COVID-19.

#### Research and Development ("R&D") Expense:

R&D expense amounted to \$5.5 million and \$6.1 million for the three months ended June 30, 2021 and 2020, respectively and \$10.4 million and \$12.2 million for the six months ended June 30, 2021 and 2020, respectively. The lower R&D expense in the 2021 periods as compared to the same periods of 2020 is largely reflective of cost savings related to the closure of our R&D facility in Uster, Switzerland late in the third quarter of 2020.

#### Selling, General and Administrative Expense ("SG&A")

SG&A expenses were \$21.8 million for the second quarter of 2021, up from \$19.1 million in the second quarter of 2020. SG&A salaries and fringe benefits increased by \$1.5 million, legal and professional fees increased by \$0.5 million and sales commissions were higher by \$0.3 million as compared to the second quarter of 2020. These costs were partially offset by a lower office expenses of \$0.4 million.

SG&A expenses were \$43.6 million during the six months ended June 30, 2021, up from \$39.8 million during the same period of 2020. SG&A salaries and fringe benefits increased by \$3.0 million and legal and professional fees were higher by \$0.6 million as compared to the second quarter of 2020. These costs were partially offset by a lower office expenses of \$0.5 million and a reduction in travel expenses of \$0.4 million.

#### Provision for (Benefit From) Income Taxes

The Company's effective tax rate will fluctuate based on the geographic jurisdiction in which the pretax profits are earned. Of the geographic jurisdictions in which the Company operates, the U.S. and Europe's tax rates are generally equivalent; and Asia has the lowest tax rates of the Company's three geographical segments. See Note 10, "Income Taxes".

The (benefit from) provision for income taxes for the three months ended June 30, 2021 and 2020 was (\$1.9) million and \$0.4 million, respectively. The Company's earnings before income taxes for the three months ended June 30, 2021, were consistent with the same period in 2020. The Company's effective tax rate was (30.8%) and 7.1% for the three months ended June 30, 2021 and 2020, respectively. The change in the effective tax rate during the three months ended June 30, 2021 as compared to the same period in 2020, is primarily attributable to the tax benefit relating to the reversal of uncertain tax positions resulting from the expiration of certain statutes of limitations as well as a decrease in U.S. taxes related to income from foreign subsidiaries taxed in the U.S. as part of the Tax Cuts and Jobs Act. See Note 10, "Income Taxes."

The benefit from income taxes for the six months ended June 30, 2021 and 2020 was (\$0.9) million and (\$0.3) million, respectively. The Company's earnings before income taxes for the six months ended June 30, 2020, were approximately \$8.8 million higher than the same period in 2020, primarily attributable to an increase in the income from the North America segment. The Company's effective tax rate was (8.4%) and (24.6%) for the six months ended June 30, 2021 and 2020, respectively. The change in the effective tax rate during the six months ended June 30, 2021 as compared to the same period in 2020, is primarily attributable the same factors noted. Additionally, the effective rate in 2020 was favorably impacted by the reversal of valuation allowances and the federal tax law changes for the CARES Act. See Note 10, "Income Taxes."

#### **Liquidity and Capital Resources**

Our primary sources of cash are the collection of trade receivables generated from the sales of our products and services to our customers and amounts available under our existing lines of credit, including our credit facility. Our primary uses of cash are payments for operating expenses, investments in working capital, capital expenditures, interest, taxes, dividends, debt obligations and other long-term liabilities. We believe that our current liquidity position and future cash flows from operations will enable us to fund our operations, including all of the items mentioned above in the next twelve months.

At June 30, 2021 and December 31, 2020, \$46.7 million and \$57.5 million, respectively (or 70% and 68%, respectively), of cash and cash equivalents was held by foreign subsidiaries of the Company. During the first six months of 2021, the Company repatriated \$23.5 million from outside of the U.S., with minimal incremental tax liability. We continue to analyze our global working capital and cash requirements and the potential tax liabilities attributable to further repatriation, and we have yet to make any further determination regarding repatriation of funds from outside the U.S. to fund the Company's U.S. operations in the future. In the event these funds were needed for Bel's U.S. operations, the Company would be required to accrue and pay U.S. state taxes and any applicable foreign withholding taxes to repatriate these funds.

Cash and cash equivalents, marketable securities and accounts receivable comprised approximately 32.4% of the Company's total assets at June 30, 2021 and 34.4% of total assets at December 31, 2020. The Company's current ratio (i.e., the ratio of current assets to current liabilities) was 2.8 to 1 at June 30, 2021 and 3.2 to 1 at December 31, 2020.

In June 2014, the Company entered into a senior Credit and Security Agreement, which was subsequently amended in December 2014, March 2016, December 2017 and February 2020. The Credit and Security Agreement contains customary representations and warranties, covenants and events of default and financial covenants that measure (i) the ratio of the Company's total funded indebtedness, on a consolidated basis, to the amount of the Company's consolidated EBITDA, as defined ("Leverage Ratio"), and (ii) the ratio of the amount of the Company's consolidated EBITDA to the Company's consolidated fixed charges ("Fixed Charge Coverage Ratio"). If an event of default occurs, the lenders under the Credit and Security Agreement would be entitled to take various actions, including the acceleration of amounts due thereunder and all actions permitted to be taken by a secured creditor. The Company was in compliance with its debt covenants as of June 30, 2021, including its most restrictive covenant, the Leverage Ratio. The unused credit available under the credit facility at June 30, 2021 was \$63.0 million, of which we had the ability to borrow \$28.8 million without violating our Leverage Ratio covenant based on the Company's existing consolidated EBITDA.

We have been engaged in and recently substantially completed a multi-year process of conforming the majority of our operations onto one global Enterprise Resource Planning system ("ERP"). The ERP is designed to improve the efficiency of our supply chain and financial transaction processes, accurately maintain our books and records, and provide information important to the operation of the business to our management team. The implementation of the ERP was being conducted by business unit on a three-phase approach through 2021. Since inception of the project, we have incurred costs in a cumulative amount of \$7.0 million in connection with this implementation, of which less than \$0.1 million of costs were incurred during the six months ended June 30, 2021 and no costs were incurred during the six months ended June 30, 2020. The first phase of the ERP implementation project was completed in the first quarter of 2019 with the Power Solutions business going live on the new system effective January 1, 2019. The second phase of the project was completed in the first quarter of 2020 with the TRP business going live on the new system effective January 1, 2021 and the final phase of the project was completed in July 2021 with a portion of Bel's legacy businesses going live on the new system effective January 1, 2021 and the final phase of the project was completed in July 2021 with the Company's Stewart Connector business going live on the new system effective July 1, 2021. To date, we've achieved annual cost savings on ERP licensing fees of approximately \$2 million within SG&A expense which were largely realized starting in 2019. This overall project was substantially complete by the end of July 2021, with no significant consulting costs anticipated going forward. The preceding sentence represents a Forward-Looking Statement. See "Cautionary Notice Regarding Forward-Looking Information."

#### Cash Flows

#### Six Months Ended June 30, 2021

During the six months ended June 30, 2021, the Company's cash and cash equivalents decreased by \$18.5 million. This decrease was primarily due to the following:

- payments for acquisitions, net of cash acquired, of \$16.8 million;
- purchases of property, plant and equipment of \$2.5 million;
- dividend payments of \$1.6 million; and
- repayments of long-term debt of \$3.0 million; and
- net cash used in operating activities of \$1.9 million; partially offset by
- proceeds from the sale of property, plant and equipment of \$6.8 million

During the six months ended June 30, 2021, accounts receivable increased by \$12.6 million due to the increase in sales during the second quarter of 2021 as compared to the fourth quarter of 2020. Days sales outstanding (DSO) were 56 days at June 30, 2021 as compared to 57 days at December 31, 2020. Inventory increased by \$10.4 million at June 30, 2021 compared to December 31, 2020, largely in raw materials to accommodate the recent increase in product orders. Inventory turns, excluding R&D, increased slightly to 3.6 at June 30, 2021 from 3.4 at December 31, 2020.

#### **Critical Accounting Policies**

Management's discussion and analysis of Bel's financial condition and results of operations are based upon the Company's condensed consolidated financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of these financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, the Company evaluates its estimates, including those related to product returns, bad debts, inventories, goodwill, intangible assets, investments, warranties, SERP expense, income taxes and contingencies and litigation. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

#### **Recent Accounting Pronouncements**

The discussion of new financial accounting standards applicable to the Company is incorporated herein by reference to Note 1 to the Company's Financial Statements, "Basis of Presentation and Accounting Policies," included in Part I, Item 1 of this Quarterly Report on Form 10-Q.

#### Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company is exposed to market risk primarily from changes in foreign currency exchange rates and changes in interest rates associated with its long-term debt. During the first six months of 2021, the U.S. Dollar depreciated against certain of the other currencies in which the Company pays its expenses. In comparing average exchange rates during the first six months of 2021 versus those during the same period of 2020, the the British Pound appreciated by 9%, the Euro appreciated by 8%, the Chinese Renminbi appreciated by 7%, and the Mexican Peso appreciated by 5% against the U.S. Dollar as compared to the prior year period. The Company estimates that the appreciation of these foreign currencies led to higher operating costs of \$1.6 million during the second quarter of 2021 and \$2.9 million during the first half of 2021 as compared to the same periods of 2020, as the majority of the Company's expenses in the PRC and Mexico are paid in local currency. Foreign exchange gains were also recognized in the first six months of 2021 of \$0.1 million on translation of local currency balance sheet accounts to the U.S. Dollar in consolidation, resulting from foreign currency fluctuations since December 31, 2020. During the first quarter of 2021, the Company entered into forward contracts to secure a favorable exchange rate related to the Peso through August 2021 for a portion of Bel's expected Peso obligations during that time. The Company monitors changes in foreign currencies and may implement further pricing actions to help mitigate the impact that changes in foreign currencies may have on its consolidated operating results.

Borrowings under the Company's credit facility are at variable rates of interest and expose Bel to interest rate risk. If interest rates increase, the Company's debt service obligations on the variable rate indebtedness would increase even though the amount borrowed remained the same, and the Company's net earnings and cash flows, including cash available for servicing our indebtedness, would correspondingly decrease. As of June 30, 2021, the Company had \$113.9 million of borrowings under its credit facility at a variable interest rate. A 1% increase or decrease in the assumed interest rates on the senior secured credit facilities would result in a \$1.1 million increase or decrease in annual interest expense.

Refer to Item 7A, "Management's Discussion and Analysis of Financial Condition and Results of Operations," in the Company's Annual Report on Form 10-K for the year ended December 31, 2020 for further discussion of market risks.

#### Item 4. Controls and Procedures

<u>Disclosure controls and procedures</u>: As of the end of the period covered by this report, the Company carried out an evaluation, with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures pursuant to Securities Exchange Act Rule 13a-15. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report.

<u>Changes in internal controls over financial reporting</u>: There has not been any change in the Company's internal control over financial reporting that occurred during the Company's last fiscal quarter to which this report relates that has materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

#### PART II. Other Information

#### Item 1. Legal Proceedings

The information called for by this Item is incorporated herein by reference to Note 13, "Commitments and Contingencies" of the Company's Condensed Consolidated Financial Statements, under "Legal Proceedings", as set forth in Part I, Item 1 of this Quarterly Report on Form 10-Q. We are also involved in various other legal actions incidental to our business. We believe, after consulting with counsel, that the disposition of these other legal proceedings and matters will not have a material effect on our condensed consolidated financial condition or results of operations.

#### Item 1A. Risk Factors

Part I, Item 1A, "Risk Factors," of our Annual Report on Form 10-K for the fiscal year ended December 31, 2020 should be carefully considered before making an investment decision. These are the risk factors that we consider to be the most significant risk factors, but they are not the only risk factors that should be considered in making an investment decision. This Form 10-Q also contains Forward-Looking Statements that involve risks and uncertainties. See the "Cautionary Notice Regarding Forward-Looking Information," above. Our business, consolidated financial condition and consolidated results of operations could be materially adversely affected by any of the risk factors described, under "Cautionary Notice Regarding Forward-Looking Information" or with respect to specific Forward-Looking Statements presented herein. The trading price of our securities could decline due to any of these risks, and investors in our securities may lose all or part of their investment. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may also materially adversely affect our business in the future. Except as required by the federal securities law, we undertake no obligation to update or revise any risk factor, whether as a result of new information, future events or otherwise.

Item 2. <u>Unregistered Sales of Equity Securities and Use of Proceeds</u>

Not applicable.

Item 3. <u>Defaults Upon Senior Securities</u>

Not applicable.

Item 4. <u>Mine Safety Disclosures</u>

Not applicable.

Item 5. Other Information

Not applicable.

#### CERTIFICATION

- I, Daniel Bernstein, certify that:
- 1. I have reviewed this quarterly report on Form 10-Q of Bel Fuse Inc.;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
